

GENERAL PRODUCT GUIDE

COMPONENTS FOR CENTRAL HEATING SYSTEMS

AIR AND DIRT SEPARATION DEVICES

VALVES AND ACCESSORIES FOR RADIATORS

ZONE AND MOTORISED VALVES, DISTRIBUTION MANIFOLDS, BOXES AND ACCESSORIES

RADIANT PANEL SYSTEM CONTROL

COMPONENTS FOR DOMESTIC WATER SYSTEMS

BACKFLOW PREVENTION DEVICES

BALANCING AND CONTROL DEVICES

FITTINGS

GAS SAFETY

EXPANSION VESSELS, CHRONO-THERMOSTATS, THERMOSTATS

HEAT SYSTEMS

COMPONENTS FOR RENEWABLE ENERGY SYSTEMS

SPARE PARTS - For spare parts, please contact the appropriate department

FITTING COUPLING - PRODUCT DIMENSIONS are available on www.caleffi.com

Explore bim.caleffi.com, the portal for MEP design professionals. Download virtual models of our products with constantly updated essential data and parameters. Find families (RFA), projects (RVT), and templates for the MEP sector, as well as models in IFC and BOL formats. Join over 6000 professionals who have already chosen our smart design solutions.

PRODUCTION PLANTS

MADE IN
ITALY

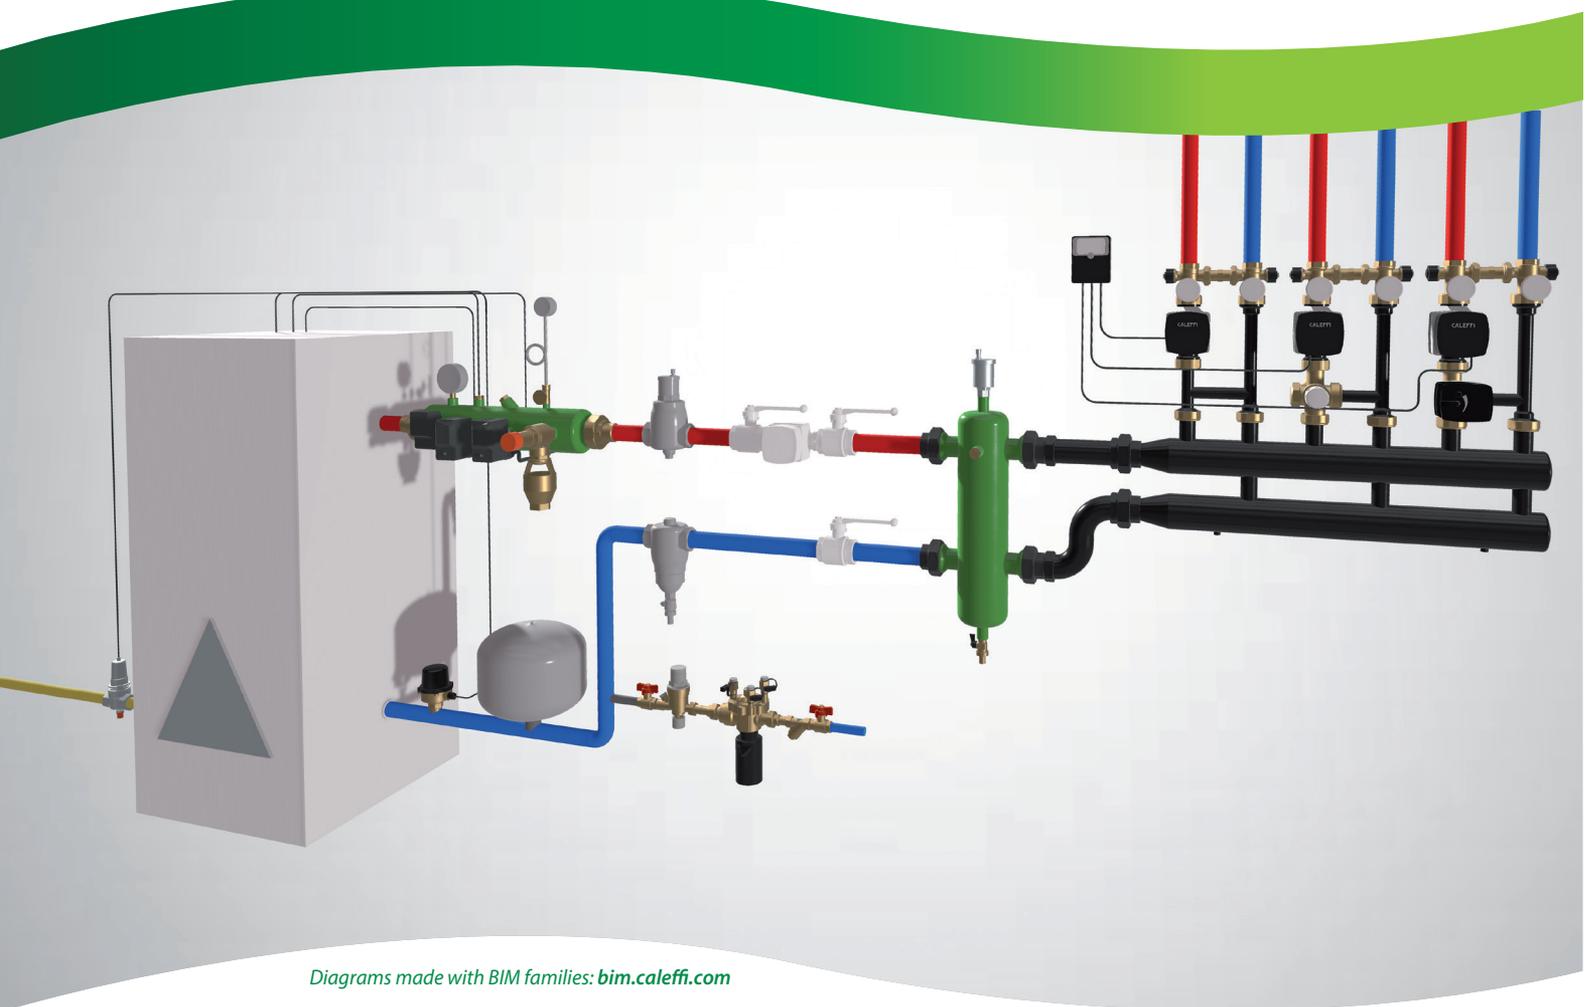

Caleffi Hydronic Solutions has been redesigning comfort with its HVAC and plumbing solutions for over 60 years.

More than **1000 people** are employed among the Headquarters, the production plants (all set up in Italy) and the foreign branches. Over 90 countries are reached by the brand and new investments are still to come in the near future.

SAFETY RELIEF VALVES

Standard safety relief valves

527 EST

Safety relief valve.
Settings: 2,25 - 2,5 - 3 - 3,5 - 4 - 4,5 - 5 - 5,4 - 6 bar.
Discharge overpressure: 10 %.
Closing differential: 20 %.

Medium temperature range: 5–110 °C
Nominal pressure: PN 10

Code	Connection	Drain connection	Pressure setting (bar)

552070	1 1/4" M	Ø 50	brass tundish	1	6

5520
Pre-formed special tundish.

Code	Connection		
552080	1 1/2" F	1	-

NF certified safety relief valves

311
Safety relief valve.
Discharge overpressure 20 %.
Closing differential: 15 %.
Certified to NF P 52-001 standard - Class 2.

Medium temperature range: 5-110 °C
Maximum discharge rating: 100 kW
Nominal pressure: PN 10

Code	Connection	Drain connection	Pressure setting (bar)		
311431	1/2" F	1/2" F	3	1	50

313
Safety relief valve.
Discharge overpressure: 20 %.
Closing differential: 15 %.
Certified to NF P 52-001 standard - Class 2.

Medium temperature range: 5-110 °C
Maximum discharge rating: 100 kW
Nominal pressure: PN 10

Code	Connection	Drain connection	Pressure setting (bar)		
313433	1/2" F	1/2" F	3	50	-

5121
Safety relief valve.
Discharge overpressure 20 %.
Closing differential 15 %.
Closing differential 15%.
Certified to NF P 52-001 - Class 2 standard.

Medium temperature range: 5-110 °C
Maximum discharge rating: 110 kW

Code	Connection	Pressure setting (bar)		
512131	1/2" F	3	1	-

TUV certified safety relief valves

5320

Safety relief valve.
Discharge overpressure: 20 %.
Closing differential: 20 %.

Medium temperature range: 5–120 °C
Maximum discharge rating: 50 kW
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions

Code	Connection	Drain connection	Pressure setting (bar)		
532042	1/2" F	3/4" F	2,5	1	50
532043	1/2" F	3/4" F	3	1	50

5321

Safety relief valve.
With pressure gauge.
Discharge overpressure: 20 %.
Closing differential: 20 %.

Medium temperature range: 5–120 °C
Maximum discharge rating: 50 kW
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions

Code	Connection	Drain connection	Pressure setting (bar)		
532142	1/2" F	3/4" F	2,5	1	50
532143	1/2" F	3/4" F	3	1	50

5322

Safety relief valve.
With pressure gauge connection.
Discharge overpressure: 20 %.
Closing differential: 20 %.

Medium temperature range: 5–90 °C
Maximum discharge rating: 50 kW
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions

Code	Connection	Drain connection	Pressure setting (bar)		
532242	1/2" F	3/4" F	2,5	1	50
532243	1/2" F	3/4" F	3	50	

5327

Safety relief valve.
Discharge overpressure: 20 %.
Closing differential: 20 %.

Medium temperature range: 5–120 °C
Maximum discharge rating: 50 kW
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions

Code	Connection	Drain connection	Pressure setting (bar)		
532742	1/2" M	3/4" F	2,5	1	
532743	1/2" M	3/4" F	3	1	

530

Safety relief valve.
Discharge overpressure: 20 %.
Closing differential: 20 %.

Medium temperature range: 5–120 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions

Code	Connection	Drain connection	Pressure setting (bar)		
530525	Rp 3/4" F	Rp 1" F	2,5	1	25
530530	Rp 3/4" F	Rp 1" F	3	1	25

530

Safety relief valve.
Settings: 4 - 5 - 6 - 7 - 8 - 9 bar without TUV certification.
Discharge overpressure: 20 %.
Closing differential: 20 %.

Medium temperature range: 5–120 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions

Temperature and pressure relief valves

309

Temperature and pressure relief valve. **For domestic water system, to protect the hot water storage**
Certified to EN 1490 with settings: 4 - 7 - 10 bar.

Temperature setting: 90 °C
Material: dezincification resistant brass DR

Code	Main connection	Drain connection	Pressure setting (bar)	Maximum discharge rating (kW)	Probe/cable length (mm)		
309430	1/2" M	Ø 15	3	10	100	1	20

309

Temperature and pressure relief valve. **For domestic water system, to protect the hot water storage.**
For systems with nominal pressure of 400 kPa.

Temperature setting: 95 °C
Pressure setting: 6 bar
Material: dezincification resistant brass DR

Code	Main connection	Drain connection	Probe/cable length (mm)	Maximum discharge rating (kW)		
309563	3/4" M	Ø 22	100	25	1	20

DIFFERENTIAL PRESSURE CONTROL DEVICES

Differential by-pass valve

519

Differential by-pass valve, adjustable with graduated scale.

Maximum working pressure: 10 bar
 Medium temperature range: 0–110 °C
 Medium: water, glycol solutions
 Maximum percentage of glycol: 30 %

Code	Inlet connection	Outlet connection	Setting range (m w.g.)		
519002	Ø 22	Ø 22	1–6	1	50
519500	3/4" F	3/4" M	1–6	1	50
519504	3/4" F	3/4" M	10–40	1	50

518012	Ø 22	Ø 22	3–10	1	25

CHECK VALVES

Standard check valves with shut-off

327 BALLSTOP

Ball valve with built-in check valve for heating systems.
 Low pressure drops.

Maximum working pressure: 16 bar
 Medium temperature range: 5–110 °C

Code	Connection	Notes		
327400	1/2" F	butterfly handle	10	-
327500	3/4" F	butterfly handle	10	-
327600	1" F	lever handle	4	-
327700	1 1/4" F	lever handle	4	-
327800	1 1/2" F	lever handle	2	-
327900	2" F	lever handle	1	-

510

Anti-thermosiphon check valve to prevent natural circulation of water.
 Straight or angled connections, by moving the cap.

Maximum working pressure: 10 bar
 Medium temperature range: 5–110 °C

Code	Connection		
510500	3/4" F	1	20
510600	1" F	1	20
510700	1 1/4" F	1	20

INSTRUMENT HOLDERS

Brass instrument holder

336

Assembled instrument holder for heating systems.
Complete with:
- air vent;
- safety relief valve;
- pressure gauge;
- automatic shut-off cock for expansion vessel.

Medium temperature range: 5–110 °C
Maximum discharge rating: 50 kW

Code	Connection	Notes	Pressure setting (bar)		
336630	3/4" F	with automatic shut-off cock	3	1	5
336631	3/4" F	with ball shut-off cock	3	1	5

302

Combined air separator with heating system accessories.
Complete with air vent, safety relief valve, pressure gauge.
With insulation.

Medium temperature range: 5–110 °C
Maximum discharge rating: 50 kW

Code	Connection	Notes	Pressure setting (bar)		
302630	1" F	without insulation	3	1	10
302631	1" F	-	3	1	10

336

Instrument holder for heating systems.
Complete with automatic shut-off cock for expansion vessel and male connection for safety valve 531 series.
Up to 50 kW.

Medium temperature range: 5–110 °C

Code	Connection	Notes	Pressure setting (bar)		
336600	3/4" F	with ball shut-off valve	2	2	10

Steel instrument holder

335

Assembled wall mounting manifold.
Complete with:
- automatic air vent;
- safety relief valve; pressure gauge;
- automatic shut-off cock for expansion vessel.

Medium temperature range: 5–110 °C
Material: steel

Code	Connection	Notes	Pressure setting (bar)		
335631	3/4" M	can be used up to 50 kW / with shut-off valve	5	-	-
335632	3/4" M	can be used up to 50 kW / with shut-off valve	1	5	-

Technopolymer instrument holder

305

Instrument holder kit in technopolymer material for heating systems.
Complete with:
- air vent;
- safety relief valve in technopolymer material;
- pressure gauge;
- automatic shut-off cock for expansion vessels and fixing brackets.
With insulation.

Medium temperature range: 5–90 °C
Maximum discharge rating: 50 kW

Code	Connection	Notes	Pressure setting (bar)		
305503	3/4" F	safety valve TÜV certified	3	1	10

305

Instrument holder in technopolymer material for heating systems.
Complete with:
- air vent;
- safety relief valve in technopolymer material;
- pressure gauge.
With insulation.

Medium temperature range: 5–90 °C
Maximum discharge rating: 50 kW

Code	Connection	Notes	Pressure setting (bar)		
305663	1" F	safety valve TÜV certified	3	1	5

305

Instrument holder in technopolymer material for heating systems.
Complete with:
- air vent in technopolymer material;
- safety relief valve;
- pressure gauge.
With insulation.

Medium temperature range: 5–90 °C
Maximum discharge rating: 50 kW
Material: technopolymer

Code	Connection	Notes	Pressure setting (bar)		
305671	1" F	-	1,8	1	5
305673	1" F	safety valve NF certified	3	1	5
305674	1" F	without insulation	4	1	5

FILLING UNITS

Standard filling units

553

Automatic filling unit, with manual cock, strainer, check valve.

Maximum upstream pressure: 16 bar
Medium temperature range: 5–70 °C
Adjustment pressure range: 0,3–4 bar

Code	Inlet connection	Outlet connection	Notes		
553040	1/2" M	1/2" F	with pressure gauge connection 1/4" F	1	10
553140	1/2" M	1/2" F	with pressure gauge	1	10

553

Pre-adjustable automatic filling unit, anti-scale, inspectionable, with pressure setting indicator, manual cock, strainer, check valve.

Maximum upstream pressure: 16 bar
Medium temperature range: 5–65 °C
Adjustment pressure range: 0,2–4 bar

Code	Inlet connection	Outlet connection	Notes		
553540	1/2" M	1/2" F	with pressure gauge connection 1/4" F	1	10
553640	1/2" M	1/2" F	with pressure gauge	1	10

553

Pre-adjustable automatic filling unit, anti-scale, inspectionable, with pressure setting indicator, manual cock, strainer, check valve. With hose connection.

Medium temperature range: 2–65 °C
Maximum upstream pressure: 16 bar
Adjustment pressure range: 0,2–4 bar

Code	Inlet connection	Outlet connection	Notes		
553740	Ø 15 hose connection	1/2" F	with pressure gauge connection 1/4"	1	10
553840	Ø 15 hose connection	1/2" F	with pressure gauge	1	10

554

Pre-adjustable automatic filling unit for high flow rates, with double shut-off valve, check valve.

Self-contained replaceable cartridge.

Maximum upstream pressure: 16 bar
Medium temperature range: 5–60 °C
Adjustment pressure range: 1–6 bar

Code	Connection	Notes		
554040	1/2" F	with pressure gauge connection 1/4" F	1	-
554140	1/2" F	with pressure gauge	1	-
554150	3/4" F	with pressure gauge	1	-

Boiler filling loop

3006 ROBOFIL

Boiler filling loop. Complete with:
- double check valve with shut-off valve;
- hose connection;
- shut-off valve.

Maximum working pressure: 10 bar
Medium temperature range: 2–95 °C
Length hose: 0,4 m
Material: dezincification resistant brass DR

Code		
300600	10	-

Charging unit with CA type backflow preventer

573

Automatic charging unit with **CAa type backflow preventer** and shut-off valve.
Backflow preventer certified to EN 14367 standard.

Maximum working pressure: 10 bar
Medium temperature range: 5–65 °C
Adjustment pressure range: 0,2–4 bar

Code	Connection
573001	1/2" F

574

Automatic charging unit with **BA type backflow preventer**, Y-strainer and shut-off valve.
Backflow preventer certified to EN 12729 standard.

Maximum working pressure: 10 bar
Medium temperature range: 5–65 °C
Adjustment pressure range: 0,2–4 bar

Code	Connection
574000	1/2" F

Charging unit with BA type backflow preventer

574

Compact automatic charging unit with **BA type backflow preventer**, shut-off valve and strainer.
With insulation.
Backflow preventer conforming to EN 12729.

Maximum working pressure: 10 bar
Medium temperature range: 2–65 °C
Adjustment pressure range: 0,2–4 bar

Code	Connection
574011	1/2" M

574

Automatic charging unit with **BA type backflow preventer**, Y-strainer and shut-off valve.
Backflow preventer certified to EN 12729 standard.

Maximum working pressure: 10 bar
Medium temperature range: 5–60 °C
Adjustment pressure range: 1–6 bar

Code	Connection
574001	3/4" F

Compact charging unit with BA type backflow preventer

580

Automatic compact charging unit to EN 1717 standard with **BA type backflow preventer**, shut-off valve, strainer, pressure test ports for controlling the backflow preventer, pressure reducing valve. For horizontal or vertical installations. **With insulation.** Backflow preventer certified to EN 12729 standard. Pressure reducing valve certified to EN 1567 standard. PATENT

Maximum working pressure: 10 bar
Medium temperature range: 5–65 °C
Adjustment pressure range: 0,8–4 bar
Material: brass

Code	Connection		
580011	1/2" M	1	6

580

Automatic compact charging unit to EN 1717 standard with **BA type backflow preventer**, shut-off valve, strainer, pressure test ports for controlling the backflow preventer, pressure reducing valve. For horizontal or vertical installations. **With insulation.** Backflow preventer conforming to EN 12729. Pressure reducing valve certified to EN 1567 standard.

Maximum working pressure: 10 bar
Medium temperature range: 2–65 °C
Material: dezincification resistant brass DR
Adjustment pressure range: 0,8–4 bar

Code	Connection		
580010	1/2" M	1	5

Backflow prevention reference standards. To avoid water backflow from the heating system, which is polluted and hazardous for human health, it is indispensable to install an automatic charging unit with a backflow preventer. The correct use of hydraulic backflow preventers is governed by the European reference standard EN 1717 ("Protection against pollution of potable water in water installations and general requirements of devices to prevent pollution by backflow").

ACCESSORIES FOR EXPANSION VESSELS

Shut-off cocks for expansion vessels

558

Automatic shut-off cock, for expansion vessels. **For domestic water circuit.**

Maximum working pressure: 10 bar
Medium temperature range: 5–110 °C

Code	Inlet connection	Outlet connection		
558500	3/4" F	3/4" M	1	50

558

Automatic shut-off cock, for expansion vessel, with drain cock. **For domestic water circuit.**

Maximum working pressure: 6 bar
Medium temperature range: 5–85 °C

Code	Inlet connection	Outlet connection		
558510	3/4" F	3/4" M	1	50

5580

Ball shut-off valve, for expansion vessels, with drain cock. **For domestic water system.**

Maximum working pressure: 6 bar
Medium temperature range: 5–85 °C

Code	Connection		
558050	3/4" F	1	20
558060	1" F	1	20
558070	1 1/4" F	1	20

5580

Ball shut-off valve for expansion vessels, with drain cock. **For solar thermal systems.**

Maximum working pressure: 6 bar
Medium temperature range: 5–120 °C
Medium: water, glycol solutions
Maximum percentage of glycol: 50 %

Code	Connection		
558052	3/4" F	1	20
558062	1" F	1	20

CONTROL DEVICES AND ACCESSORIES

Air separators

547

Air separator.

Material: cast iron

Code	Connection		
547060	1" F	1	-
547070	1 1/4" F	1	-
547080	1 1/2" F	1	-
547090	2" F	1	-
547200	2 1/2" F	1	-
547300	3" F	1	-

547

Air separator.

To be coupled with flat counterflanges EN 1092-1.

Material: steel
Finish: coated

Code	Connection		
547400	DN 100 - PN 16	1	-
547500	DN 125 - PN 16	1	-

Pressure and float switch

625

Safety pressure switch, with manual reset.

Maximum working pressure: 5 bar
Medium temperature range: 20–110 °C
Ambient temperature range: 0–50 °C
Protection class: IP 44
Contact rating (250 V): 16 (10) A

Code	Connection	Adjustment pressure range (bar)		
625000	1/4" F	2–4,5	1	10

625

Pressure switch for boosting sets and domestic water applications.

Medium temperature range: 0–55 °C
Ambient temperature range: 0–55 °C
Protection class: IP 44
Contact rating (up to 500V tripart): 16 (10) A

Code	Connection	Maximum working pressure (bar)	Adjustment pressure range (bar)		
625010	1/4" F	12	3–12	1	10
625005	1/4" F	5	1–5	1	10

625

Minimum pressure safety switch, with manual reset.

Maximum working pressure: 5 bar
Medium temperature range: 20–110 °C
Ambient temperature range: 0–50 °C
Protection class: IP 44
Contact rating (250 V): 16 (10) A

Code	Connection	Adjustment pressure range (bar)		
625100	1/4" F	0,5–1,7	1	10

613

Float switch, 250 V 10 A.
Approved for heavy commissioning.

