

THERMOSTATIC CONTROL HEADS IN CLASS A

CALEFFI
Hydronic Solutions

FUNCTIONS - FEATURES

- TELL certified to energy efficiency class A
- Instant installation and economical to run
- The simplest solution for reducing consumption by around 15-20% (compared to manual controls)
- Can adapt to existing systems and is very sensitive to all temperature variations, even in conditions which are not particularly ideal
- Available with built-in sensor or remote sensor
- Can be used in conjunction with direct and indirect heat metering systems

PRODUCT RANGE - THERMOSTATIC CONTROL HEADS

CODE	DESCRIPTION
200000	Thermostatic control head with adapter
200001	Thermostatic control head
201000	Thermostatic control head with remote sensor and adapter
209000	Tamper-proof and anti-theft cap
209001	Special allen key for tamper-proof cap tightening

PERFORMANCE

MAX. DIFFERENTIAL PRESSURE WITH CONTROL FITTED	1 bar
ADJUSTMENT SCALE	※-5
CONTROL TEMPERATURE RANGE	7-28°C
FROST PROTECTION CUT-IN	7°C
MAX. AMBIENT TEMPERATURE	50°C
LENGTH OF 201 SERIES CAPILLARY PIPE	2 m

TELL CERTIFICATION

TELL
Thermostatic Efficiency Label

Manufacturer: **Caleffi S.p.A.**
Model: **200000**

THERMOSTATIC CONTROL HEADS IN CLASS A

EUnited Valves (The European Valve Manufacturers Association set up in Brussels) has prepared a classification system for products that manage home comfort and water responsibly in the residential field and, more specifically, for thermostatic valves.

Caleffi thermostatic control heads were included in the list of TELL approved (Thermostatic Efficiency Label) certified product and were placed in the **A efficiency class**.

This classification guarantees that thermostatic valves are able to contribute to the energy saving of heating systems.
