PATENT PENDING

With advanced electronic functions

- Complete range for low, medium and high temperature systems.
- Remote user interface with chronothermostat function.
- Compact size, simple installation, use and maintenance.
- Control of the return temperature in both heating and DHW mode. Ideal for condensing boilers and district heating applications.
- Instantaneous DHW production with DHW heat exchanger. Weekly programmable preheating function.
- Self-diagnostics and remote control via MODBUS.

USER INTERFACE

Remote installation

The user interface can work as a chronothermostat when the function is enabled.

On the HIU

When left on the HIU the room temperature control function can be disabled.