Code	Probe/cable length (m)		
613030	3	1	5
613050	5	1	5

Thermostats

621

Adjustable contact thermostat.

Adjustment temperature range: 20–90 °C
Protection class: IP 20

Code			
621000		1	10

622

Adjustable immersion thermostat.

Adjustment temperature range: 0–90 °C
Protection class: IP 40

Code	Pocket connection		
622000	1/2" M	1	10

623

Double immersion thermostat.
Safety thermostat with manual reset:
- setting 96 °C (±3 °C);
- setting 110 °C (+0 °C -6 °C).
Adjustment thermostat:
- temperature range: 0–90 °C;
- temperature range: 0–100 °C.
With 1/2" connection pocket.

Protection class: IP 40

Code	Pocket connection	Adjustment temperature (°C)	Double thermostat safety setting (°C)		
623000	1/2" MNPT	0–90	100	1	5
623100	1/2" M	0–100	110	1	5

624

Immersion safety thermostat, with manual reset.
Setting:
96 °C (±3 °C);
110 °C (+0 °C -6 °C).
With 1/2" connection pocket.

Protection class: IP 40

Code	Pocket connection	Taratura di sicurezza (°C)		
624000	1/2" MNPT	96	1	10
624100	1/2" M	110	1	10

622

Stainless steel pocket for domestic application.
For thermostat code 622000.

Maximum working pressure: 10 bar
Medium temperature range: 0–100 °C

Code	Connection	Article use		
622010	1/2" M	622000	1	-

622

Pocket.
For 622 and 624 series.

Code	Article use		
622401	622000, 624000, 624100	100	

623

Pocket.
For 623 series.

Code	Article use		
623002	623000, 623100	100	

Flow switches

315

Flow switch with magnetically operated contacts.

Maximum working pressure: 6 bar
Medium temperature range: -15–100 °C
Contact rating (230 V): 0,02 A

Code	Connection	Contact opening (decreasing flow) (l/h)	Contact closing (increasing flow) (l/h)		
315400	1/2" M	108	156	30	-
315500	3/4" M	348	456	30	-

An appropriate relais must be used in case of higher power consumption 0,02 A.

626

Flow switch.
For pipes from 1" to 8".

Maximum working pressure: 10 bar
Medium temperature range: -30-120 °C
Protection class: IP 54
Contact rating (250 V): 15 (5) A

Code	Connection		
626600	1" M	1	5

626

Set of blades.

Code	Article use		
626009	626600	1	-

Pressure gauges

557

Pressure gauge.

Accuracy class: Pressure gauge UNI 2,5
Medium temperature range: -20-90 °C

Code	Connection	Pressure gauge scale (bar)	Ø (mm)		
557104	1/4" M central back conn.	0-4	50	1	20
557106	1/4" M central back conn.	0-6	50	1	20
557204	1/4" M "off-centred" back conn.	0-4	50	1	20
557304	1/4" M radial connection	0-4	50	1	20
557306	1/4" M radial connection	0-6	50	1	20
557310	1/4" M radial connection	0-10	50	1	20
557410	1/4" M central back conn.	0-10	63	1	20
557425	1/4" M central back conn.	0-25	63	1	20
557704	3/8" M radial connection	0-4	80	1	50
557706	3/8" M radial connection	0-6	80	1	50
557710	3/8" M radial connection	0-10	80	1	50

5560

Pressure gauge for expansion vessel pressure test.

Accuracy class: Pressure gauge UNI 2,5

Code	Pressure gauge scale (bar)		
556000	0-10	1	10

689

Flow gauge.

Accuracy class: Pressure gauge UNI 2,5
Ø: 80 mm
Medium temperature range: -20-90 °C

Code	Connection	Flow gauge scale (m w.g.)		
689010	3/8" M radial connection	0-10	1	20
689016	3/8" M radial connection	0-16	1	20
689025	3/8" M radial connection	0-25	1	30

Temperature gauges

692

Thermometer in sleeve.

Temperature gauge scale: 0-120 °C
Length pocket: 45 mm
Medium temperature range: 0-120 °C

Code	Connection		
692000	1/2" M	1	-

693

Bulb thermometer.

Temperature gauge scale: 0-120 °C
Medium temperature range: 0-120 °C

Code			
693000		1	-

687

Temperature gauge for cooling.
With pocket.

Temperature gauge scale: -30-50 °C
Accuracy class: Temperature gauge UNI 2
Ø: 80 mm
Medium temperature range: -30-50 °C

Code	Connection	Length pocket (mm)		
687000	1/2" M central back conn.	45	1	10
687010	1/2" M central back conn.	100	1	5

687

Temperature gauge for cooling systems.
With pocket.

Temperature gauge scale: -30-50 °C
Accuracy class: Temperature gauge UNI 2
Ø: 80 mm
Medium temperature range: -30-50 °C

Code	Connection	Length pocket (mm)		
687110	1/2" M radial connection	100	1	10

688

Temperature gauge.
With pocket.

Temperature gauge scale: 0–120 °C
Accuracy class: Temperature gauge UNI 2
Ø: 80 mm
Medium temperature range: 0–120 °C

Code	Connection	Notes	Length pocket		
688000	1/2" M central back conn.	-	45 mm	1	10
688010	1/2" M central back conn.	-	100 mm	1	5
688011	1/2" M central back conn.	without pocket	-	1	5

688

Temperature gauge.
With pocket.

Temperature gauge scale: 0–120 °C
Accuracy class: Temperature gauge UNI 2
Ø: 80 mm
Medium temperature range: 0–120 °C

Code	Connection	Length pocket (mm)		
688100	1/2" M radial connection	45	1	10

Temperature/pressure gauges

503

Temperature/pressure gauge.
With shut-off pocket.

Temperature gauge scale: 0–120 °C
Accuracy class: Temperature gauge UNI 2,
Pressure gauge UNI 2,5
Ø: 80 mm

Code	Connection	Pressure gauge scale (bar)		
503040	1/2" M central back conn.	0–4	1	10
503060	1/2" M central back conn.	0–6	1	10

503

Temperature/pressure gauge.
With shut-off pocket.

Temperature gauge scale: 0–120 °C
Accuracy class: Pressure gauge UNI 2,5,
Temperature gauge UNI 2
Ø: 80 mm

Code	Connection	Pressure gauge scale (bar)		
503140	1/2" M radial connection	0–4	1	20
503160	1/2" M radial connection	0–6	1	20
503110	1/2" M radial connection	0–10	1	20

Accessories

538

Drain cock with hose connection and cap.

Maximum working pressure: 10 bar
Medium temperature range: 5–110 °C

Code	Connection		
538201	1/4" M	1	100
538400	1/2" M	1	100

538

Drain cock with hose connection and cap.
Complete with manual lever.

Maximum working pressure: 10 bar
Medium temperature range: 5–110 °C

Code	Connection		
538405	1/2" M	1	100

694

INAIL test pocket.

Code	Pocket connection	Length pocket (mm)		
694045	1/2" M	45	1	10
694100	1/2" M	100	1	10

690

Three way tap for INAIL master pressure gauge.
Conforms to INAIL standards (previously ISPEL).

Maximum working pressure: 15 bar
Medium temperature range: 5–90 °C

Code	Connection 1	Connection 2		
690200	1/4" M	1/4" F	5	50
690300	3/8" M	3/8" F	5	50
690400	1/2" M	1/2" F	5	50

691

Water hammer reducing loop.

Finish: chrome plated
Material: copper

Code	Connection 1	Connection 2		
691200	1/4" M	1/4" F	5	-
691300	3/8" M	3/8" F	5	-
691400	1/2" M	1/2" F	5	-

STRAINERS

Inspectable strainer with shut-off valve

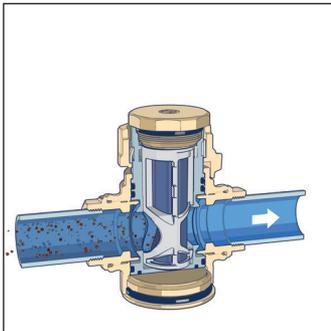

5771
FILTERSTOP

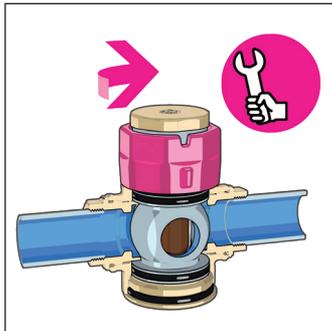

Inspectable strainer with shut-off function.
HEATING SYSTEMS APPLICATION:
 Maximum working pressure: 10 bar
 Medium temperature range: 0–90 °C
 Maximum percentage of glycol: 30 %
 Medium: water, glycol solutions
DOMESTIC WATER SYSTEMS APPLICATION:
 Maximum working pressure: 16 bar
 Medium temperature range: 5–40 °C
 PATENT PENDING

Code	Connection	Strainer mesh size Ø (mm)	Kv (m³/h)		
577105	3/4" F	0,16	7,2	1	12
577106	1" F	0,16	7,2	1	12

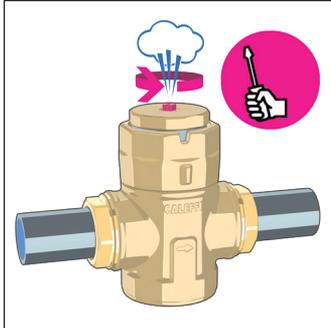

Operation

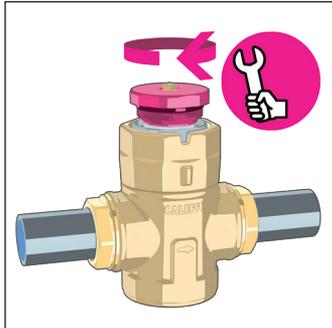

Shut-off

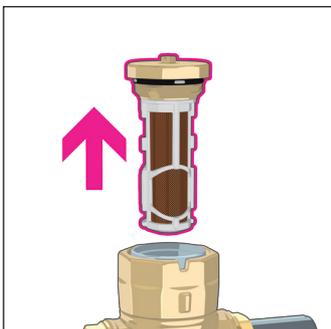

Discharge

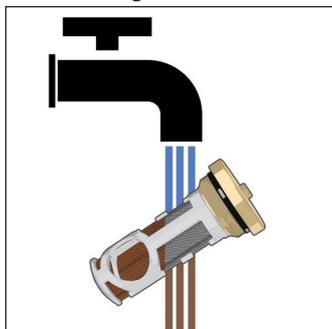

Cap removal

Mesh extraction

Mesh cleaning

Threaded strainers for domestic hot water/heating systems

577

Y-strainer.
 Filtering mesh in stainless steel AISI 304.

Medium temperature range: -20–110 °C
 Maximum percentage of glycol: 30 %
 Medium: water, glycol solutions
 Material: bronze

Code	Connection	Strainer mesh size Ø (mm)	Kv (m³/h)	PN

Flanged strainers for heating systems

579

Y strainer for heating systems.
 Ductile cast iron body, blue epoxy coating.
 With drain cock.
 Filtering mesh in stainless steel AISI 304.
 To be coupled with flat counterflanges EN 1092-1.

Maximum working pressure: 16 bar
 Medium temperature range: -10–110 °C
 Nominal pressure: PN 16
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions
 Material: cast iron

Code	Connection	Strainer mesh size Ø (mm)	Kv (m³/h)		
579051	DN 50 - PN 16	1	28	1	-

579251	DN 250 - PN 16	2	844	1	-

DN 125, DN 150, DN 200, DN 250 with rhomboidal reinforcing mesh.

More filters for plumbing systems on page 217

HYDRAULIC SEPARATORS

Standard hydraulic separator

548

Hydraulic separator.
Complete with:
- air vent with automatic shut-off cock;
- drain cock with hose connection.
With insulation.

Maximum working pressure: 10 bar
Medium temperature range: 0–110 °C
Material: steel
Finish: coated

Code	Connection	Max. recommended flow rate (m ³ /h)		
548006	1" F	2,5	1	-
548007	1 1/4" F	4	1	-
548008	1 1/2" F	6	1	-
548009	2" F	8,5	1	-

548

Hydraulic separator.
Temperature probe connection: 1/2" F.
To be coupled with flat counterflanges EN 1092-1.
Complete with:
- automatic air vent;
- shut-off valve;
- drain valve.
With insulation.

Maximum working pressure: 10 bar
Material: steel
Finish: coated

Code	Connection	Max. recommended flow rate (m ³ /h)	Medium temperature range (°C)		
548052	DN 50 - PN 16	9	0–105	1	-
548062	DN 65 - PN 16	18	0–105	1	-

548152	DN 150 - PN 16	110	0–100	1	-

548

Hydraulic separator.
Temperature probe connection: 1/2" F.
To be coupled with flat counterflanges EN 1092-1.
Complete with:
- automatic air vent;
- shut-off valve;
- drain valve.

Maximum working pressure: 10 bar
Medium temperature range: 0–110 °C
Material: steel
Finish: coated

Code	Connection	Max. recommended flow rate (m ³ /h)		
548200	DN 200 - PN 10	180	1	-
548250	DN 250 - PN 10	300	1	-
548300	DN 300 - PN 10	420	1	-

The hydraulic separator should be sized according to the maximum flow rate value at the inlet. The selected design value must be the greatest between the primary circuit and the secondary circuit.

Stainless steel hydraulic separator

548 NEW

Stainless steel hydraulic separator.
Complete with:
- air vent complete with automatic shut-off cock;
- drain cock.
With insulation.

Maximum working pressure: 6 bar
Medium temperature range: 5–80 °C
Material: stainless steel

Code	Connection	Max. recommended flow rate (m ³ /h)		
548006IN	1" F	2,5	1	
548007IN	1 1/4" F	4,5	1	
548008IN	1 1/2" F	6	1	
548009IN	2" F	10	1	

Multifunction hydraulic separator

5495
SEP4

Multifunction hydraulic separator.
Complete with:
- hydraulic separator;
- automatic air vent;
- dirt separator;
- magnetic ring;
- drain cock with hose connection.
With insulation.

Maximum working pressure: 10 bar
Medium temperature range: 0–100 °C
Material: steel
Finish: coated

Code	Connection	Max. recommended flow rate (m ³ /h)		
549506	1" F	2,5	1	-
549507	1 1/4" F	4	1	-
549508	1 1/2" F	6	1	-
549509	2" F	8,5	1	-

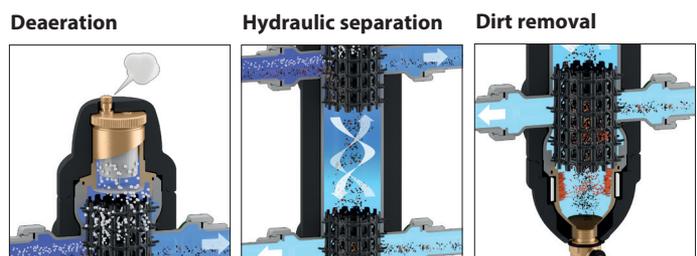

Function

The multifunction hydraulic separator combines different functional components, each of them to satisfy specific needs of heating and cooling system circuits.

It is supplied complete with hot pre-formed shell insulation to ensure perfect thermal insulation when used with both hot and chilled water.

The device is designed to carry out the following functions:

- **Hydraulic separation**
To keep connected hydraulic circuits totally independent from each other.
- **Deaeration**
Utilises the combined action of several physics principles: the widening of the cross section decreases the flow velocity and the technopolymer mesh creates whirling movements so as to facilitate the release of micro-bubbles. The bubbles, fusing with each other, increase in volume and, rising towards the top of the unit, are released through a float-operated automatic air vent.
- **Dirt separation**
The dirt separator separates and collects any impurities in the circuits as they collide with the surface of the internal element.
- **Removal of magnetic particles**
The special patented magnetic system also attracts ferromagnetic impurities in the water: the ferromagnetic particles are trapped in the collection zone, meaning they are prevented from being recirculated.

HYDRAULIC SEPARATORS-MANIFOLDS

SEPCOLL

559 SEPCOLL

Hydraulic separator-manifold for heating and cooling systems. 2 outlets. Complete with mounting brackets. **With insulation.**

Medium temperature range: 0-110 °C
Nominal pressure: PN 6
Material: steel
Main centre distance: 125 mm

Code	Main connection	Outlet connection		
559220	1" F	1 1/2" F - 2 out., captive nut	1	-

559 SEPCOLL

Hydraulic separator-manifold for heating and cooling systems. 2+1 outlets. Complete with mounting brackets. **With insulation.**

Medium temperature range: 0-110 °C
Nominal pressure: PN 6
Material: steel
Main centre distance: 125 mm

Code	Main connection	Outlet connection	Side connection		
559221	1" F	1 1/2" F - 2 out., captive nut	1" F - 1 out.	1	-

559 SEPCOLL

Hydraulic separator-manifold for heating and cooling systems. 2+2 outlets. Complete with mounting brackets. **With insulation.**

Medium temperature range: 0-110 °C
Nominal pressure: PN 6
Material: steel
Main centre distance: 125 mm

Code	Main connection	Outlet connection		
559222	1 1/4" F	1 1/2" F - 4 out., captive nut	1	-

559 SEPCOLL

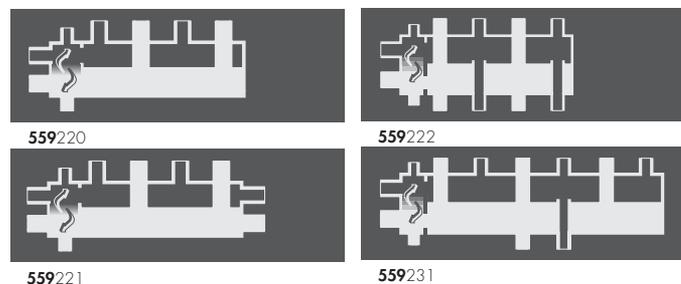

Hydraulic separator-manifold for heating and cooling systems. 3+1 outlets. Complete with mounting brackets. **With insulation.**

Medium temperature range: 0-110 °C
Nominal pressure: PN 6
Material: steel
Main centre distance: 125 mm

Code	Main connection	Outlet connection		
559231	1 1/4" F	1 1/2" F - 4 out., captive nut	1	-

DN 32

167

Motorised regulating unit **DN 32**, for **heating systems**. **Right - left convertible**. Available with three-point control signal actuator (note A) or 0(2)-10V control signal and 0-10V feedback signal (note B). Regulation with three-way sector valve. **With insulation**.

Maximum working pressure: 10 bar
Medium temperature range: 5-100 °C
Main centre distance: 125 mm
Type of pump: UPML 25-105

Code	System side connection	Boiler side connection	Notes	Electric supply	Flow rate avail. head 4 m w.g. (m³/h)		
167662HE2	1 1/4" F	1 1/2" M	A	230 V AC	3,7	1	-
167664HE2	1 1/4" F	1 1/2" M	B	24 V AC	3,7	1	-

167

Motorised regulating unit **DN 25**, for **heating and cooling systems**. **Right - left convertible**. Available with three-point control signal actuator (note A) or 0(2)-10V control signal and 0-10V feedback signal (note B). Regulation with three-way sector valve. **With insulation**.

Maximum working pressure: 10 bar
Medium temperature range: 5-100 °C
Main centre distance: 125 mm
Type of pump: Para 25-7

Code	System side connection	Boiler side connection	Notes	Electric supply	Flow rate avail. head 4 m w.g. (m³/h)		
167652HE3	1" F	1 1/2" M	A	230 V AC	1,4	1	-
167654HE3	1" F	1 1/2" M	B	24 V AC	1,4	1	-

167

Motorised regulating unit **DN 32**, for **heating and cooling systems**. **Right - left convertible**. Available with three-point control signal actuator (note A) or 0(2)-10V control signal and 0-10V feedback signal (note B). Regulation with three-way sector valve. **With insulation**.

Maximum working pressure: 10 bar
Medium temperature range: 5-100 °C
Main centre distance: 125 mm
Type of pump: Para 25-9

Code	System side connection	Boiler side connection	Notes	Electric supply	Flow rate avail. head 4 m w.g. (m³/h)		
167662HE4	1 1/4" F	1 1/2" M	A	230 V AC	2,2	1	-
167664HE4	1 1/4" F	1 1/2" M	B	24 V AC	2,2	1	-

Note A: three-point control signal actuator.
Operating time: 150 s.
Can be combined with regulators code 161010 and 1520 series.

Note B: 0(2)-10 V control signal actuator.
Feedback signal: 0-10 V.
Operating time: 75 s.
Can be combined with regulator code 161010 (for actuator electric supply use 230V / 24V transformer).

Three-way sector mixing valve, threaded.
For 167 series units.

Maximum working pressure: 10 bar
Medium temperature range: 5–110 °C
Nominal pressure: PN 10
Δp max.: 1 bar
Material: brass

Code	Article use	Kv (m ³ /h)		
F0001334	167652HE1, 167654HE1, 167652HE3, 167654HE3	6,3	1	-
F0001335	167662HE2, 167664HE2, 167662HE4, 167664HE4	10,0	1	-

6370

Actuator for sector mixing valve, **three-point control**.
For mixing valves codes 610 from 1/2" to 2" and for unit 167 series.
Actuator torque 5 N-m.

Ambient temperature range: 0–55 °C
Protection class: IP 44
Supply cable length: 1,5 m

Code	Article use	Electric supply	Opening-Closing time		
637042	167652HE1, 167662HE2, 167652HE3, 167662HE4	230 V AC	150 s (90° rot.)	1	-

6370

Actuator for sector mixing valve, **proportional control**.
For mixing valves codes 610 from 1/2" to 2" and for unit 167 series.
Actuator torque 5 N-m.

Ambient temperature range: 0–55 °C
Protection class: IP 44
Supply cable length: 1,5 m
Control signal: 0 (2)–10 V, 0 (4)–20 mA, 0–5 V, 5–10 V

Code	Article use	Electric supply	Opening-Closing time		
637044	167654HE1, 167664HE2, 167654HE3, 167664HE4	24 V AC	75 s (90° rot.)	1	-

Temperature regulators

161

Digital regulator with synoptic diagram **for heating and cooling**.
Complete with immersion flow probes with pocket and Pt1000 Ø 6 mm return probe (pocket to be chosen according to the pipe, see accessories).
Optional climatic probe.

Adjustment temperature range: 5–95 °C
Electric supply: 230 V AC
Protection class: IP 20
Probe/cable length: 1,5 m
Control signal: 3 point, 0–10 V

Code		
161010	1	-

3-point control 230 V AC.
0-10 V control 24 V AC with separate power supply.

1520

Outside compensated digital temperature regulator, **only for heating**.
Complete with contact flow probe and outside probe.

