

AutoFeed™

SYSTEM FEEDER

NA55370

CALEFFI Hydronic Solutions

Maintain your closed-loop hydronic system's pressure effortlessly with the pre-adjustable AutoFeed system Feeder. It automatically detects pressure drops and provides make-up fluid when needed. Featuring a digital controller, diaphragm pump, and 4.5-gallon tank, it supports water and glycol solutions to ensure reliable, continuous performance.

PRODUCT FEATURES

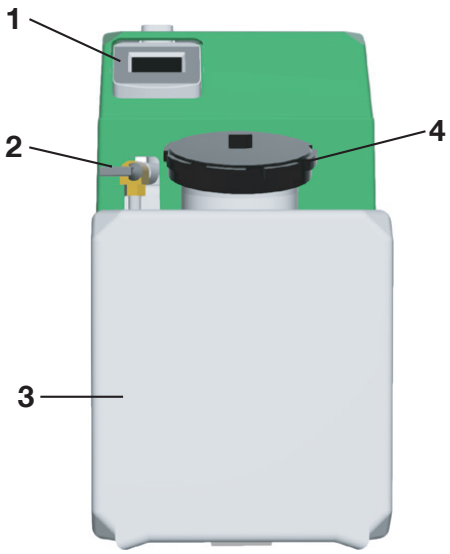

- **Fluid Management:**
  Maintain the perfect system pressure. Utilize the 4.5-gallon tank for storage or mixing hydronic fluid. Minimizing flood damage for the homeowner in the case of a system leak.
- **Digital Pressure Management:**
  The user-friendly digital interface eliminates the guesswork of manual gauges. Contractors can easily set a specific pressure set-point; the unit then automatically monitors the system 24/7, providing consistent, automated filling the moment a pressure loss is detected.
- **Safety Detection:**
  Peace of mind comes standard with a built-in indicator light. In the event of low fluid level, low or high pressure conditions.
- **Streamlined System Integration:**
  Expanding our AutoFill product offering, the self-contained system feeder doesn't require backflow prevention, eliminating the need and cost of annual testing.
- **Versatile Installation Design:**
  This space-saving unit features floor or wall mounting for modern mechanical rooms. Its translucent, marked tank simplifies monitoring for quick and easy maintenance.
- **Caleffi Reliability & Expert Support:**
  When you're in the field, you're never alone. Every product is backed by the Caleffi Tech Support Team and our global reputation for engineering excellence.

PRODUCT RANGE - AutoFeed System Feeder

AUTOFEED	
CODE	DESCRIPTION
NA553700	SYSTEM FEEDER

CONSTRUCTION DETAILS

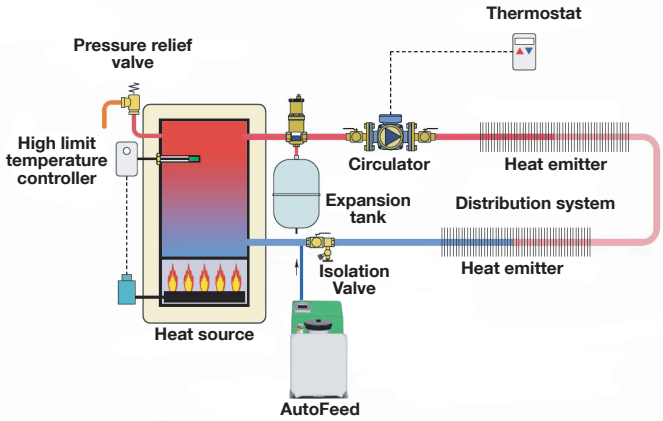

1	Controller
2	Drain valve
3	Reservoir
4	Reservoir access cover

PERFORMANCE

PRESSURE SETTING RANGE	0 - 45 psi
FACTORY SETTING	16 psi (cut-in), 18 psi (cut-out)
SUITABLE FLUIDS	water, glycol solutions