Adjustment temperature range: 20–90 °C
Electric supply: 230 V AC
Protection class: IP 40
Control signal: 3 point

Code	Notes		
152001	1 channel	1	-
152002	2 channels	1	-
152003	3 channels	1	-

1520

Digital temperature controller **for heating and cooling**.
Complete with flow probe, outside probe and max. relative humidity probe.

Electric supply: 230 V AC
Running power consumption: 5,5 VA
Protection class: IP 40
Control signal: 3 point

Code	Notes		
152021	1 channel	1	-

Application diagrams of antifreeze valve 108 series

Buffer tank - hydraulic separator

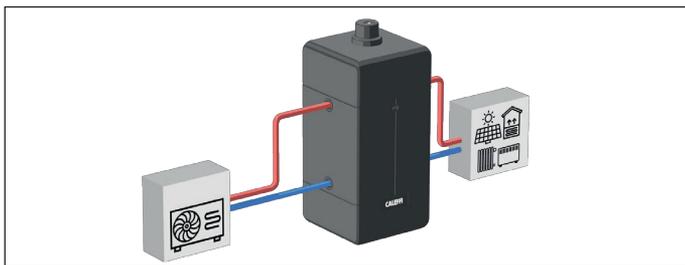

5485

Wall-mounted inertial hydraulic separator for heat pump systems. With insulation.

Maximum working pressure: 4 bar
Medium temperature range: -10-95 °C
Medium: water, glycol solutions
Maximum percentage of glycol: 30 %
Material: stainless steel

Code	Connection	Max. recommended flow rate (m³/h)	Volume (l)		
548515	1" F	3,5	15	1	-
548520	1" F	3,5	20	1	-
548525	1" F	3,5	25	1	-
548530	1" F	3,5	30	1	-
548550	1 1/4" F	5,5	50	1	-

Sizing

The hydraulic separator should be sized in accordance with the maximum recommended flow rate value at the inlet. The selected value should be the sum of the primary circuit flow rates or the sum of the secondary circuit flow rates, whichever is greater.

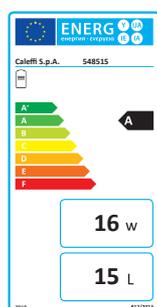

On the other hand, the inertial hydraulic separator volume depends on the minimum volume of water required by the heat pump manufacturer to guarantee proper machine operation even in defrosting phases. Generally, with more modern heat pumps, it can assume an average value calculated on the basis of the machine power, which varies from 2,5 to 3,5 litres/kWt.

Volume	Connections	Max flow rate	Nominal power HP
15 l	1"	3,5 m³/h	3-5 kWt
20 l	1"	3,5 m³/h	
25 l	1"	3,5 m³/h	6-8 kWt
30 l	1"	3,5 m³/h	9-12 kWt
50 l	1 1/4"	5,5 m³/h	13-25 kWt

Energy class

The 5485 series is designed for high energy efficiency.

Low losses ensure the buffer tank-hydraulic separator is in the best energy efficiency classes.

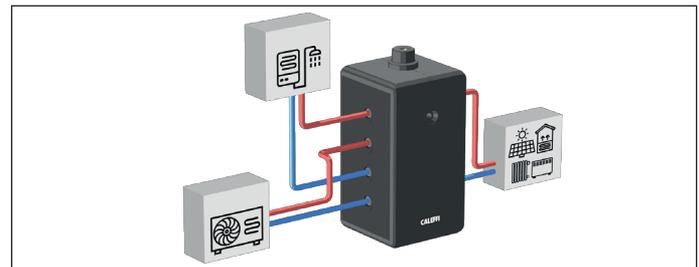

5485

Wall-mounted inertial hydraulic separator for hybrid systems. With insulation.

Maximum working pressure: 4 bar
Medium temperature range: -10-95 °C
Medium: water, glycol solutions
Maximum percentage of glycol: 30 %
Material: stainless steel

Code	Connection	Volume (l)		
548551	1 1/4" F	50	1	-

Reg. UE N. 812/2013 All. IV.2.1

Code	Pressure gauge scale (bar)	Ø (mm)		
F0002253	0–4	50	1	-

Application diagram CALEFFI HED

Technopolymer instrument holder

305

Instrument holder in technopolymer material for heating systems.

Complete with:

- air vent;
- safety relief valve in technopolymer material;
- pressure gauge.

With insulation.

Medium temperature range: 5–90 °C
Maximum discharge rating: 50 kW

Code	Connection	Notes	Pressure setting (bar)		
305663	1" F	safety valve TÜV certified	3	1	5

305

Instrument holder kit in technopolymer material for heating systems.

Complete with:

- air vent;
- safety relief valve in technopolymer material;
- pressure gauge;
- automatic shut-off cock for expansion vessels and fixing brackets.

With insulation.

Medium temperature range: 5–90 °C
Maximum discharge rating: 50 kW

Code	Connection	Notes	Pressure setting (bar)		
305503	3/4" F	safety valve TÜV certified	3	1	10

305

Instrument holder in technopolymer material for heating systems.

Complete with:

- air vent in technopolymer material;
- safety relief valve;
- pressure gauge.

With insulation.

Medium temperature range: 5–90 °C
Maximum discharge rating: 50 kW
Material: technopolymer

Application diagram for differential by-pass valve

Changeover and distribution unit radiant panel / fan-coil system

664

Changeover and distribution unit pre-assembled in box for radiant panel/ fan-coil systems.

Complete with:

- distribution manifold for radiant panel systems with flow meters and shut-off valves, insulated,
- distribution manifold for fan-coil systems with lockshield valves for preset flow rate and shut-off valves, insulated,
- three-way diverter valve with three-point control, complete with insulation and anti-condensation spacer,
- check valve kit,
- box with adjustable depth 110 - 140 mm.

With insulation.

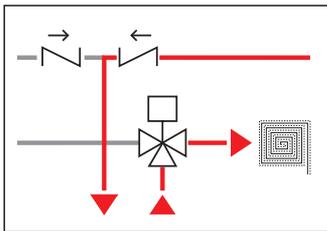

Maximum working pressure: 6 bar

Medium temperature range: 5-60 °C

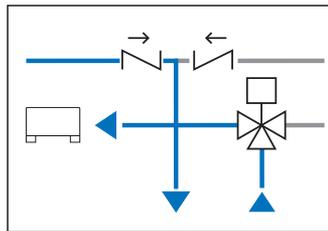

Electric supply: 230 V AC

Outlet centre distance: 50 mm

AIR AND DIRT IN HEATING AND COOLING SYSTEMS

Problems linked to the presence of dirt

The impurities contained in the water of the hydronic circuits can cause a series of problems that should not be underestimated.

Corrosion due to differential aeration

This is due to the fact that, in the presence of water, a layer of scale on a metal surface leads to the formation of two zones (water/impurities and impurities/metal) with a different oxygen content; for this reason, localised batteries are activated with current flows that lead to corrosion of the metal surfaces.

Irregular operation of the valves

This is due to impurities, which can adhere stubbornly to the valve seats and cause deformities in regulation and leaks, for example in balancing valves.

Pumps blocking and seizing

These problems may be suspended particles circulating through the pumps which can build up inside them, due to both the particular geometry of the pumps and to the effect of the magnetic fields generated by the pumps themselves.

Lower efficiency of the heat exchangers

Deposits and scale build-up can significantly reduce both the flow rates of the fluids and the heat exchanging surfaces.

Problems linked to the presence of air

The problems caused by air contained in hydronic systems can be serious and unpleasant both for the users and for the professionals who service the system. If these problems are not analysed thoroughly, they can often lead to solutions that are not decisive in the long term. Initially it is very important to identify the phenomena that the air in the system can provoke.

Noise in the pipes and in the terminals

The air contained in the system makes noise in the pipes and the adjustment devices. This is much more evident during system startup, i.e. when the flow begins to flow through the pipes.

Insufficient flow rates, complete circulation blockages and insufficient heat exchange between the emission terminals and the room

Circulation can be partially or totally blocked by air bubbles present in some points in the system. This phenomenon is particularly serious for radiant panel systems, but can also cause thermal imbalances and lower radiator or fan coil efficiency.

Corrosion of the system

This is provoked by the oxygen present in the air and can lead to the weakening but also the breakage of components such as pipes, radiators and boiler heat exchangers.

Cavitation

This may compromise durability and operation, especially of the pumps and regulating valves.

Operating principle DIRTMAGPRO

The impurities circulating within the closed circuits of systems, consisting of some sand and dirt particles but mostly ferrous material such as magnetite, are collected in a large collection chamber that does not require frequent cleaning.

The ferrous impurities are captured by the removable magnetic ring and the four magnets positioned in the centre of the flow. These magnets allow greater velocity of the medium, up to 1.6 m/s and, as a result, help to achieve a higher flow rate. Made using a technopolymer material specifically designed for use in air-conditioning systems, this dirt separator is especially versatile as it can be installed on both horizontal and vertical pipes.

Brass dirt separators with magnet

z

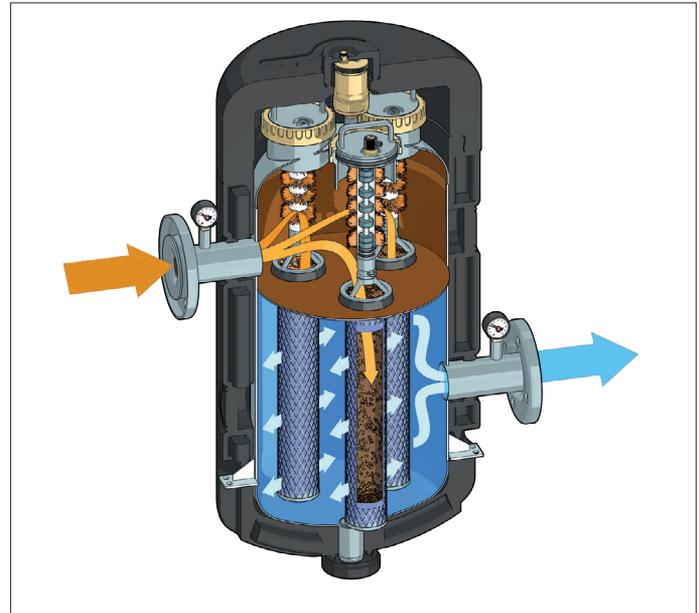

Characteristic components

1. Stainless steel body
2. Stainless steel strainer element
3. Magnet
4. Separator disc
5. Insulation

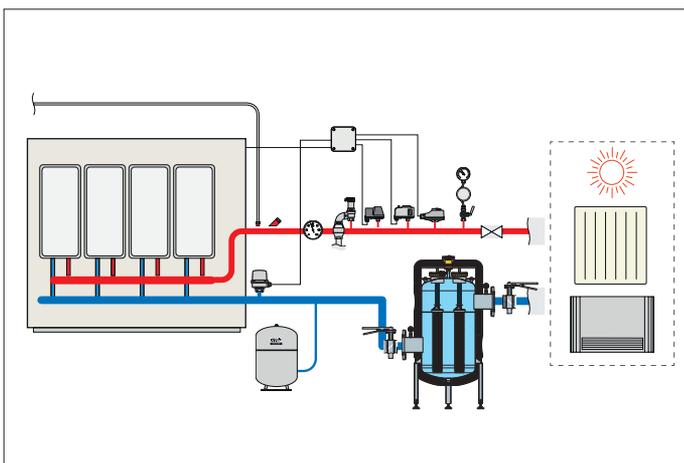

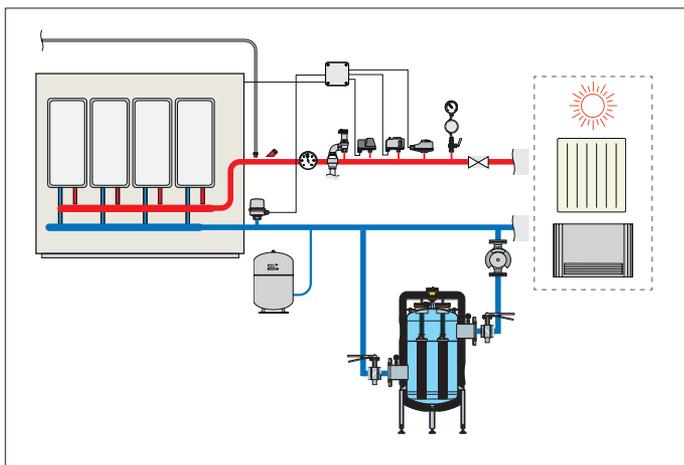

Operating principle

The water enters the device and passes through the zone in which magnetic impurities are captured and the strainer element, which retain the impurities by mechanically selecting the particles according to their size. The large surface area of the strainer meshes, with a mesh size of 100 µm, helps to maintain excellent hydraulic characteristics in spite of the high degree of separation.

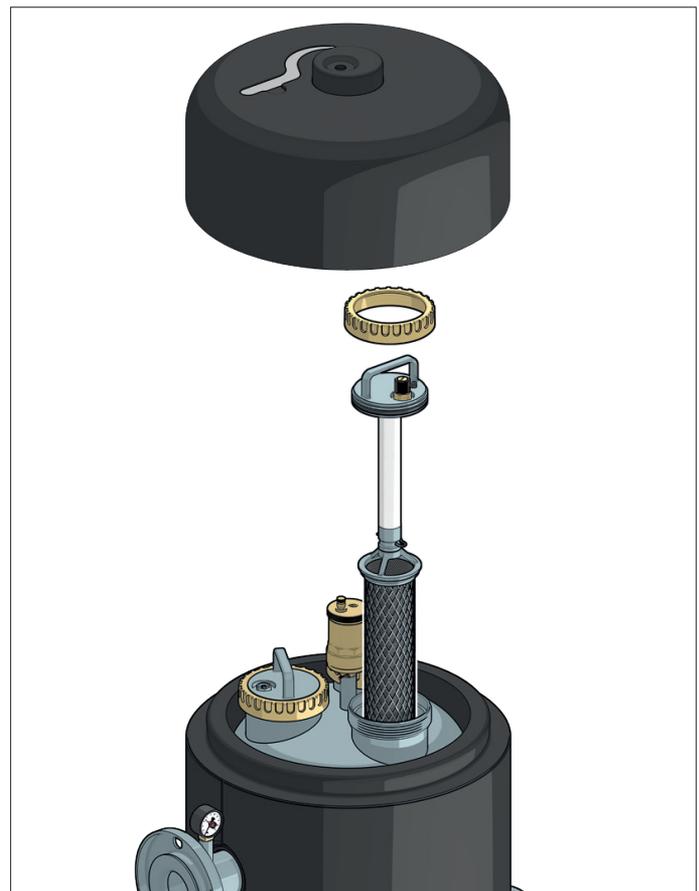

Application diagrams

Strainer

The device can be maintained and cleaned by removing and washing the strainer elements, without it being necessary to empty the main body. The fact that there are several small strainer elements also means that this procedure can be carried out by one person on their own.

Automatic shut-off cock

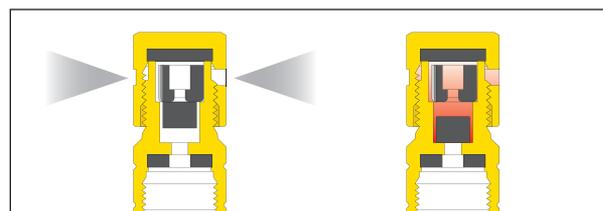

This facilitates maintenance operations by inhibiting the flow of water when the valve is deactivated, and makes it easier to make sure the air vent device is working.

Anti-suction valve

Installed on the air vent line, it functions as a check valve: it only allows air to be released.

In a situation where the system experiences negative pressure, the internal element closes off the outlet channel to prevent unwanted air from entering.

Deaerators-Dirt separators

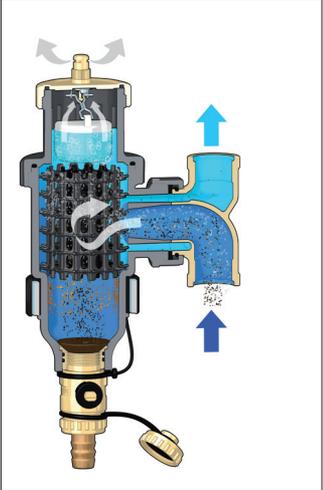

These are made by assembling, in a single product, a deaerator and a dirt separator. A single product can therefore be used both to separate air and to separate the impurities present in the system water.

Operating principle

The device makes use of the combined action of the deaerator and the dirt separator. The internal element creates swirling movements that facilitate the release of micro-bubbles and the subsequent creation of bubbles that then rise to the top of the device, from which they are evacuated by means of an automatic air vent with float. Moreover, the impurities in the water, striking against the surfaces of the internal element, are separated and fall to the bottom of the valve body.

Deaerators-dirt separators fitted with a magnet offer greater efficiency in the separation and collection of ferrous impurities. The impurities are captured inside the dirt separator body by the strong magnetic field created by the magnets inserted in the special outer ring.

With respect to the solutions that call for the installation of separate deaerators and dirt separators, the deaerators-dirt separators present the following advantages: they take up less space and require a smaller number of connections, and are therefore ideal for systems where it is not possible to install the two separate components. Nevertheless, two separate devices will always guarantee a higher performance level.

Sizing

Sizing a deaerator-dirt separator mainly depends on the speed at which the medium flows through the device, since an excessive speed would not allow correct separation of air and impurities.

As is known, the medium flow speed depends on the flow rate and the cross section. Remaining within the speed limits therefore means not exceeding certain **maximum** permissible **flow rates** for each size.

546 DISCALDIRT®

Steel deaerator-dirt separator. Flanged connections.
1/2" F temperature probe connection.
Particle separation rating down to 5 µm.
To be coupled with flat counterflanges
EN 1092-1.
Complete with drain valve.

Maximum working pressure: 10 bar
Maximum air discharge pressure: 10 bar
Medium temperature range: 0–110 °C
Material: steel
Finish: coated

DEAERATORS-DIRT SEPARATORS

Polyphosphate dispenser

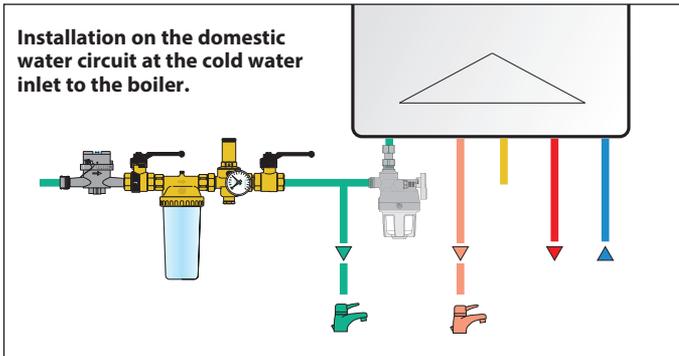

5459 NEW
CALEFFI XP MINI

Under-boiler polyphosphate dispenser. Comes with a polyphosphate crystal refill.
For domestic hot water circuit.
Average crystal shelf life: 17,5–20 m³ of domestic hot water (data refers to water with an average hardness level of 12 °f, pH 7 and temperature 20 °C).
Only use genuine refills code F0002572.
Average crystal refill shelf life: 17,5–20 m³ domestic hot water (data referring to water with an average hardness of 12°f, pH 7, temperature 20 °C and average domestic hot water usage).
Only use genuine refills code F0002572.
PATENT PENDING

Maximum working pressure: 6 bar
Medium temperature range: 5–30 °C
Ambient temperature range: 0–40 °C
Material: brass
Finish: chrome plated

Water treatment kit

KIT5459
Double X protection.
Package complete with:
- Under-boiler magnetic filter (545900 code);
- Under-boiler polyphosphate dispenser (545950 code).

Code		
KIT5459	1	-

Check current national regulations for polyphosphate water treatment.

DOMESTIC HOT WATER TREATMENT

Chemical additives

5709 C3 CLEANER

Removes sludge, limescale and debris.
Dose: **0,5 litres of product every 150 litres of water in the system.**

Code	Volume (l)		
570911	0,5	6	-

5709 C1 INHIBITOR

Protects against corrosion and limescale.
Dose: **0,5 litres of product every 150 litres of water in the system.**

Code	Volume (l)		
570912	0,5	6	-

5709 C7 BIOCIDES

Prevents bacterial and fungal growth.
Dose: **0,5 litres of product every 150 litres of water in the system.**

Code	Volume (l)		
570913	0,5	6	-

5709 C4 LEAK SEALER

Liquid sealer.
Dose: **0,5 litres of product every 150 litres of water in the system.**

Code	Volume (l)		
570914	0,5	6	-

5709 C3 FAST CLEANER

Removes sludge, limescale and debris.
Dose: **0,4 litres of product every 150 litres of water in the system.**

Code	Volume (l)		
570915	0,4	4	-
570916	0,4	4	-

C4 LEAK SEALER					●

Cleaning and washing treatments: pour into the system and leave to circulate for the required time. Then drain the system to eliminate the impurities collected in the dirt separator.

Protective treatments: use in the system and check once a year.

Treatment "as needed" for minor leaks. Leave in the system.

Compact water treatment units

580

Automatic water treatment unit for softening and demineralisation. Complete with:
 - positive displacement meter with built-in conductivity measuring cell;
 - by-pass regulator;
 - downstream ball shut-off valve;
 - drain cock and air vent.

With insulation.

Maximum working pressure: 4 bar
 Medium temperature range: 4-30 °C

Code	Connection
580020	1/2" M

1 -

Connection fitting with nut and gasket.

Code	Connection
F0001298	3/4" F

1 -

An automatic charging unit, if not already present, must be installed upstream of the treatment unit in order to keep the pressure below the maximum pressure value of the treatment cartridge.

To avoid water backflow from the heating system, which is polluted and hazardous for human health, it is indispensable to install an automatic charging unit with a backflow preventer. The correct use of hydraulic backflow preventers is governed by the European reference standard EN 1717 ("Protection against pollution of potable water in water installations and general requirements of devices to prevent pollution by backflow").

580

Automatic compact charging unit to EN 1717 standard with BA type backflow preventer, shut-off valve, strainer, pressure test ports for controlling the backflow preventer, pressure reducing valve. For horizontal or vertical installations.

With insulation.

Backflow preventer certified to EN 12729 standard.
 Pressure reducing valve certified to EN 1567 standard.
 PATENT

Maximum working pressure: 10 bar
 Medium temperature range: 5-65 °C

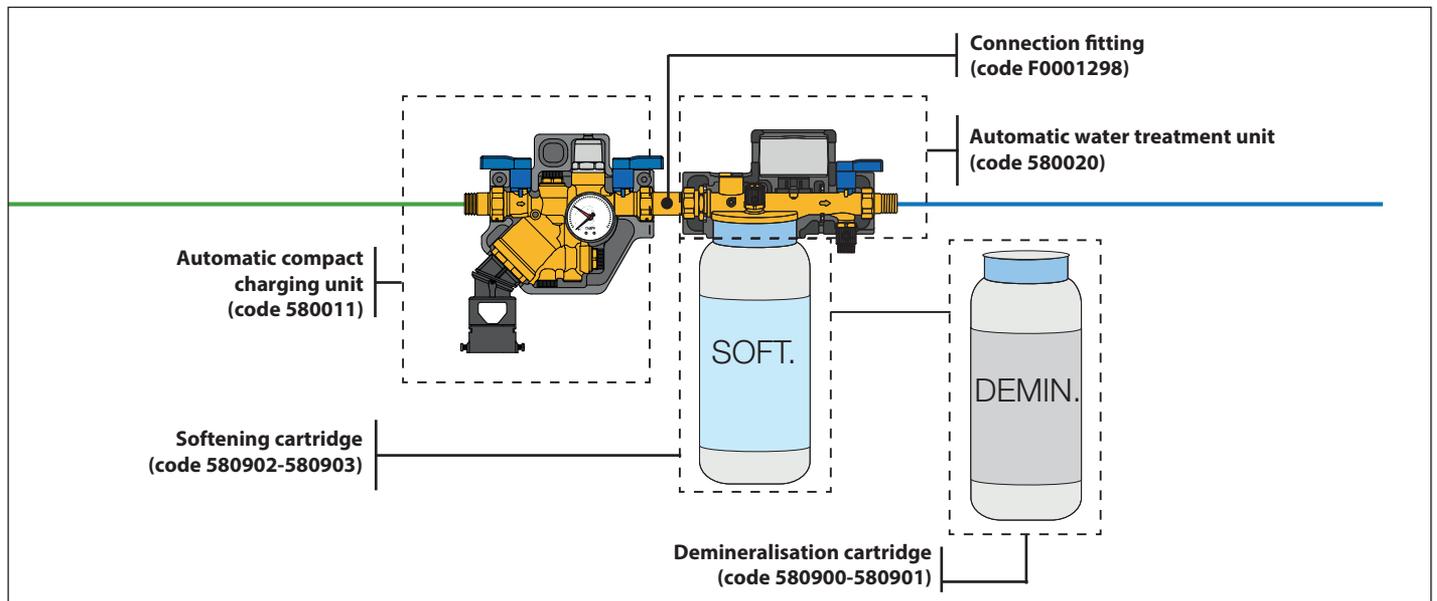

Adjustment pressure range: 0,8-4 bar

580900	Sizing coefficient: 140 (residual cond. < 10 µS/cm) 220 (residual cond. < 50 µS/cm)	2	1	-
	Sizing coefficient: 180 (residual cond. < 10 µS/cm) 280 (residual cond. < 50 µS/cm)			
580901	Sizing coefficient: 180 (residual cond. < 10 µS/cm) 280 (residual cond. < 50 µS/cm)	4	1	-

5750

Hardness measurement kit.
 Accuracy: 1 °f / 1 °dH.

Code		
575003	1	-

Softening cartridge sizing

The volume of treatable water depends on the hardness of the filling water and must be calculated as follows:

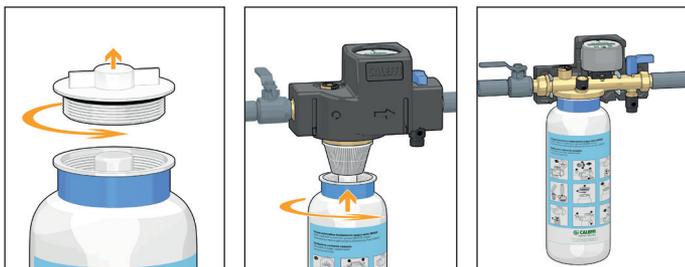

$$\text{Volume of treatable water (m}^3\text{)} = \frac{\text{Dimensioning coefficient}}{\text{hardness IN} - \text{hardness OUT}}$$

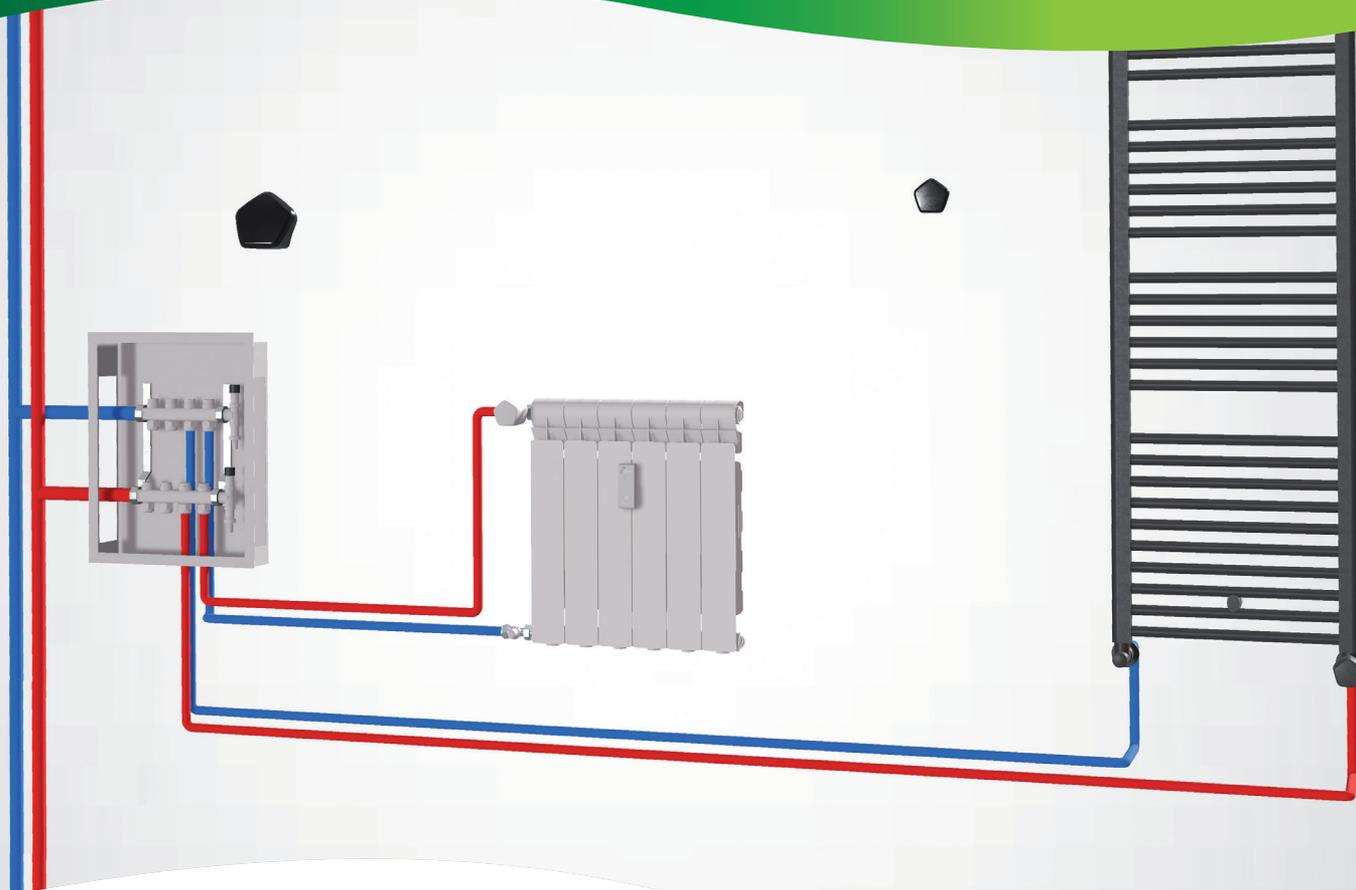

hardness IN = raw water hardness (°f/°dH)
 hardness OUT = treated water hardness (°f/°dH)

Demineralisation cartridge sizing

The volume of treatable water depends on the electrical conductivity of the filling water, and must be calculated as follows:

$$\text{Volume of treatable water (m}^3\text{)} = \frac{\text{Sizing coefficient}}{\text{Electrical conductivity (µS/cm)}}$$

422

Convertible radiator valve fitted for thermostatic control heads and thermo-electric actuators.
With pre-setting. Straight version.
 For steel pipes.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Finish: chrome plated
 Material: brass

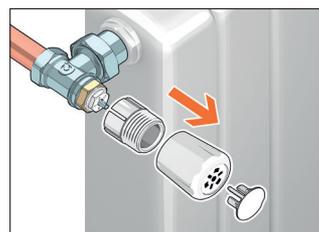

Code	Radiator connection	Pipe connection	Notes		
422302	3/8" M	3/8" F	-	10	50
422402	1/2" M	1/2" F	-	10	50
422500	3/4" M	3/4" F	without rubber seal	1	25

Pre-setting device

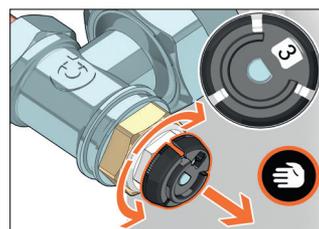

The convertible radiator valves are equipped with an internal device for pre-setting the head loss hydraulic characteristics. Each passage cross section determines a specific Kv value for the creation of the head loss, which corresponds to a setting position on a graduated scale.

Pre-setting device operation

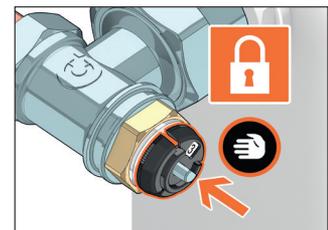

1- Remove the valve knob.

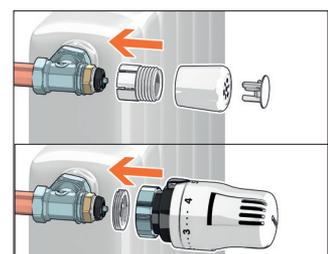

2- Lift the special control ring nut (supplied in package) of the pre-setting device and turn the control stem to select the required position on the graduated scale.

3- Lower the ring nut again.

4- Position the manual knob, thermostatic control head or thermo-electric actuator on the valve.

THERMOSTATIC VALVES

Thermostatic valves for copper pipes

222

Thermostatic radiator valve fitted for thermostatic and electronic control heads, thermo-electric actuators. Angled version. For copper, single and multilayer plastic pipes.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Material: brass
Finish: chrome plated

Code	Radiator connection	Pipe connection	Kvs (m ³ /h)

MANUAL RADIATOR VALVES

Radiator valves for copper pipes

340

Manual radiator valve. Angled version.
For copper, plastic and multilayer plastic pipes.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Material: brass
Finish: chrome plated

Code	Radiator connection	Pipe connection	Kv (m ³ /h)		
340302	3/8" M	23 p. 1,5	2,42	10	50

REMOTE THERMAL REGULATION SYSTEM (CALEFFI CODE®)

Remote thermal regulation system, white

215 **CALEFFI CODE®**

Comfort control
Wireless electronic control for thermostatic or convertible radiator valves. Operates through Gateway, Gateway PRO, app CALEFFI CODE® and front buttons. Built-in temperature sensor. Quick-coupling installation with adapter. Compatible with rechargeable batteries. REGISTERED DESIGN. Complete with 2 x 1,5 V AA batteries (included in pack).

Ambient temperature range: 0–55 °C
Electric supply: with battery (2 x 1,5V)
Protection class: IP 30
Finish: white
Transmission radio frequency: RF 868 MHz radio

Code
215510

1 20

215 **CALEFFI CODE®**

Gateway / Gateway PRO
Wireless multi-zone temperature regulation gateway, **PRO version with built-in GSM, UMTS, LTE modem.** Operation through the CALEFFI CODE® app (Wi-Fi or Ethernet and Bluetooth® connectivity required for installation). Quick functions: Auto - Eco - Holiday - Manual - OFF - Boost - Clean. Weekly programming. Programmable time bands, up to 8 per day. Programmable zones: up to 64. Compatible with OpenTherm® connectivity. Ecodesign Directive Class: IV-VIII Electric supply with USB type C power supply unit, 5 V (DC), 2 A, input 100–240 V, 0,5 A, 50/ 60 Hz, output 5 V, 2 A (EN/IEC 61558-2- 16). REGISTERED DESIGN.

Ambient temperature range: 0–40 °C
Protection class: IP 30
Contact rating (24 V): 1 A
Finish: white
Transmission radio frequency: Wi-Fi, RF 868 MHz radio, 2,4 GHz

REMOTE THERMAL REGULATION SYSTEM

The CALEFFI CODE® system guarantees more efficient management of the heating system, giving the user greater savings and the possibility of modifying the programming at any time and from anywhere according to actual needs. Suitable for managing an independent residence or a unit in an apartment block.

CALEFFI CODE® App

The system is configured and managed exclusively through the CALEFFI CODE® app for smartphones and tablets (Android® or iOS®) with available internet and Bluetooth® connections. The system can be controlled by two devices simultaneously, with the CALEFFI CODE® App installed on each device.

Ambient temperature Sensor/Sensor PRO is mandatory for application with Caleffi single-pipe valves.

CONVERTIBLE RADIATOR VALVES, CONTROL HEAD AND LOCKSHIELD VALVES HIGH-STYLE

Convertible radiator valves, white finish

4001

High-Style convertible radiator valves.
 Complete with:
 - angled-convertible radiator valve fitted for thermostatic and thermo-electric control heads;
 - angled lockshield valve;
 - two pipe-covering/ wall-covering shells and allen key.
 To be used with fittings 437, 447, 681 and 679 series.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Material: brass
 Finish: white

Code	Radiator connection	Pipe connection	Kv valve (m³/h)	Kv lockshield valve (m³/h)		
400101	1/2" M	23 p. 1,5	2,0	1,92	1	5

4003

High-Style convertible radiator valves and lockshield valves for designer radiators. Double-angled. **Right-hand version.**
 Complete with:
 - double-angled convertible radiator valve fitted for thermostatic and thermo-electric control heads;
 - lockshield valve, double-angled connections;
 - two pipe-covering/ wall-covering shells and allen key.
 To be used with fittings 437, 447, 681 and 679 series.

 Complete with:
 - double-angled convertible radiator valve fitted for thermostatic and thermo-electric control heads;
 - lockshield valve, double angled connections;
 - pipe-covering/wall-covering shell, connections: 50 mm centre distance.
 To be used with fittings 437, 447, 681 and 679 series.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Material: brass
 Finish: black

Code	Radiator connection	Pipe connection	Kv valve (m³/h)	Kv lockshield valve (m³/h)		
400413	1/2" M	23 p. 1,5	1,27	1,37	1	5

Example of HIGH-STYLE valve installation for designer heating systems with central connection, left-hand version, with electronic control.

Control head for convertible radiator valves, black finish

205

Thermostatic control head for designer heating system valves. Built-in sensor with liquid-filled element.
 Graduated scale from * to 5 corresponding to a temperature adjustment range from 7 °C to 28 °C.
 With adapter, tamper-proof cap and special key for tamper-proof cap.

Finish: black

Code		
205025	1	5

205

Thermostatic control head for designer heating systems valves. Built-in sensor with liquid-filled element.
 Graduated scale from * to 5 corresponding to a temperature adjustment range from 7 °C to 28 °C.
 With adapter.

Finish: black

Code		
205023	1	10

209

Tamper-proof anti-theft cap for use in public places.
 For thermostatic control heads 200 series.
 To be used with special allen key code 209001.

Finish: black

Code	Article use		
209020	205025	1	10

209

Special allen key for tamper-proof anti-theft cap.
 To be used with tamper-proof cap 209 series.

Code	Article use		
209001	205005, 205025, 200015	1	-

Convertible radiator valves, brushed metal finish

4001

High-Style convertible radiator valves.

Complete with:

- angled-convertible radiator valve fitted for thermostatic control head code 200015;
 - angled lockshield valve;
 - two pipe-covering/ wall-covering shells and allen key.
- To be used with fittings 437, 447, 681 and 679 series.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Material: brass
 Finish: brushed metal

Code	Radiator connection	Pipe connection	Kv valve (m³/h)	Kv lockshield valve (m³/h)		
400105	1/2" M	23 p. 1,5	2,0	1,92	1	5

4003

High-Style convertible radiator valves and lockshield valves for designer radiators. Double-angled. **Right-hand version.**

Complete with:

- double-angled convertible radiator valve fitted for thermostatic control head code 200015;
 - lockshield valve, double-angled connections;
 - two pipe-covering/wall-covering shells and allen key.
- To be used with fittings 437, 447, 681 and 679 series.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Material: brass
 Finish: brushed metal

Code	Radiator connection	Pipe connection	Kv valve (m³/h)	Kv lockshield valve (m³/h)		
400305	1/2" M	23 p. 1,5	1,27	1,37	1	5

4004

High-Style convertible radiator valves and lockshield valves for designer radiators. Double-angled. **Left-hand version.**

Complete with:

- double-angled convertible radiator valve fitted for thermostatic control head code 200015;
 - lockshield valve, double-angled connections;
 - two pipe-covering/wall-covering shells and allen key.
- To be used with fittings 437, 447, 681 and 679 series.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Material: brass
 Finish: brushed metal

Code	Radiator connection	Pipe connection	Kv valve (m³/h)	Kv lockshield valve (m³/h)

Convertible radiator valve and lockshield valve for heating systems

3380

Convertible radiator valve.
Complete with:
- convertible radiator valve fitted for thermo-electric actuators and thermostatic control heads;
- lockshield valve.
For copper, plastic and multi-layer plastic pipe.
Angled connections.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Material: brass
Finish: chrome plated

Code	Radiator connection	Pipe connection	Kv valve (m ³ /h)		
338040	1/2" M	23 p. 1,5	2,70	1	5

437

Mechanical fitting.
For soft annealed copper, hard copper and stainless steel pipes. Use with polished chrome plated High-Style valves.
With O-Ring seal.

Maximum working pressure: 10 bar
Medium temperature range: -25–120 °C
Material: brass
Finish: chrome plated

Code	Connection	Pipe diameter		
437112	23 p. 1,5	Ø 12	1	50

RADIATOR VALVES FOR ONE-PIPE AND TWO-PIPE SYSTEMS

Convertible radiator valves for one-pipe and two-pipe designer heating systems

4005

Convertible radiator valve fitted for thermostatic and electronic control heads, thermo-electric actuators. **Right-hand version.**
 Factory set for one-pipe systems, adjustable for two-pipe systems.
 For copper, single and multilayer plastic pipes.
 Flow rate to the radiator:
 - with manual control knob: 45 %;
 - with thermostatic control head (2K proportional band): 30 %.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Main centre distance: 40 mm
 Material: brass
 Finish: chrome plated
 Length probe: 40 cm

Code	Radiator connection	Pipe connection	Kv one-pipe (m³/h)	Kv two-pipe (m³/h)		
400510	1/2" M	23 p. 1,5	1,6	0,96	1	5

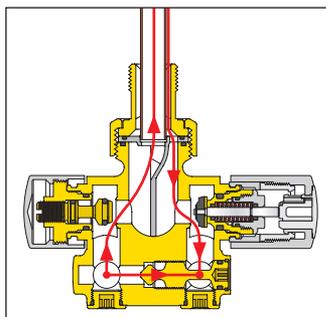

4005

Convertible radiator valve fitted for thermostatic and electronic control heads, thermo-electric actuators. **Left-hand version.**
 Factory set for one-pipe systems, adjustable for two-pipe systems.
 For copper, single and multilayer plastic pipes.
 Flow rate to the radiator:
 - with manual control knob: 45 %;
 - with thermostatic control head (2K proportional band): 30 %.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Main centre distance: 40 mm
 Material: brass
 Finish: chrome plated
 Length probe: 40 cm

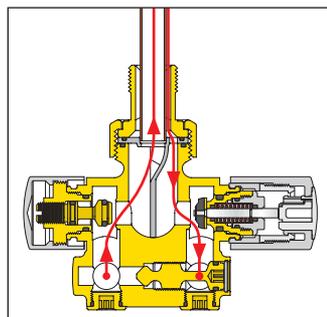

Code	Radiator connection	Pipe connection	Kv one-pipe (m³/h)	Kv two-pipe (m³/h)		
400520	1/2" M	23 p. 1,5	1,6	0,96	1	5

One-pipe application

Flow and return connections can be inverted by means of the rotation of the specific deflector.

Two-pipe application

Convertible radiator valves for one-pipe and two-pipe systems

455

Convertible radiator valve fitted for thermostatic control heads, electronic and thermo-electric actuators.
 For copper, simple plastic and multilayer plastic pipes.
 Factory set for one-pipe systems, adjustable for two-pipe systems.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Main centre distance: 40 mm
 Material: brass
 Finish: chrome plated
 Length probe: 30 cm

Code	Radiator connection	Pipe connection	Kv one-pipe (m³/h)	Kv two-pipe (m³/h)		
455400	1/2" M	23 p. 1,5	2,0	1,10	10	-

455601	1" M left	23 p. 1,5	2,0	1,10	10	-

Convertible radiator valves for one-pipe systems

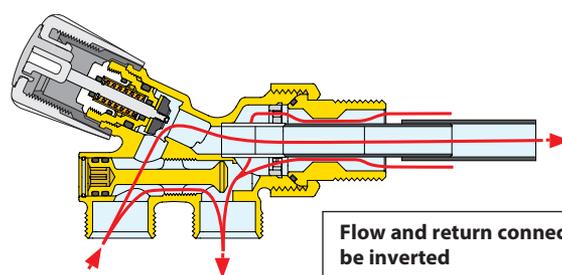

456

Convertible radiator valve fitted for thermostatic control heads, electronic and thermo-electric actuators.
 For copper, simple plastic and multilayer plastic pipes.
 Flow rate to the radiator:
 - with manual control knob: 27 %;
 - with thermostatic control head (proportional band 2K): 20 %.
 For one-pipe systems.
 PP probe.

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Main centre distance: 35 mm
 Length probe: 33 cm
 Material: brass
 Finish: chrome plated

Code	Radiator connection	Pipe connection		
456400	1/2" M	23 p. 1,5	10	-
456500	3/4" M	23 p. 1,5	10	-

Flow and return connections can be inverted

Manual valve for one-pipe systems

348

Radiator valve for one-pipe systems. With front adjusting handle.
Flow rate to the radiator: 100 %.
Without template and wall-covering plate.
For copper, plastic and multilayer plastic pipes.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Main centre distance: 40 mm
Length probe: 30 cm
Material: brass
Finish: chrome plated

Code	Radiator connection	Pipe connection	Kv (m ³ /h)		
348400	1/2" M	23 p. 1,5	3,10	10	-
348500	3/4" M	23 p. 1,5	3,50	10	-

328

Radiator valve for one-pipe systems. Complete with probe connection.
For outside probe Ø 15 mm (series 454). For copper, plastic and multilayer plastic pipes. Floor connections.
Flow rates to the radiator: 50%.
Wall connections.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Main centre distance: 40 mm
Material: brass
Finish: chrome plated

Code	Radiator connection	Pipe connection	Kv (m ³ /h)		
328400	1/2" M	23 p. 1,5	2,2	1	20

Manual valve for two-pipe systems

4501

Radiator valve for one-pipe systems. For copper, plastic and multilayer plastic pipes. Without template and wall-covering plate.
Flow rate to the radiator: 100 %.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Main centre distance: 40 mm
Length probe: 30 cm
Material: brass
Finish: chrome plated

Code	Radiator connection	Pipe connection	Kv (m ³ /h)		
450140	1/2" M	23 p. 1,5	3,20	10	-
450150	3/4" M	23 p. 1,5	3,70	10	-

452

Radiator valve for two-pipe systems. Complete with:
- template;
- wall-covering plate
- probe connection.
For outside probe Ø 15 mm (Series 454). For copper, plastic and multi-layer plastic pipes. Wall connections.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Main centre distance: 40 mm
Material: brass
Finish: chrome plated

Code	Radiator connection	Pipe connection	Kv (m ³ /h)		
452401	1/2" M	23 p. 1,5	1,8	1	25

452

Radiator valve for one-pipe systems. Complete with:
- template;
- wall-covering plate;
- probe connection.
For outside probe Ø 15 mm (454 Series). For copper, plastic and multilayer plastic pipes. Wall connections.
Flow rate to the radiator: 50 %.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Main centre distance: 40 mm
Material: brass
Finish: chrome plated

Code	Radiator connection	Pipe connection	Kv (m ³ /h)		
452400	1/2" M	23 p. 1,5	2,2	1	25

328

Radiator valve for two-pipe systems. Complete with probe connection.
For outside probe Ø 15 mm (series 454). For copper, plastic and multilayer plastic pipes. Floor connections.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Main centre distance: 40 mm
Material: brass
Finish: chrome plated

Code	Radiator connection	Pipe connection	Kv (m ³ /h)		
328401	1/2" M	23 p. 1,5	1,8	1	20

FITTINGS

Fittings - 23 p. 1.5 threaded connections

679 DARCAL

Fitting for multilayer plastic pipes for continuous high temperature use.

Maximum working pressure: 10 bar
Medium temperature range: 0–95 °C
Finish: chrome plated

Code	Connection	Pipe diameter	Notes		
679014	23 p. 1,5	Ø 14x2	-	10	100
679024	23 p. 1,5	Ø 16x2	-	10	100
679025	23 p. 1,5	Ø 16x2,25	-	10	100
679044	23 p. 1,5	Ø 18x2	-	10	100
679064	23 p. 1,5	Ø 20x2	with metal ring	10	100
679065	23 p. 1,5	Ø 20x2,25	with metal ring	10	100
679066	23 p. 1,5	Ø 20x2,5	with metal ring	10	100
679067	23 p. 1,5	Ø 20x2,9	with metal ring for REHAU pipe (see note *)	10	100

For a correct use, adjust the multilayer pipe diameter before installation using the Caleffi calibrator 679 series.

Note(*): For the use with REHAU pipes, use REHAU's calibrator.

681 DARCAL

Self-adjustable diameter fitting for single and multilayer plastic pipes.
Working temperature range 5–80°C (PE-X);
5–75°C (Multi-layer marked 95°C).

Maximum working pressure: 10 bar

Finish: chrome plated

Code	Connection	Pipe diameter		
681000	23 p. 1,5	Øint. 7,5–8, Øext. 12–14	10	100
681002	23 p. 1,5	Øint. 9–9,5, Øext. 14–16	10	100
681001	23 p. 1,5	Øint. 9,5–10, Øext. 12–14	10	100
681006	23 p. 1,5	Øint. 9,5–10, Øext. 14–16	10	100
681015	23 p. 1,5	Øint. 10,5–11, Øext. 14–16	10	100
681017	23 p. 1,5	Øint. 10,5–11, Øext. 16–18	10	100
681024	23 p. 1,5	Øint. 11,5–12, Øext. 14–16	10	100
681026	23 p. 1,5	Øint. 11,5–12, Øext. 16–18	10	100
681035	23 p. 1,5	Øint. 12,5–13, Øext. 16–18	10	100
681044	23 p. 1,5	Øint. 13,5–14, Øext. 16–18	10	100

Example: 681 series fitting selection

Known both the outside and inside diameters (ex.: 17 mm and 13 mm);
or known the outside diameter (ex.: Øo 17 mm) and the thickness (ex.: th. 2 mm) and considering that:

$$\text{Øoutside} - 2 \cdot \text{th.} = \text{Øinside}$$

$$17 - 2 \cdot 2 = 13 \text{ mm}$$

Look within the table for the code matching both diameters:

Code	Connection	Øinside	Øoutside
681035	23 p.1,5	12,5–13	16–18

437

Mechanical fitting.
For soft annealed copper, hard copper and stainless steel pipes.
With O-Ring seal.

Maximum working pressure: 10 bar
Medium temperature range: -25–120 °C
Finish: chrome plated

Code	Connection	Pipe diameter		
437010	23 p. 1,5	Ø 10	1	100
437012	23 p. 1,5	Ø 12	1	100

437016	23 p. 1,5	Ø 16	1	100

447

Mechanical fitting, monobloc.
For soft annealed copper, hard copper and stainless steel pipes.
With O-Ring seal.

Maximum working pressure: 10 bar
Medium temperature range: -25–120 °C
Finish: chrome plated

Code	Connection	Pipe diameter		
447010	23 p. 1,5	Ø 10	2	100

439016	23 p. 1,5	Ø 16	1	100

Fittings - 3/4" threaded connections

679 DARCAL

Fitting for multilayer plastic pipes for continuous high temperature use.

Maximum working pressure: 10 bar
Medium temperature range: 0–95 °C
Finish: chrome plated

Code	Connection	Pipe diameter		
679264	3/4" F	Ø 20x2	10	100
679265	3/4" F	Ø 20x2,25	10	100
679266	3/4" F	Ø 20x2,5	10	100

For a correct use, adjust the multilayer pipe diameter before installation using the Caleffi calibrator 679 series.

Calibrator 679 series page 107

681 DARCAL

Self-adjustable diameter fitting for single and multilayer plastic pipes.
Working temperature range 5–80°C (PE-X); 5–75°C (Multi-layer marked 95°C).

Maximum working pressure: 10 bar
Finish: chrome plated

Code	Connection	Pipe diameter		
681502	3/4" F	Øint. 7,5–8, Øext. 12–14	10	100
681500	3/4" F	Øint. 9–9,5, Øext. 14–16	10	100

ACCESSORIES FOR RADIATORS

Accessories for radiators

Adapter for installing thermostatic and thermo-electric actuator with valves 338, 339, 401, 402, 425, 426, 421, 422, 4001, 4003, 4004, 3380, 4005, 455 and 456 series.

Code	1	50
F36077	1	50

230
Kit for Δp measuring in the circuits with dynamic valves.

Code	1	-
230100	1	-

381
Telescopic union tailpiece with nut for radiator valves and lockshield valves.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Telescopic union extension: 15 mm
Finish: chrome plated

Code	Connection 1	Connection 2	1	10
381302	1/2" F captive nut	3/8" M	1	10

384041	23 p. 1,5 M	1/2" M	10	-

3871
Wrench for 26 and 30 mm hexagonal nuts.
For fittings 437, 447, 679, 680, 681 23 P.1,5 and 3/4" series.

Code	Notes	1	4
387100	26 mm x 30 mm	1	4

3871
Universal key.
Can be used for unions from 3/8" to 1"

Code	1	10
387127	1	10

4490
Knob for thermostatic radiator valves.
For valves 220, 221, 222, 223, 224, 225, 226, 227, 230, 231, 232, 233, 234 and 237 series.

Code	20	100
449010	20	100

Drain cock for radiators

560

Drain cock for radiators and wall-mounted boilers.
The 10-piece pack includes an extractor code 560000.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Finish: nickel plated

Code	Connection	Notes		
560421	1/2" M	drain cock	10	-
560000	-	extractor hose connection	25	-

SPARE PARTS FOR RADIATOR VALVES

Spare parts for radiator valves

3872

Replacement kit for radiator valves headwork.
Only for 3/8" and 1/2" valves.
Complete with 20 spare headworks (only for valves without pre-setting).
For valves 338, 339, 401, 402, 425, 426, 421, 422, 230, 231, 232, 233, 234, 237, 220, 221, 222, 223, 224, 225, 226, 227, 456 and 4005 series.

Code		
387201	1	4

3872

Adapting kit for headwork tool code 387200 to new headwork tool code 387201.

Code		
387211	1	4

VALVES FOR PANEL RADIATORS

Valves for panel radiators - double fitting

3010

Valve for panel radiators with built-in thermostatic valve unit.
Straight version.
One-pipe.
With adjustable by-pass.
With non-return device.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C

Code	Radiator connection	Pipe connection		
301043	1/2" M	3/4" M	1	25
301053	3/4" F	3/4" M	1	25

3013

Valve for panel radiators with built-in thermostatic valve unit.
Wall connections.
Angled version.
One-pipe.
With adjustable by-pass.
With non-return device.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C

Code	Radiator connection	Pipe connection		
301341	1/2" M	1/2" M	1	25
301350	3/4" M	3/4" F	1	25

Valves for panel radiators - single fitting

3011

Valve for panel radiators with built-in thermostatic valve unit.
Angled version.
One-pipe.
With adjustable by-pass.
With non-return device.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C

Code	Radiator connection	Pipe connection		
301143	1/2" M	3/4" M	1	25
301153	3/4" F	3/4" M	1	25

3015

Single valve for panel radiators with built-in thermostatic valve unit.
Wall connections.
Angled version.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C

Code	Radiator connection	Pipe connection		
301540	3/4" M	1/2" M	1	50
301550	3/4" M	3/4" F	1	50

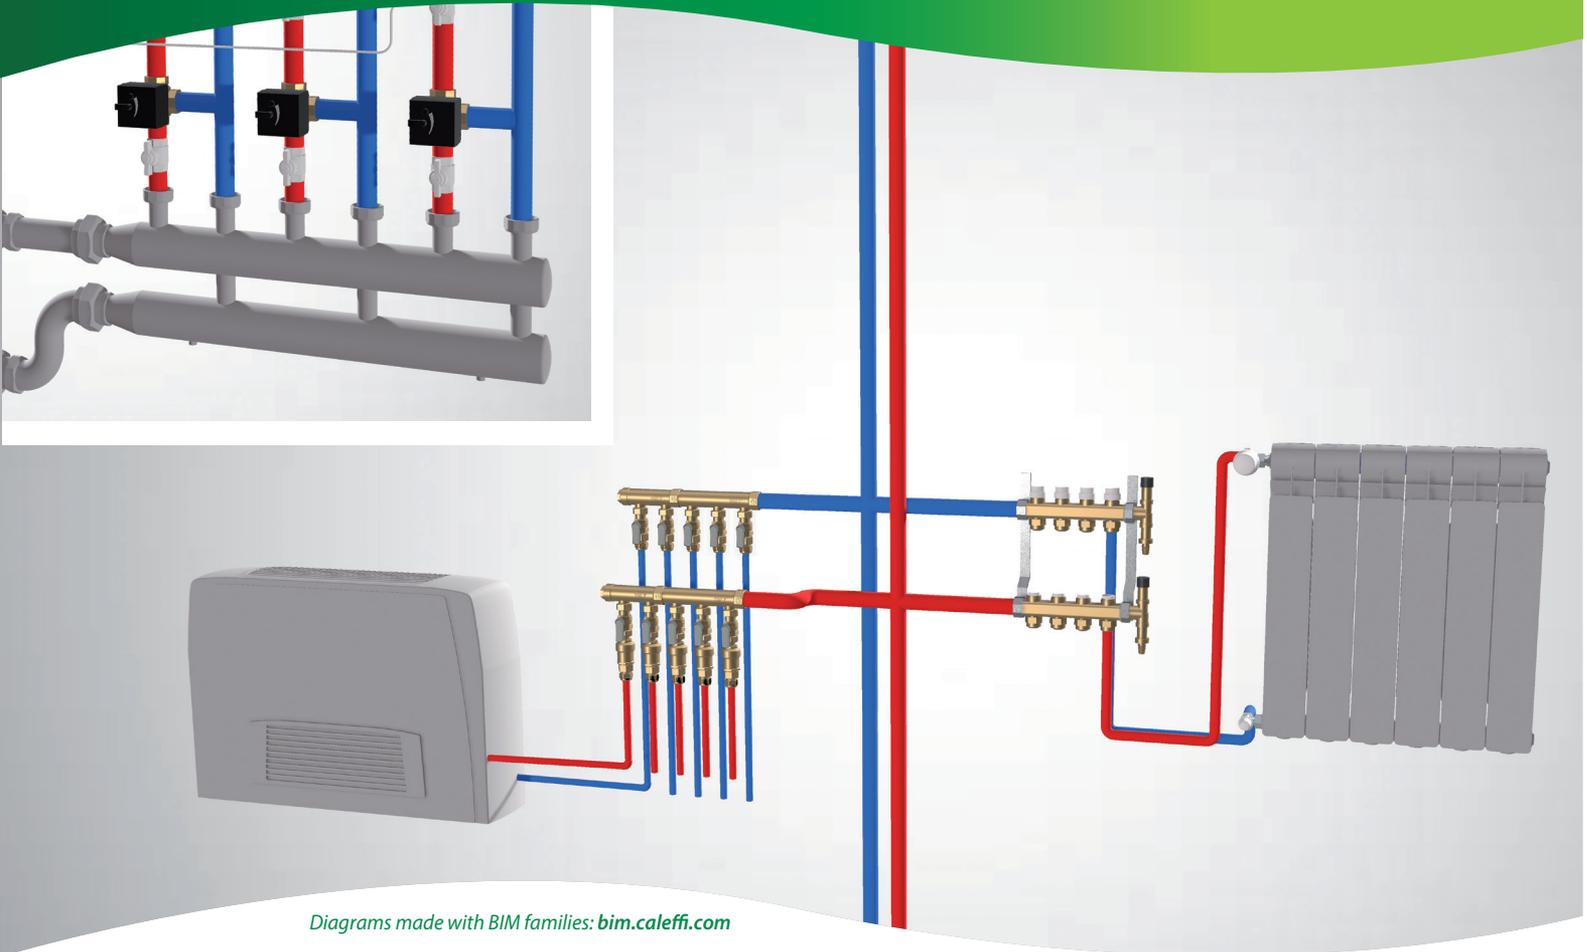

3012

Valve for panel radiators with built-in thermostatic valve unit.
Floor connections.
Straight version.
One-pipe.
With adjustable by-pass.
With non-return device.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C

Code	Radiator connection	Pipe connection		
301241	3/4" M	1/2" M	1	25
301250	3/4" F	3/4" F	1	25

ZONE AND MOTORISED VALVES, DISTRIBUTION MANIFOLDS, BOXES AND ACCESSORIES

Diagrams made with BIM families: bim.caleffi.com

- Zone/diverter valves**
- Single distribution manifolds**
- Dual distribution manifolds**
- Distribution manifolds with shut-off and pre-regulating valves**
- Accessories**
- Fittings**
- Inspection wall boxes and wall ports**

TWO-WAY AND THREE-WAY VALVES, DISTRIBUTION MANIFOLDS AND BOXES

The zone valves perform the function of automatically shutting off the flow rate of the vector medium distributed to the system.

In particular:

- in zone heating systems, they assist in ambient temperature regulation;
- in domestic hot water production and storage systems they regulate the temperature inside storage boilers;
- in residential and industrial systems they shut off the medium in the distribution networks.

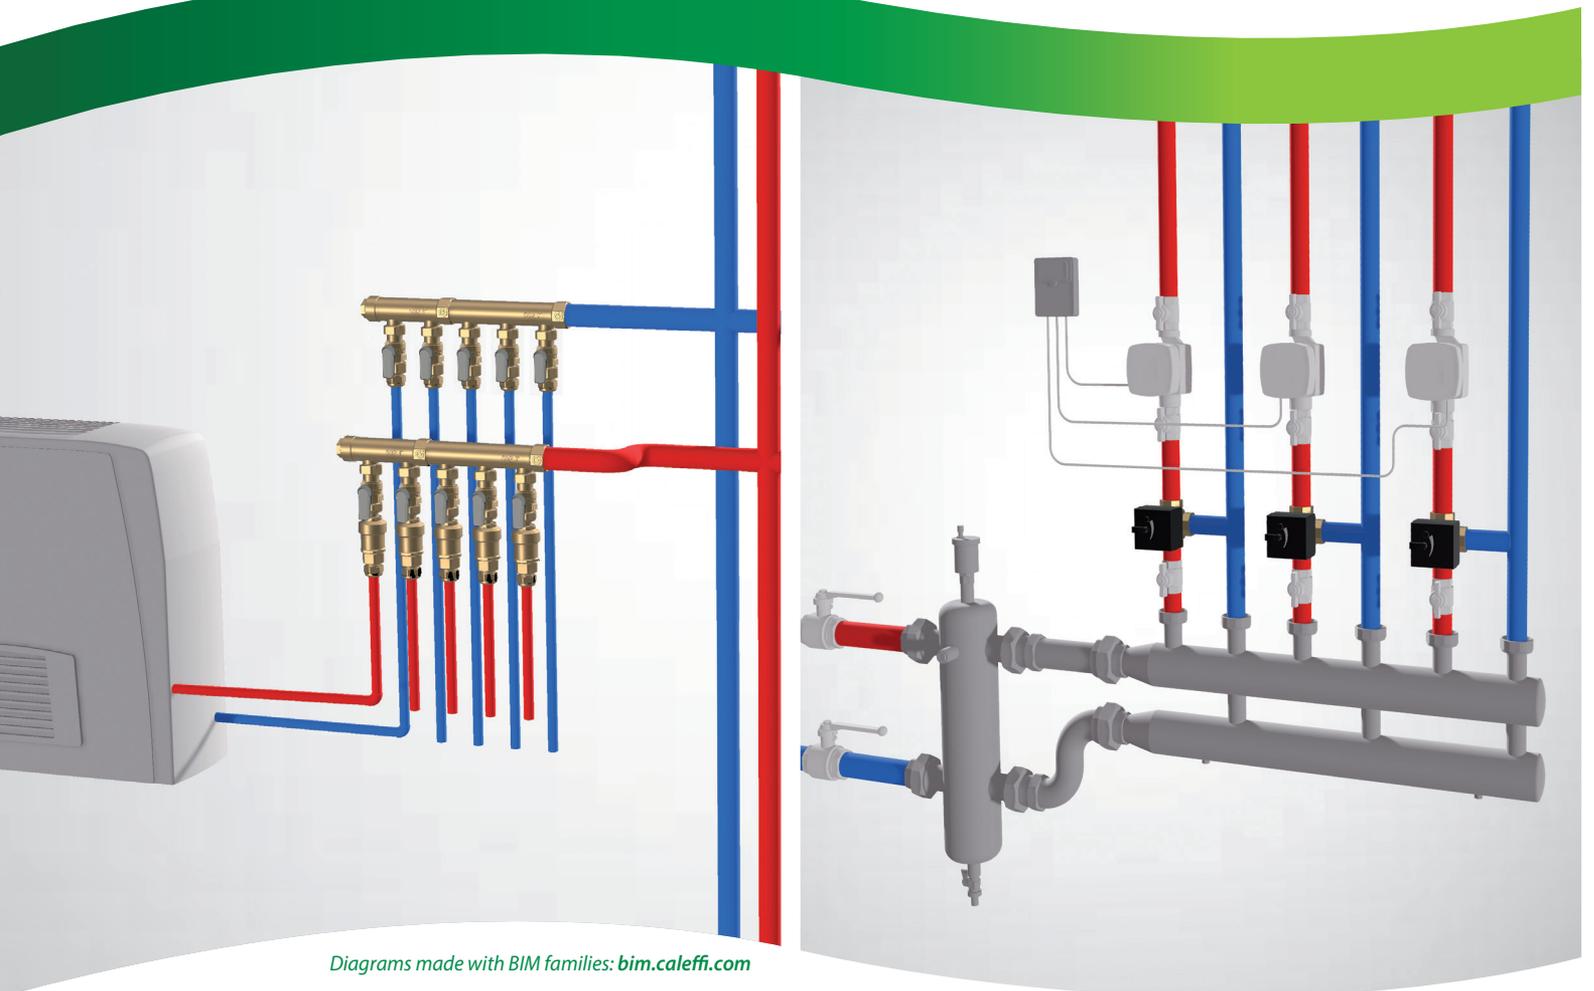

Zone valves and motorised valves

- **Motorised ball zone valves**
- **Thermo-electric zone piston valves**
- **Motorised zone valves with spring return**
- **Motorised ball valves**
- **Motorised ball valves for high flow rates**
- **Motorised valves for central heating systems**
- **Butterfly valves**

Distribution manifolds and boxes

- **Single manifolds**
- **Dual manifolds**
- **Manifolds with shut-off and pre-adjustment valves**
- **Thermo-electric actuators**
- **Fittings**
- **Plastic inspection wall boxes**
- **Sheet metal inspection wall boxes**

ZONE VALVES AND MOTORISED VALVES

ZONE/DIVERTER VALVES

Motorised two-way ball zone valves

10 s - 3 point

6442

Motorised two-way ball valve. Complete with **three-point control** actuator. **With auxiliary microswitch.**

Maximum working pressure: 10 bar
 Medium temperature range: -5-110 °C
 Ambient temperature range: 0-55 °C
 Protection class: IP 54
 Supply cable length: 1 m
 Auxiliary microswitch contact rating (230 V): 0,8 A
 Opening-Closing time: 10 s (90° rot.)

Code	Connection	Electric supply	Kv (m³/h)		
644246	1/2" M	230 V AC	11,1	1	10
644256	3/4" M	230 V AC	11,1	1	10
644248	1/2" M	24 V AC	11,1	1	10
644258	3/4" M	24 V AC	11,1	1	10

10 s - 2 point

6446

Motorised two-way ball valve. Complete with **two-point control** actuator. **With auxiliary microswitch.**

Maximum working pressure: 10 bar
 Medium temperature range: -5-110 °C
 Ambient temperature range: 0-55 °C
 Protection class: IP 54
 Supply cable length: 1 m
 Auxiliary microswitch contact rating (230 V): 0,8 A
 Opening-Closing time: 10 s (90° rot.)

Accessories and spare parts for motorised ball valve

6440

Two-point control spare actuator for motorised ball zone valves 6446, 6447 series.

Ambient temperature range: 0–55 °C
Protection class: IP 54
Supply cable length: 1 m

Code	Electric supply	Opening-Closing time		
644052	230 V AC	10 s (90° rot.)	1	10

6440

Spare **three-point control** actuator for motorised ball zone valves 6445 series.

Ambient temperature range: 0–55 °C
Protection class: IP 54
Supply cable length: 1 m

Code	Electric supply	Opening-Closing time		
644022	230 V AC	40 s (90° rot.)	1	10
644032	230 V AC	10 s (90° rot.)	1	10

6440

Spare **three-point control** actuator for motorised ball zone valve 6443 series.

Ambient temperature range: 0–55 °C
Protection class: IP 54
Supply cable length: 1 m

Code	Electric supply	Opening-Closing time		
644024	24 V AC	40 s (90° rot.)	1	10
644034	24 V AC	10 s (90° rot.)	1	10

Tailpiece, nut and O-Ring.
For motorized zone valves 6470, 6480, 6489, 6490, 6452, 6453, 6459, 6442, 6443 and 6444 series.

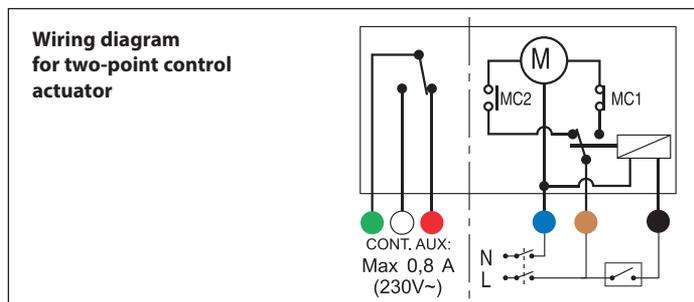

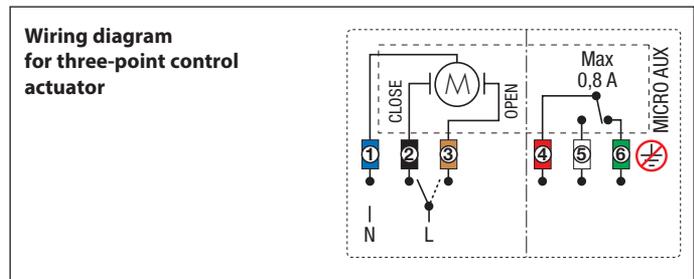

Code	nut connection	tailpiece connection		
R69276	1" F	1/2" M	1	-
R69277	1" F	3/4" M	1	-
R69280	1 1/4" F	1" M	1	-
R59466	1 1/4" M	1 1/4" F	1	-

6443

Insulation kit for use in heating and air-conditioning systems.
For 644 series three-way motorised valves.

Code	Article use		
CBN644357	644353, 644357, 644362, 644366, 644355, 644359, 644364, 644368	1	-

Motorised ball zone valves with insulation

6452

Two-way motorised ball zone valve for heating and cooling systems. Complete with **two-point control** actuator. With manual opening lever. **With insulation.** **With auxiliary microswitch.**

Maximum working pressure: 10 bar
 Medium temperature range: -10-110 °C
 Ambient temperature range: -10-55 °C
 Protection class: IP 65
 Supply cable length: 0,8 m
 Auxiliary microswitch contact rating (230 V): 6 (2) A

Code	Connection	Electric supply	Kv (m³/h)		
645242	1/2" M	230 V AC	17,00	1	-

645274	1 1/4" M	24 V AC	39,50	1	-

6453

Three-way motorised ball zone valve, for heating and cooling systems. Complete with **two-point control** actuator. With manual opening knob **With insulation.** **With auxiliary microswitch.**

Maximum working pressure: 10 bar
 Medium temperature range: -10-110 °C
 Ambient temperature range: -10-55 °C
 Supply cable length: 0,8 m
 Auxiliary microswitch contact rating (230 V): 6 (2) A

Code	Connection	Electric supply	Kv straight (m³/h)	Kv by-pass (m³/h)		
645342	1/2" M	230 V AC	14,10	2,45	1	-

645970	1 1/4" M without nozzle	3,40	1	-

6450

Spare **two-point control** actuator for motorised ball zone valves 6452 and 6453 series.

Protection class: IP 65
 Supply cable length: 0,8 m
 Ambient temperature range: -10-55 °C

Code	Electric supply	Opening-Closing time		
645002	230 V AC	50 s (90° rot.)	1	-
645004	24 V AC	50 s (90° rot.)	1	-

6459

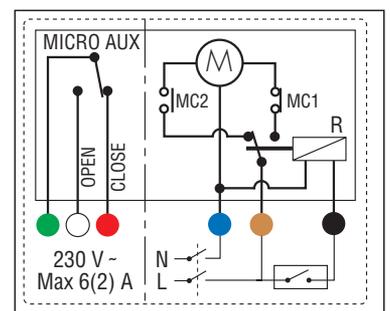

Shell insulation for motorised ball zone valves 6453 series with by-pass tee 6459 and 6490 series. Usable with 356.IS series manifolds.

Code	Notes		
645901	1/2" - 3/4"	1	-
645900	1" - 1 1/4"	1	-

Wiring diagram for 6452 and 6453 series valves, two-point actuator with internal relays, valve in closed position

- R relay
- MC1 opening end microswitch.
- MC2 closing end microswitch.
- MICRO AUX free auxiliary microswitch.

Motorised two-way ball valves for high flow rates

638

Motorised two-way ball valve. Complete with **three-point control** actuator. Actuator torque 15 N·m. **With auxiliary microswitch.**

Maximum working pressure: 16 bar
 Medium temperature range: -10-110 °C
 Ambient temperature range: -10-55 °C
 Δp max.: 10 bar
 Protection class: IP 65
 Auxiliary microswitch contact rating (230 V): 6 (2) A
 Opening-Closing time: 50 s (90° rot.)

638

Insulation kit for use in heating and cooling systems. For 638 series two-way motorised valves.

638014	24 V AC	24 V AC	50 s (90° rot.)	1	-

Wiring diagram for two-way and three-way ball valves 638 series with three-point control actuator

Internal diagram with valve in the following position:
 - Closed, for two-way valve.
 - Port **A** closed for three-way valves.

Motorised three-way ball valves for high flow rates - "T" drilling

638

Motorised three-way ball valve, 90° rotation - "T" drilling.
Reduced bore. With **three-point control** actuator.
Actuator torque 15 N-m.
With auxiliary microswitch.

Maximum working pressure: 16 bar
Medium temperature range: -10-110 °C
Ambient temperature range: -10-55 °C
Protection class: IP 65
Auxiliary microswitch contact rating (230 V): 6 (2) A
Opening-Closing time: 50 s (90° rot.)
Δp max.: 10 bar

Motorised three-way ball valves for high flow rates - "L" drilling

638

Motorised three-way ball valve, 180° rotation - "L" drilling.
Reduced bore. With **three-point control** actuator.
Actuator torque 15 N-m.
With auxiliary microswitch.

Maximum working pressure: 16 bar
Medium temperature range: -10-110 °C
Ambient temperature range: -10-55 °C
Protection class: IP 65
Auxiliary microswitch contact rating (230 V): 6 (2) A
Opening-Closing time: 100 s (90° rotation)
Δp max.: 10 bar

Code	Connection	Electric supply	Kv (m³/h)		
638053	3/4" M	230 V AC	9,9	1	-

638

Spare **three-point control** actuators for motorised two and three-way valves, "T" drilling version 638 series.

Ambient temperature range: -10-55 °C
Protection class: IP 54
Supply cable length: 1 m

Code	Electric supply	Opening-Closing time		
638012	230 V AC	50 s (90° rot.)	1	-
638014	24 V AC	50 s (90° rot.)	1	-

638

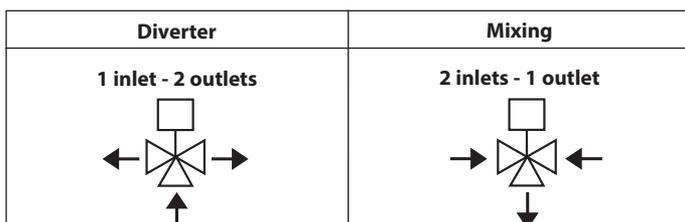

Spare **three-point control** actuator for three-way motorised ball valves, "L" drilling version, 638 series.

Ambient temperature range: -10-55 °C
Protection class: IP 54
Supply cable length: 1 m

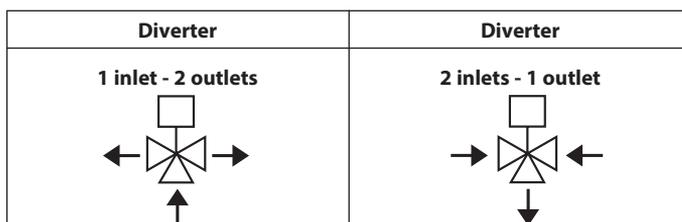

Code	Electric supply	Opening-Closing time		
638412	230 V AC	100 s (180° rot.) (rotazione 180°)	1	-
638414	24 V AC	100 s (180° rot.) (rotazione 180°)	1	-

Applications "T" drilling

Applications "L" drilling

Thermo-electric piston zone valves

676

Two-way zone valve for **high flow rates**.
For installation of series 6563, 6561, 6562 and 6564 thermo-electric actuators.

Maximum working pressure: 10 bar
Medium temperature range: 0–95 °C
Δp max.: 2,5 bar

Kv
(m³/h)

Code	Connection	Kv (m ³ /h)		
676500	1" M	4,77	1	20

676

Two-way zone valve.
Designed for installation of series 6563, 6561, 6562 and 6564 thermo-electric actuators.

Maximum working pressure: 10 bar
Medium temperature range: 0–95 °C
Δp max.: 1,2 bar

Kv
(m³/h)

Code	Connection	Kv (m ³ /h)		
676040	1/2" M	3,7	1	10
676050	3/4" M	3,7	1	10
676060	1" M	3,7	1	10

677

Three-way zone valve.
Designed for installation of series 6563, 6561, 6562 and 6564 thermo-electric actuators.

Maximum working pressure: 10 bar
Medium temperature range: 0–95 °C
Δp max.: 1,2 bar

Kv straight
(m³/h)

Kv by-pass
(m³/h)

Code	Connection	Kv straight (m ³ /h)	Kv by-pass (m ³ /h)		
677040	1/2" M	3,7	1,0	1	10
677050	3/4" M	3,7	1,0	1	10
677060	1" M	3,7	1,0	1	10

678

Three-way zone valve with by-pass tee.
Designed for installation of series 6563, 6561, 6562 and 6564 thermo-electric actuators.
Adjustable outlet centre distance from 49 to 63 mm.
Tee complete with U6 nozzle.

Maximum working pressure: 10 bar
Medium temperature range: 0–95 °C
Δp max.: 1,2 bar

Kv straight
(m³/h)

Kv by-pass
(m³/h)

Code	Connection	Kv straight (m ³ /h)	Kv by-pass (m ³ /h)		
678040	1/2" M	3,7	1,0	1	10
678050	3/4" M	3,7	1,0	1	10
678060	1" M	3,7	1,0	1	10

Thermo-electric actuator for piston zone valves

6561

Thermo-electric actuator with auxiliary microswitch.
Normally closed.

For valves 338, 339, 401, 402, 425, 426, 421, 422, 455, 456, 220, 221, 222, 223, 224, 225, 226, 227, 230, 231, 232, 233, 234, 237, 676, 677, 678 series, manifolds 670, 671, 662, 663, 668.S1, 664, 665, 116 series and unit 171, 182 series.

With auxiliary microswitch.

Ambient temperature range: 0–50 °C

Protection class: IP 44 (vertical position)

Supply cable length: 0,8 m

Auxiliary microswitch contact rating (230 V): 0,8 A

Starting current: ≤ 1 A

Code Electric supply

656112	230 V AC	1	10
656114	24 V AC/DC	1	10

6561

Thermo-electric actuator.
Normally closed.

For valves 116, 338, 339, 401, 402, 425, 426, 421, 422, 455, 456, 220, 221, 222, 223, 224, 225, 226, 227, 230, 231, 232, 233, 234, 237, 676, 677, 678 series, manifolds 670, 671, 662, 663, 668.S1, 664, 665 series and unit 171, 182 series.

Ambient temperature range: 0–50 °C

Protection class: IP 44 (vertical position)

Supply cable length: 0,8 m

Starting current: ≤ 1 A

Code Electric supply

656102	230 V AC	1	10
656104	24 V AC/DC	1	10

For other actuator models, see page 162

Piston zone valves thermo-electric

632

Two-way piston zone valve.

Maximum working pressure: 10 bar
Medium temperature range: -5-95 °C
Δp max.: 1 bar

Code	Connection	Kv straight (m³/h)		
632400	1/2" M	5,10	1	5
632500	3/4" M	6,27	1	5
632600	1" M	6,38	1	5

633

Three-way piston zone valve.
3/4" female third way.

Maximum working pressure: 10 bar
Medium temperature range: -5-95 °C
Δp max.: 1 bar

Code	Connection	Kv straight (m³/h)	Kv by-pass (m³/h)		
633400	1/2" M	4,99	4,33	1	5
633500	3/4" M	6,19	4,91	1	5
633600	1" M	6,45	5,30	1	5

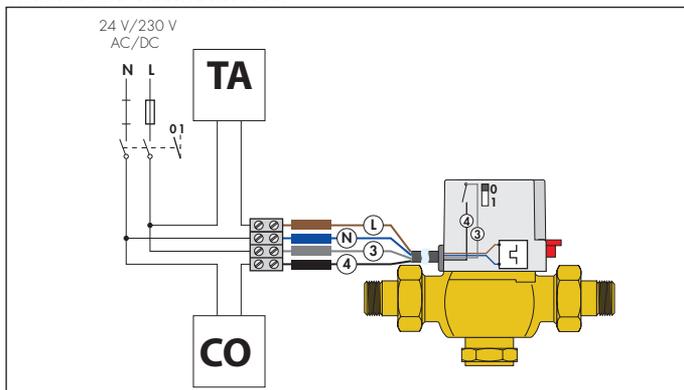

635

Balanced by-pass tee.
For zone valves 633 series.

Maximum working pressure: 10 bar
Medium temperature range: -5-95 °C
Δp max.: 1 bar

Code	Connection	Notes	Kv by-pass valve + tee (m³/h)		
635440	1/2" M	nozzle: U4	0,96	1	5
635460	1/2" M	nozzle: U6	1,32	1	5
635480	1/2" M	nozzle: U8	1,73	1	5
635540	3/4" M	nozzle: U4	0,98	1	5
635560	3/4" M	nozzle: U6	1,36	1	5
635580	3/4" M	nozzle: U8	1,79	1	5
635640	1" M	nozzle: U4	1,02	1	5
635660	1" M	nozzle: U6	1,43	1	5
635680	1" M	nozzle: U8	1,88	1	5

Wiring diagram for piston zone valves 632 and 633 series with thermo-electric actuator

630

Thermo-electric actuator.
For zone valves 632 and 633 series.
Normally closed.

Protection class: IP 42
Ambient temperature range: 0-55 °C

Code	Electric supply	Running power consumption (W)	Starting current (A)		
630002	230 V AC/DC	5	≤ 1	1	10

630

Thermo-electric actuator with manual actuator.
For zone valves 632 and 633 series.
Normally closed.
With auxiliary microswitch.

Protection class: IP 20
Auxiliary microswitch contact rating (230 V):
6 (3) A
Ambient temperature range: 0-55 °C

Code	Electric supply	Starting current		
630112	230 V AC/DC	≤ 1 A	1	10
630114	24 V AC/DC	≤ 350 mA	1	10

Tailpiece, nut and seal.
For zone valves 632, 633 and 635 series

Code	nut connection

643052	3/4" F	230 V AC	4,5	1,50	1	10
643062	1" F	230 V AC	6	1,0	1	10

643
Z-one®

Motorised three-way zone valve.
Normally closed.
With auxiliary microswitch.

Maximum working pressure: 16 bar
Medium temperature range: 0–90 °C
Ambient temperature range: 0–40 °C
Protection class: IP 20
Auxiliary microswitch contact rating (230 V):
0,8 A
Supply cable length: 0,95 m
Opening-Closing time: 70–75 s (opening
time), 5–7 s (closing time)

641

Spare actuator for motorised zone valves
642 and 643 series.

Protection class: IP 65
Running power consumption: 7 VA
Opening-Closing time: 5–7 s (closing time),
70–75 s (opening time)

Auxiliary microswitch contact rating (230 V):
0,8 A

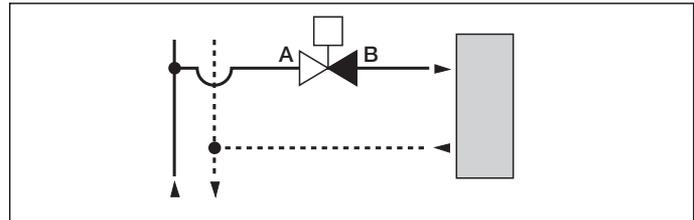

Code	Electric supply		
641002	230 V AC	1	-

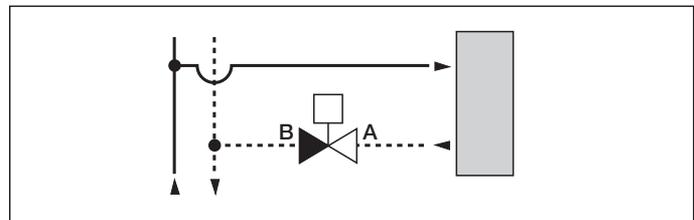

Installation

The 3-way valve cannot be converted into 2-way valve and viceversa.

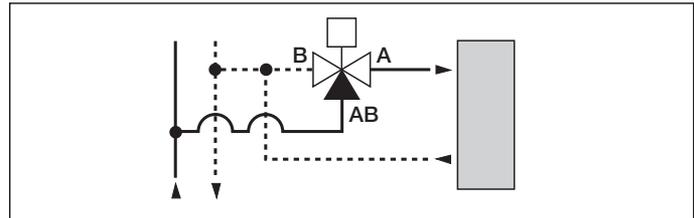

2-way valve installed on the flow

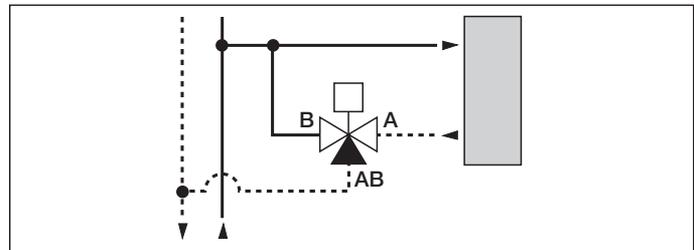

2-way valve installed on the return

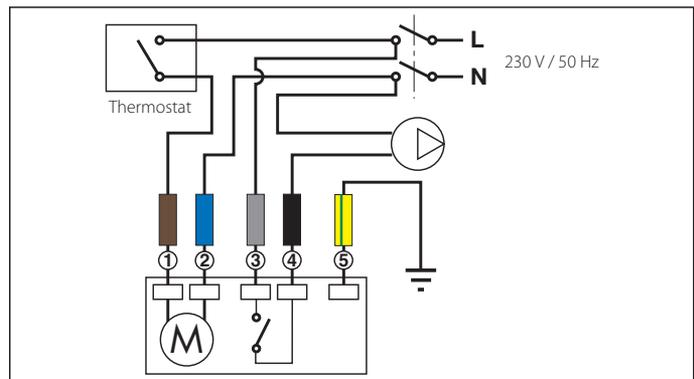

3-way valve installed on the flow with diverting position and ON/OFF use mode

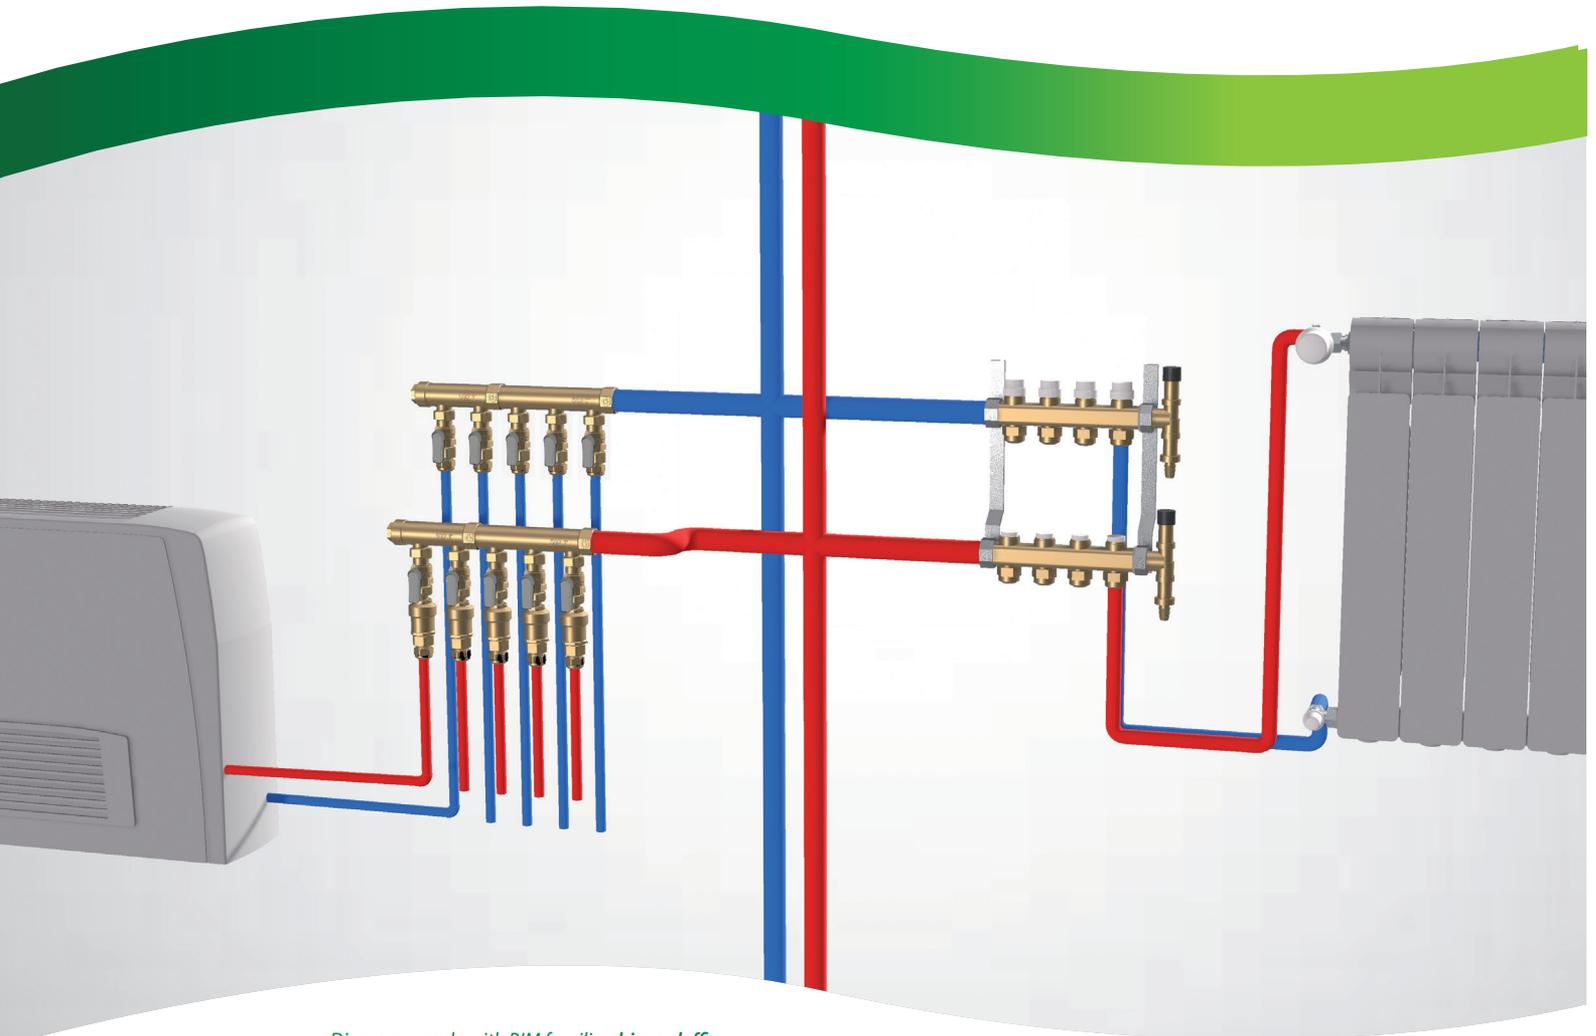

3-way valve installed on the return with mixing position and ON/OFF use mode

Wiring diagram for spring return valves 642 and 643 series

650 NEW

Ball shut-off valve.

Maximum working pressure: 10 bar
Medium temperature range: 5–90 °C
Maximum percentage of glycol: 30 %
Material: brass
Medium: glycol solutions, water

Code	Connection 1	Connection 2	Kv (m ³ /h)		
650001	3/4" M	3/4" F captive nut	14	1	20

127 NEW AUTOFLOW

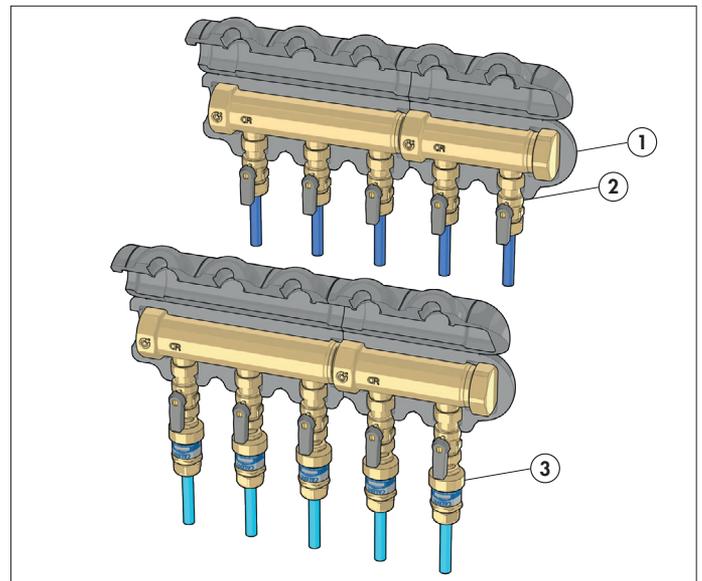

Compact automatic flow rate regulator, in line, with high resistance tecnopolymer cartridge.
Flow rates: 0,12–1,2 m³/h.
Accuracy: ± 10%.
Δp range: 15–200 kPa
PATENT

Code	Notes
127451***	0,12; 0,2; 0,3; 0,4; 0,5; 0,6; 0,7; 0,8; 0,9; 1,0; 1,2

Only for use with 650 series manifolds with male outlets **with a flat seat.**

*** For the code ending, please refer to the coding method on page 234

- 650 series manifold with male outlets with a flat seat, for heating and cooling systems. Made using dezincification resistant alloy to prevent corrosion in cooling systems, this allows the distribution of high flow rates while keeping pressure drops low. The outlet centre distance of up to 80 mm offers easy installation of fittings for pipes up to 26 mm. Complete with pre-formed shell insulation to prevent condensation build-up on the metal surface.
- 650001 ball shut-off valve, to add the option of shutting off the outlets of 650 series manifolds with male outlets with a flat seat. The built-in captive nut helps to save space, thereby making installation more convenient.
- AUTOFLOW® automatic flow rate regulator to ensure the correct flow rate to each terminal and proper hydraulic balancing of the system, while avoiding interference and minimising energy wastage.

DUAL DISTRIBUTION MANIFOLDS

Dual distribution manifolds

356

Cast monoblock dual distribution manifold. For heating and cooling systems.

Maximum working pressure: 10 bar
Medium temperature range: -10–110 °C
Main centre distance: 60 mm
Outlet centre distance: 40 mm

Code	Connection	Outlet connection		
356502	3/4" F	23 p. 1,5 M - 2 out.	1	
356504	3/4" F	23 p. 1,5 M - 4 out.	1	5

DISTRIBUTION MANIFOLDS WITH SHUT-OFF AND PRE-REGULATING VALVES

Pre-assembled distribution manifolds with shut-off and pre-regulating valves - 1" connections

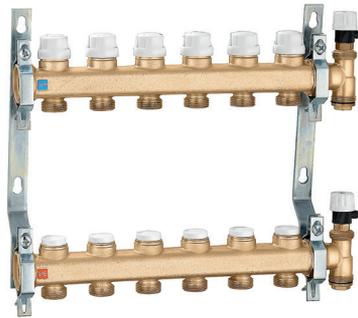

662

Distribution manifold group.

Complete with:

- return manifold complete with shut-off valves fitted for thermo-electric actuator;
- flow manifold complete with lockshield valves for flow rate pre-regulation;
- end fittings consisting of double radial end fitting, manual air vent and plugs;
- steel mounting brackets for use with box 659, 661 series or for direct wall fixing.

Maximum working pressure: 10 bar
 Medium temperature range: 5-100 °C
 Outlet centre distance: 50 mm

Code	Connection	Outlet connection		
6626B5	1" F	3/4" M - 2 out.	1	-

6626O5	1" F	3/4" M - 13 out.	1	-

For thermoelectric actuators, see page 162

664

Insulation for distribution manifolds 662, 664 and 665 series.

For heating and cooling systems.

For use with box code 659..4 (adjustable depth from 110 to 140 mm).

Code	Notes		
CBN6646F1	for manifolds with 2 to 6 outlets	35	-
CBN6646N1	for manifolds with 7 to 12 outlets	20	-
CBN6646O1	for manifolds with 13 outlets	1	-

Single distribution manifolds with shut-off and pre-regulating valves - 1" connections

662

Pair of distribution manifolds. Complete with shut-off and lockshield valves for flow rate pre-regulation.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Outlet centre distance: 50 mm

Code	Connection 1	Connection 2	Outlet connection		
662625	1" F	1" M	3/4" M - 2 out.	1	10

Accessories for manifolds - 1" connections

391

Pair of ball shut-off valves with O-Ring seal. For distribution manifolds 664 and 665 series.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C

Code	Pipe connection	Manifold connection		
391066	1" F	1" M	1	10

5996

End fitting consisting of double radial end fitting, air vent cock and plug.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C

Code	Manifold connection		
599662	1" F	1	25

662

Fixed setting differential by-pass kit 20 kPa (2000 mm w.g.), with flexible hose. For distribution manifolds 662 series.

Maximum working pressure: 10 bar
Medium temperature range: 0–100 °C

Code	Connection 1	Connection 2		
662000	3/4" F captive nut	3/4" F	1	5

658

Pair of steel mounting brackets for distribution manifolds 662 and 664 series. To be used with boxes code 659..5 or directly wall mounted.

Code		
658101	1	20

658

Polymer mounting brackets with adjustable centre distance, for distribution manifolds 662 and 664 series. To be used with boxes code 659.4 (depth 110–140 mm), or directly wall mounted. Complete with screws and wall anchors.

Code		
658400	1	5

Pre-assembled distribution manifolds with shut-off and pre-regulating valves - 1 1/4" connections

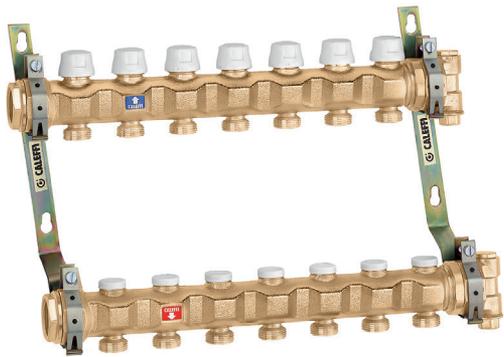

663

Pre-assembled distribution manifold.

Consisting of:

- 1 return distribution manifold complete with shut-off valves fitted for thermo-electric actuator;
- 1 flow distribution manifold complete with lockshield valves for flow rate pre-regulation;
- 2 mounting brackets code 658100;
- 2 reduction fittings 1 1/4" M x 1" F code 364276;
- 2 double radial end fittings with plugs.

Maximum working pressure: 10 bar
 Medium temperature range: 5-100 °C
 Outlet centre distance: 50 mm

663

Pre-assembled distribution manifold complete with insulation, for cooling systems.

Complete with:

- 1 return distribution manifold complete with shut-off valves fitted for thermo-electric actuator;
- 1 flow distribution manifold complete with lockshield valve for flow rate pre-regulation;
- 2 mounting brackets code 658100;
- 2 reduction fittings 1 1/4" M x 1" F code 364276;
- 2 double radial end fittings with plugs.

With insulation.

Maximum working pressure: 10 bar
 Medium temperature range: 5-100 °C
 Outlet centre distance: 50 mm

For thermoelectric actuators, see page 162

Single distribution manifolds with shut-off and pre-regulating valves - 1 1/4" connections

663

Pair of distribution manifolds. Complete with shut-off and lockshield valves for flow rate pre-regulation.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Outlet centre distance: 50 mm

Code	Connection 1	Connection 2	Outlet connection

383150	23 p.1,5 F	3/4" M	10	-

383

Female fitting - olive coupling.

Finish: chrome plated

Code	Connection 1	Connection 2		
383151	23 p.1,5 F	3/4" M	10	-

383

Connection fitting with O-ring seal.
For use with 3/4" 347, 679 and 680 series.

Code	Connection 1	Connection 2		
383550	3/4" M	23 p.1,5 F	10	100

383

Female-female fitting.

Code	Connection 1	Connection 2		
383240	23 p.1,5 F	1/2" F	10	-

384

Male fitting - olive coupling.

Code	Connection 1	Connection 2		
384030	3/8" M	23 p. 1,5 M	10	-
384040	1/2" M	23 p. 1,5 M	10	-
384050	3/4" M	23 p. 1,5 M	10	-

384

Male fitting - olive coupling.

Finish: chrome plated

Code	Connection 1	Connection 2		
384031	23 p. 1,5 M	3/8" M	10	-
384041	23 p. 1,5 M	1/2" M	10	-

382

Fitting with 23 p.1,5 captive nut.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Finish: chrome plated

Code	Connection 1	Connection 2		
382000	23 p. 1,5 M	23 p.1,5 F captive nut	10	-

383

Adapter with flat seat with O-Ring.
Transformation from 3/4" Euroconus to 3/4" flat seat.

Code	Connection		
383000	3/4" M	100	-

688

Temperature gauge with pocket.
Temperature gauge scale: 0-80 °C
Ø: 40 mm

Code	Connection		
688002	1/4" M	2	-

392

Temperature gauge fitting.
For distribution manifolds 592 and 350 series.

Temperature gauge scale: 0-80 °C
Ø: 40 mm

Code	Connection 1	Connection 2	Notes		
392600	1" F	1" M	with PTFE seal	1	-
392700	1 1/4" F	1 1/4" M	without PTFE seal	1	-

3642

Reduction fitting.

Code	Connection 1	Connection 2		
364276	1" F	1 1/4" M	2	-

657

Temperature gauge fitting.

Temperature gauge scale: 0-80 °C
Ø: 40 mm

Code	Connection 1	Connection 2		
657400	1/2" M	1/2" F	5	-

5991

End fitting.
For distribution manifolds 349, 350, 592, 650 and 663 series.

Code	Connection 1	Connection 2		
599153	3/4" F	3/8" F	2	-
599154	3/4" F	1/2" F	2	-

599173	1 1/4" F	3/8" F	2	-
599174	1 1/4" F	1/2" F	2	-

657

Temperature gauge fitting.
For distribution manifold outlets.

Temperature gauge scale: 0-80 °C
Ø: 40 mm

Code	Connection 1	Connection 2		
657050	3/4" M	3/4" F captive nut	1	12

5993

Plug.
For distribution manifolds 349, 350, 592, 650 and 663 series.

Code	Connection		
599350	3/4" F	2	10
599360	1" F	2	10
599370	1 1/4" F	2	10

669

Self cleaning flow meter.

Maximum working pressure: 6 bar
Medium temperature range: 5-80 °C
Flow meter scale: 1-4 l/min

Code	Connection 1	Connection 2		
669050	3/4" M	3/4" F captive nut	1	10

5994

Double radial end fitting.
For distribution manifolds 349, 350, 592, 650 and 663 series.

Code	Manifold connection	Connection 1	Connection 2		
599453	3/4" F	1/2" F	3/8" F	2	-
599454	3/4" F	1/2" F	1/2" F	2	-

FITTINGS

Fittings - threaded connections 23 p. 1.5

679 DARCAL

Fitting for multilayer plastic pipe for continuous high temperature use.

Maximum working pressure: 10 bar
Medium temperature range: 0–95 °C

Code	Connection	Pipe diameter		
679114	23 p. 1,5	Ø 14x2	10	100
679124	23 p. 1,5	Ø 16x2	10	100
679125	23 p. 1,5	Ø 16x2,25	10	100
679144	23 p. 1,5	Ø 18x2	10	100

For a correct use, adjust the multilayer pipe diameter before installation using the Caleffi calibrator 679 series.

Calibrator 679 series page 107

680 DARCAL

Self-adjustable diameter fitting for single and multilayer plastic pipes.
Working temperature range 5–80°C (PE-X);
5–75°C (Multi-layer marked 95°C).

Maximum working pressure: 10 bar

Code	Connection	Pipe diameter		
680000	23 p. 1,5	Øint. 7,5–8, Øext. 12–14	10	100
680002	23 p. 1,5	Øint. 9–9,5, Øext. 14–16	10	100

Code	Connection	Pipe diameter		
680285	3/4" F	Ø 25x2,5	10	60
680296	3/4" F	Ø 26x3	10	60

Example: 680 series fitting selection

Known both the outside and inside diameters (ex.: 17 mm and 13 mm);
or known the outside diameter (ex.: Øo 17 mm) and the thickness (ex.: th. 2 mm) and considering that:

$$\text{Ø}_{\text{outside}} - 2 \cdot \text{th.} = \text{Ø}_{\text{inside}}$$

$$17 - 2 \cdot 2 = 13 \text{ mm}$$

Look within the table for the code matching both diameters:

Code	Connection	Ø _{inside}	Ø _{outside}

RADIANT PANEL SYSTEM CONTROL

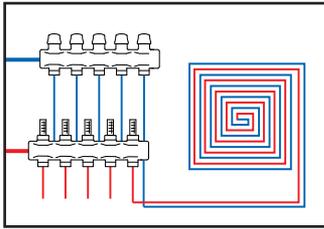

5

Diagrams made with BIM families: bim.caleffi.com

Distribution manifolds for radiant panel systems
Regulating units for radiant panel systems
Thermo-electric actuators
Inspection wall boxes and wall ports

MANIFOLDS FOR RADIANT PANEL SYSTEMS

Manifolds for radiant panel systems are used for optimal distribution of the heating medium in floor heating system circuits and ultimately to improve heat emission control.

They are composed of:

- flow manifold; complete with flow meters and built-in regulating valves;
- return manifold; complete with shut-off valves with facility for thermo-electric actuator;
- end fittings complete with automatic valve and manual air vent with filler/drain cocks.

Modulating temperature regulating units or set point thermostatic regulating units can be coupled with the distribution manifolds.

Distribution manifolds

- **Technopolymer distribution manifolds**
- **Differential pressure control valve for distribution manifolds**
- **Accessories for distribution manifolds**
- **Brass distribution manifolds**
- **Dynamic distribution manifolds**

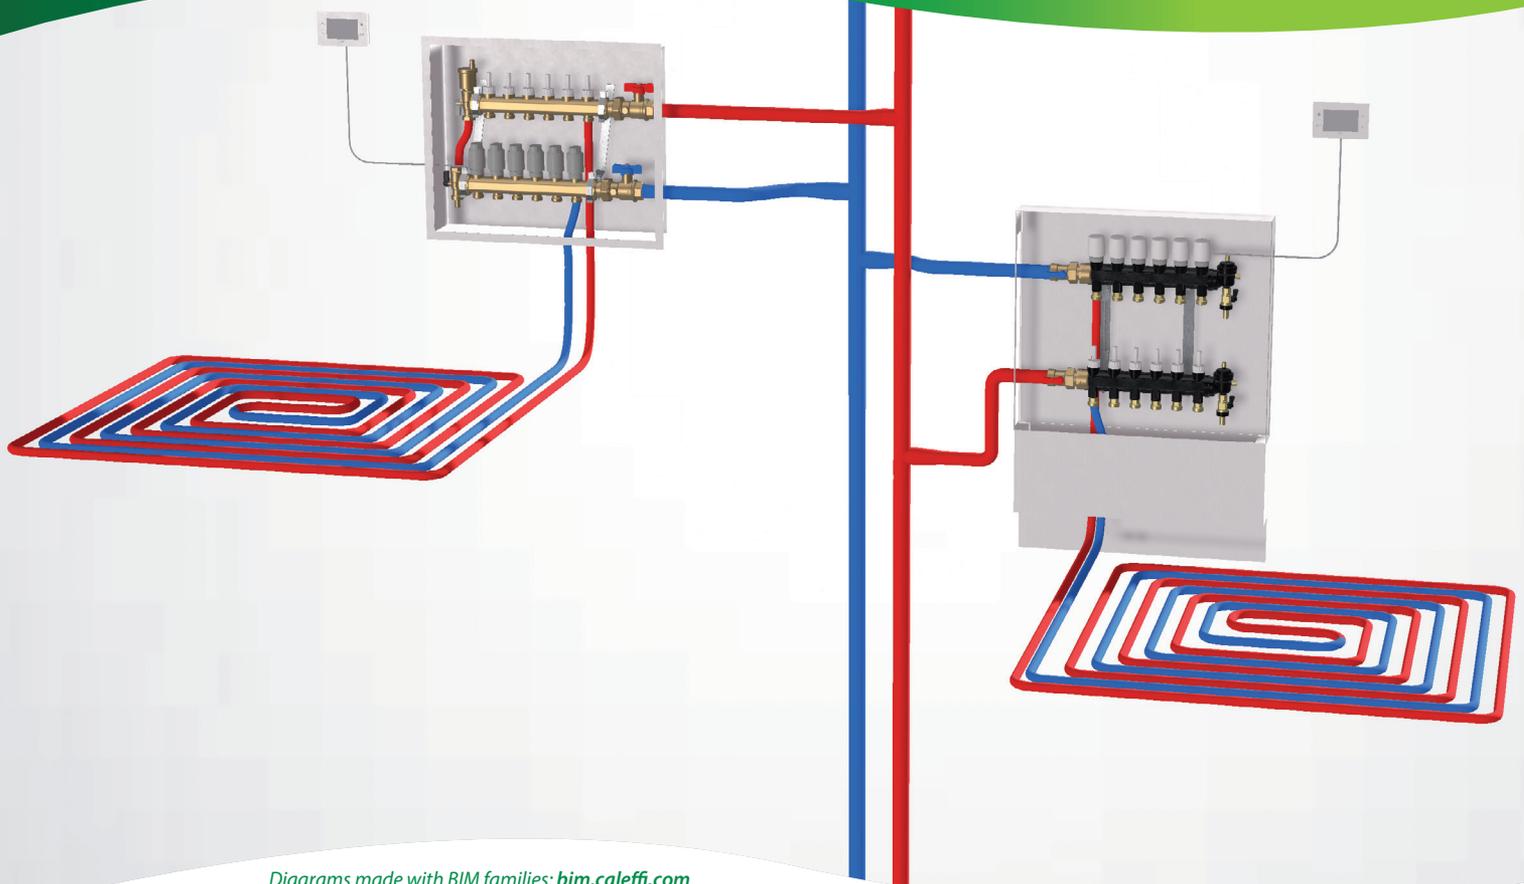

Distribution manifolds with regulating unit

- **Modulating temperature regulating unit with digital temperature**
- **Set point thermostatic regulating unit**
- **Set point thermostatic regulating unit with medium distribution kit for primary circuit**
- **Thermostatic mixing valve for radiant panel systems**

Thermo-electric actuators and boxes for distribution manifolds

- **Thermo-electric actuators**
- **Boxes for distribution manifolds**

DISTRIBUTION MANIFOLDS FOR RADIANT PANEL SYSTEMS

Technopolymer distribution manifolds with manual balancing, 1" connections

671

Pre-assembled distribution manifold.

Complete with:

- technopolymer flow manifold with built-in flow meters and flow rate balancing valves;
- technopolymer return manifold with built-in shut-off valves fitted for thermo-electric actuator;
- technopolymer end fittings with automatic air vent with hygroscopic cap, discharge valve and fill/drain cock;
- pair of ball shut-off valves;
- LCD thermometers on flow and return manifolds;
- adhesive labels indicating the rooms;
- pair of mounting brackets for box or wall mounting;
- coupling adapter with clip code 675850, for manifold outlets (in package);
- template for cutting pipe code 675002 (in package).

Maximum working pressure: 6 bar
Medium temperature range: 5–60 °C

Function

The DYNAMICAL® valve allows the **automatic dynamic balancing** and **pressure-independent adjustment** of the thermal medium in the radiators of two-pipe heating systems.

The device, in conjunction with a thermostatic, electronic or thermo-electric control, combines different functions in a single component.

A. Differential pressure regulator, which automatically cancels the effect of the pressure fluctuations typical of variable flow rate systems and prevents noisy operation.

B. Device for pre-setting flow rate, which allows direct setting of the maximum flow rate value, thanks to the combination with the differential pressure regulator.

C. Flow rate control depending on the ambient temperature, thanks to the combination with a thermostatic control head. The flow rate control is optimised because it is pressure-independent.

Accessories for distribution manifolds 1"

664

Insulation for distribution manifolds 662, 664 and 665 series.
For heating and cooling systems.
For use with box code 659.4 (adjustable depth from 110 to 140 mm).

666785S1	1 1/4" F	3/4" M - 8 out.	2	-

668...S1

Off-centre by-pass kit with fixed setting. Complete with manifold connecting pipe. For 668.S1 series manifolds.

Maximum working pressure: 10 bar
Medium temperature range: 0–100 °C
Pressure setting: 25 kPa

Code	Connection 1	Connection 2		
668000S1	1" F captive nut	3/4" F captive nut	1	10

5996

Return end fitting. Complete with:
- double radial fitting complete with three-position ball valve;
- by-pass connection with plug and filler/drain hose connection.

Maximum working pressure: 10 bar
Medium temperature range: 0–100 °C

Code	Connection		
599675	1 1/4" F	1	10

391...S1

Pair of ball shut-off valves. With Ø40 temperature gauge.

Maximum working pressure: 10 bar
Medium temperature range: 0–100 °C
Temperature gauge scale: 0–80 °C

Code	Pipe connection	Manifold connection		
391167S1	1" F	1 1/4" M	1	5
391177S1	1 1/4" F	1 1/4" M	1	5

3642...S1

Reduction fitting.

Code	Connection 1	Connection 2		
364276S1	1" F	1 1/4" M	2	10

391...S1

Pair of ball shut-off valves. With temperature gauge connection.

Maximum working pressure: 10 bar
Medium temperature range: 0–100 °C

Code	Pipe connection	Manifold connection		
391067S1	1" F	1 1/4" M	1	-
391077S1	1 1/4" F	1 1/4" M	1	-

347...S1

Compression fitting.

Maximum working pressure: 10 bar
Medium temperature range: -25–120 °C

Code	Connection	Pipe diameter		
347512S1	3/4" F	Ø 12	1	50
347514S1	3/4" F	Ø 14	1	50

5996

Flow end fitting. Complete with:
- two-position ball valve;
- automatic air vent with hygroscopic cap;
- filler/drain hose connection.

Maximum working pressure: 10 bar
Maximum air discharge pressure: 2,5 bar
Medium temperature range: 0–100 °C

Code	Connection		
599674	1 1/4" F	1	10

5020

Automatic air vent with hygroscopic cap. For 668...S1 manifold end fittings.

Maximum working pressure: 10 bar
Maximum air discharge pressure: 2,5 bar
Medium temperature range: 0–110 °C
Material: brass

Code	Connection		
502043	1/2" M	10	50

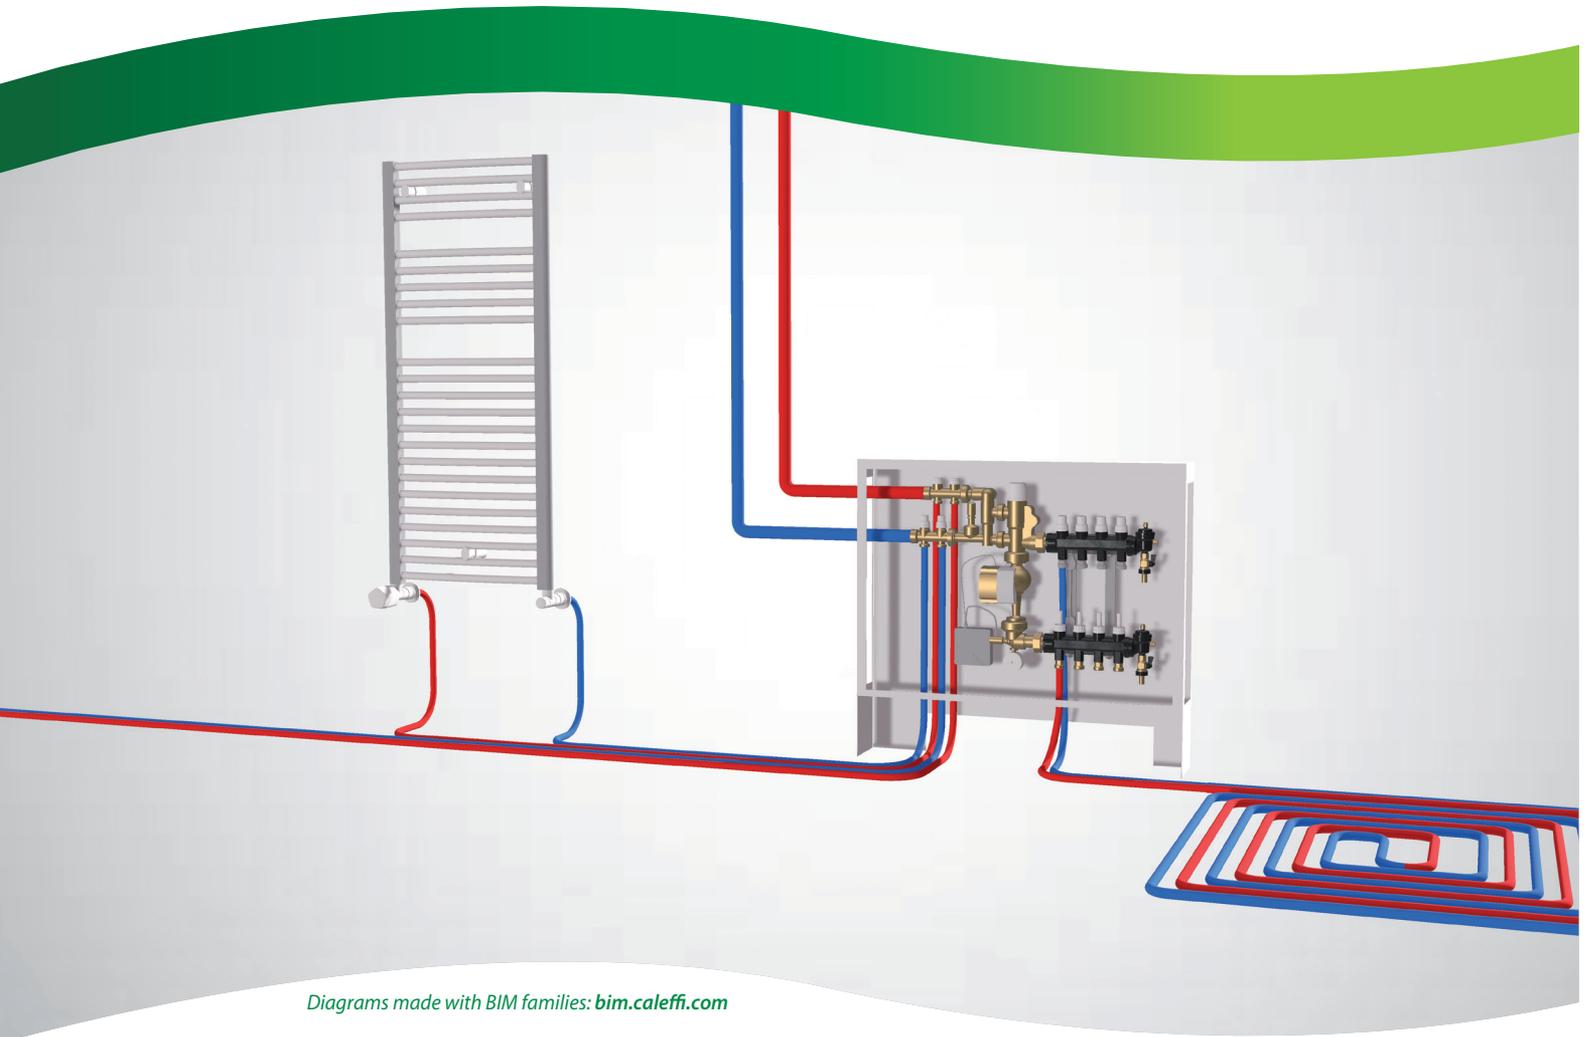

658

Pair of mounting brackets for distribution manifolds 663 and 668...S1 series. Complete with screws and wall anchors. To be used with boxes 659 series or directly wall mounted.

Code		
658100	1	20

Boxes for distribution manifolds from 80 to 120 mm

Boxes for distribution manifolds from 110 to 150 mm

THERMO-ELECTRIC ACTUATORS

Thermo-electric actuator
- threaded connection

6561

Thermo-electric actuator **with auxiliary microswitch.**

Normally closed.

For valves 338, 339, 401, 402, 425, 426, 421, 422, 455, 456, 220, 221, 222, 223, 224, 225, 226, 227, 230, 231, 232, 233, 234, 237, 676, 677, 678 series, manifolds 670, 671, 662, 663, 668.S1, 664, 665, 116 series and unit 171, 182 series.

With auxiliary microswitch.

Ambient temperature range: 0–50 °C

Protection class: IP 44 (vertical position)

Supply cable length: 0,8 m

Auxiliary microswitch contact rating (230 V): 0,8 A

Starting current: ≤ 1 A

Code	Electric supply		
656112	230 V AC	1	10
656114	24 V AC/DC	1	10

6561

Thermo-electric actuator.

Normally closed.

For valves 116, 338, 339, 401, 402, 425, 426, 421, 422, 455, 456, 220, 221, 222, 223, 224, 225, 226, 227, 230, 231, 232, 233, 234, 237, 676, 677, 678 series, manifolds 670, 671, 662, 663, 668.S1, 664, 665 series and unit 171, 182 series.

Ambient temperature range: 0–50 °C

Protection class: IP 44 (vertical position)

Supply cable length: 0,8 m

Starting current: ≤ 1 A

Code	Electric supply		
656102	230 V AC	1	10
656104	24 V AC/DC	1	10

6563

Thermo-electric actuator **with manual opening and position indicator.**

Normally closed.

For valves 116, 338, 339, 401, 402, 425, 426, 421, 422, 455, 456, 220, 221, 222, 223, 224, 225, 226, 227, 230, 231, 232, 233, 234, 237, 676, 677, 678 series, manifolds 670, 671, 662, 663, 668.S1, 664, 665 series and unit 171, 182 series.

With auxiliary microswitch.

PATENT

Ambient temperature range: 0–50 °C

Protection class: IP 40

Supply cable length: 0,8 m

Auxiliary microswitch contact rating (230 V): 0,8 A

Starting current: ≤ 1 A

Code	Electric supply		
656312	230 V AC	1	10
656314	24 V AC/DC	1	10

6563

Thermo-electric actuator **with manual opening and position indicator.**

Normally closed.

For valves 116, 338, 339, 401, 402, 425, 426, 421, 422, 455, 456, 220, 221, 222, 223, 224, 225, 226, 227, 230, 231, 232, 233, 234, 237, 676, 677, 678 series, manifolds 670, 671, 662, 663, 668.S1, 664, 665 series and unit 171, 182 series.

PATENT

Ambient temperature range: 0–50 °C

Protection class: IP 40

Supply cable length: 0,8 m

Starting current: ≤ 1 A

Code	Electric supply		
656302	230 V AC	1	10
656304	24 V AC/DC	1	10

6563

Thermo-electric actuator **with low power consumption, with auxiliary microswitch. With opening position indicator.**

Ambient temperature range: 0–50 °C

Running power consumption: 3 W

Protection class: IP 40

Supply cable length: 0,8 m

Starting current: ≤ 250 mA

Code	Notes	Electric supply		
656354	-	24 V AC/DC	1	10
656344	without auxiliary microswitch	24 V AC/DC	1	10

**Thermo-electric actuator
- push fit connection**

6562

Thermo-electric actuator.
With opening position indicator.
Normally closed.
Quick coupling installation, with a clip adapter.
For valves 116, 338, 339, 401, 402, 425, 426, 421, 422, 455, 456, 220, 221, 222, 223, 224, 225, 226, 227, 230, 231, 232, 233, 234, 237, 676, 677, 678 series, manifolds 670, 671, 662, 663, 668.S1, 664, 665 series and unit 171, 182 series.

Ambient temperature range: 0–50 °C
Protection class: IP 54
Supply cable length: 0,8 m
Starting current: ≤ 1 A

Code	Electric supply		
656202	230 V AC	1	10
656204	24 V AC/DC	1	10

6562

Thermo-electric actuator **with opening position indicator.**
Normally closed.
Quick coupling installation, with a clip adapter.
For valves 116, 338, 339, 401, 402, 425, 426, 421, 422, 455, 456, 220, 221, 222, 223, 224, 225, 226, 227, 230, 231, 232, 233, 234, 237, 676, 677, 678 series, manifolds 670, 671, 662, 663, 668.S1, 664, 665 series and unit 171, 182 series.

With auxiliary microswitch.
Ambient temperature range: 0–50 °C
Protection class: IP 54
Supply cable length: 0,8 m
Auxiliary microswitch contact rating (230 V): 0,8 A
Starting current: ≤ 1 A

Code	Electric supply		
656212	230 V AC	1	10
656214	24 V AC/DC	1	10

6564

Thermo-electric actuator **with low power consumption.**
With opening position indicator.
Normally closed.
Quick coupling installation, with a clip adapter.

Ambient temperature range: 0–50 °C
Protection class: IP 54
Supply cable length: 0,8 m
Starting current: ≤ 250 mA

Code	Electric supply		
656402	230 V AC	1	10
656404	24 V AC/DC	1	10

6564

Thermo-electric actuator **with low power consumption, with auxiliary microswitch.**
With opening position indicator.
Normally closed.
Quick coupling installation, with a clip adapter.
With auxiliary microswitch.

Ambient temperature range: 0–50 °C
Protection class: IP 54
Supply cable length: 0,8 m
Auxiliary microswitch contact rating (230 V): 0,8 A
Starting current: ≤ 250 (230 V) mA

Code	Electric supply		
656412	230 V AC	1	10
656414	24 V AC/DC	1	10

Control bar

6205

Control bar.
Timer switch input.
Pump outlet control.
SUMMER - WINTER switch input.

Electric supply: 230 V AC
Running power consumption: 5,5 VA
Protection class: IP 30 (with rubber cable gland)
Contact rating on switch-over: 10 A

Code	Notes		
620542	4 channels	1	8
620582	8 channels	1	8

INSPECTION WALL BOXES AND WALL PORTS

Boxes for distribution manifolds from 110 to 140 mm

659

Inspection wall box with adjustable depth (110-140 mm).

Material: painted metal sheet

Code	Height (mm)	Width (mm)	Depth (mm)		
659044	500	400	110-140	1	-

Boxes for distribution manifolds from 80 to 120 mm

659

Inspection wall box with adjustable depth (80-120 mm).

Complete with specific support for manifold brackets.

Closure with a push-fit clamp.

For distribution manifolds 349, 350, 592, 662, 671, 664 and 665 series.

Material: painted metal sheet

COMPONENTS FOR DOMESTIC WATER SYSTEM

Diagrams made with BIM families: bim.caleffi.com

- Pressure reducing valves**
- Thermostatic mixing valves**
- Electronic mixing valves**
- Thermostatic regulator for domestic hot water recirculation circuits**
- Manifolds for domestic water systems**
- Safety groups for domestic water systems**
- Safety relief valves for domestic water systems**
- Control devices for domestic water systems**
- Check valves**

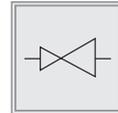

COMPONENTS FOR DOMESTIC WATER SYSTEMS

Modern domestic cold and hot water distribution systems need special protective and control devices, which are chosen according to the intended use and security level to be guaranteed for the utilities. Depending on the application type, for example home, commercial or public use, different rules are used to dimension systems, and they are fitted with different equipment. Below we describe the most important device classifications to help make the right choice.

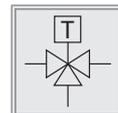

Pressure adjustment

- Pressure reducing valves

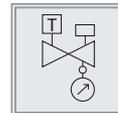

Temperature adjustment

- Thermostatic and electronic mixing valves

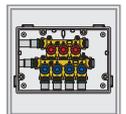

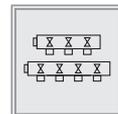

Flow rate adjustment

- Thermostatic regulator for recirculation circuits

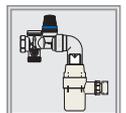

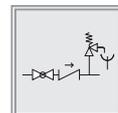

Cold and hot water distribution

- Distribution manifolds

Safety and protection of hot water storage

- Anti-scale device - Safety groups - Safety valves - Expansion vessels

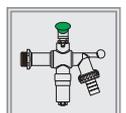

Water hammer phenomenon

- Water hammer arrester

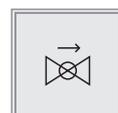

Antifreeze protection

- Shut-off cock with antifreeze safety device

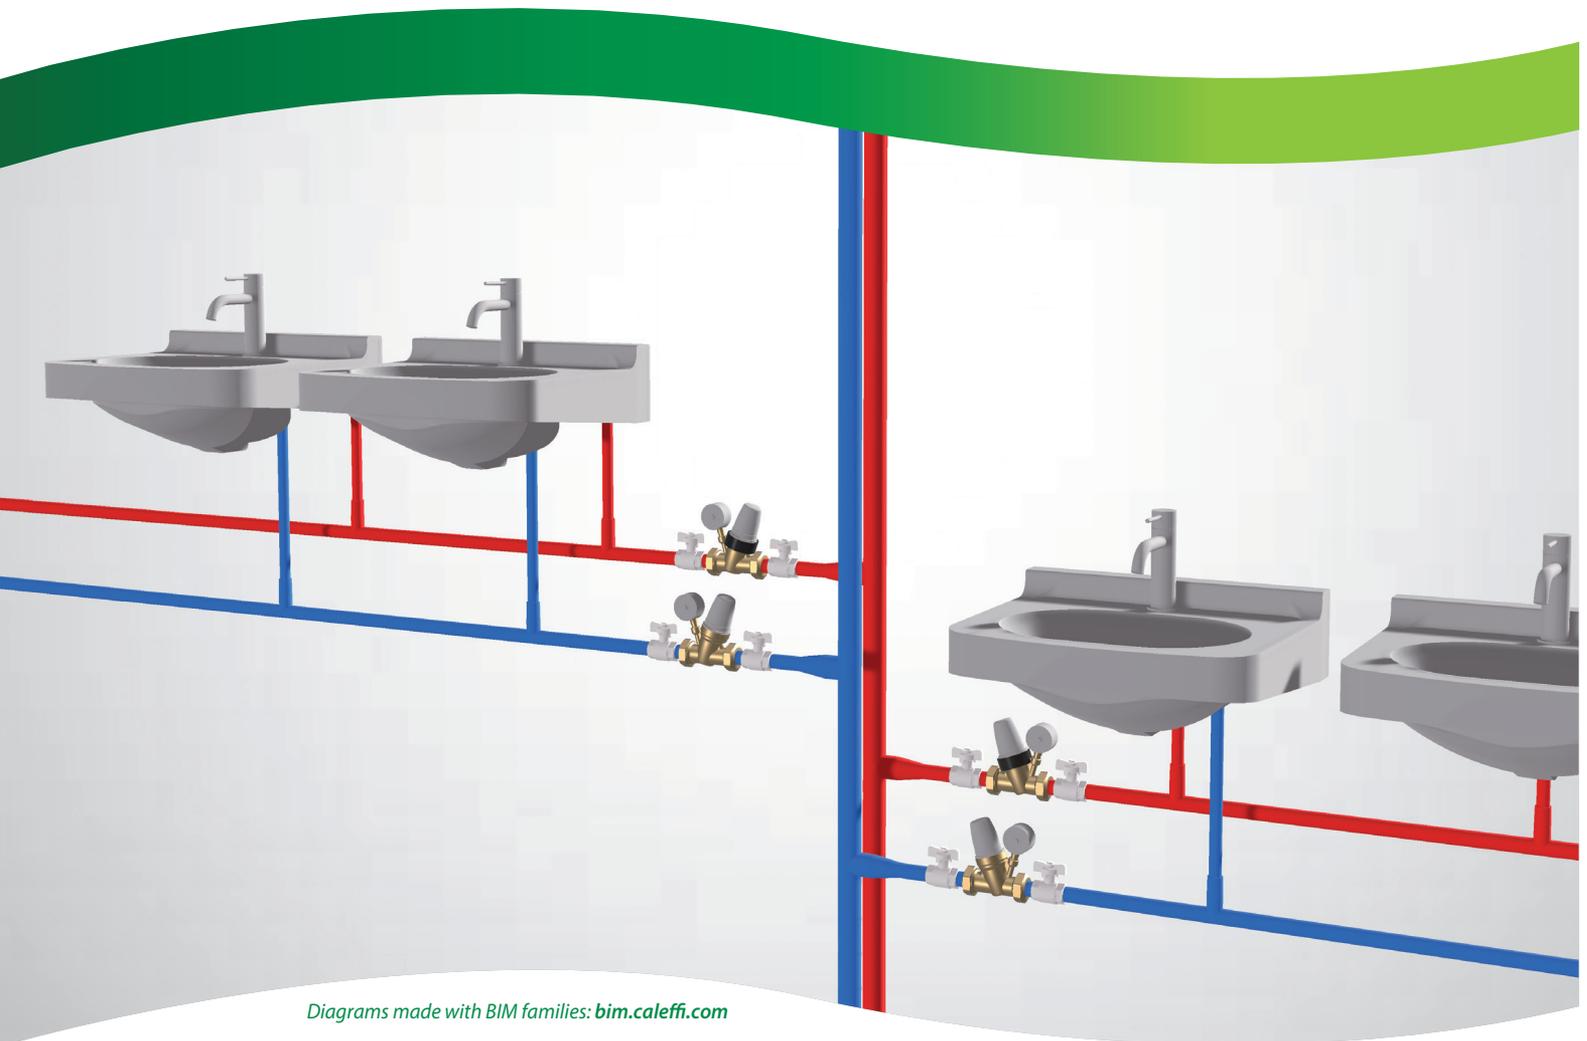

Shut off medium

- Ball valves with built-in check valve

PRESSURE REDUCING VALVES

Diagrams made with BIM families: bim.caleffi.com

- Micro pressure reducing valves**
- Compact pressure reducing valves**
- Compact pressure reducing valves for high temperature**
- Pre-adjustable pressure reducing valves**
- Pre-adjustable pressure reducing valves for high temperature**
- Standard pressure reducing valves for high temperature**
- Spare parts for pressure reducing valves**
- Pressure reducing valves for first stage control**
- Pressure reducing valves for high-rise building**
- Pressure reducing and stabilising valves**
- Combined group for pressure control**
- Combined group for pressure and temperature control**
- Accessories for combined group for pressure control**

Domestic Water Sizer

PRESSURE REDUCING VALVES

Micro pressure reducing valves

533...H

Inclined micro pressure reducing valve for special applications: for dispensing water, beverages and coffee machines. Replaceable cartridge and strainer. Certified to EN 1567. PATENT PENDING

Maximum upstream pressure: 16 bar
Adjustment pressure range: 0,8–4 bar
Maximum recommended flow rate: 6 l/min
Medium temperature range: 2–80 °C
Material: dezincification resistant brass DR "low lead"

Code	Notes		
533230H	with pressure gauge 0–10 bar	1	20
533430H	-	1	20

Pressure gauge for 533H series inclined micro pressure reducing valves for special applications

and 539H combined group.

Code	Connection		
F0002665	1/4" M radial connection	1	-

Compact pressure reducing valves

5330

Inclined pressure reducing valve. Replaceable cartridge and strainer.

Maximum upstream pressure: 16 bar
Adjustment pressure range: 1–6 bar
Medium temperature range: 2–40 °C
Material: brass
Finish: nickel plated

Code	Connection		
533041	1/2" F	1	20
533051	3/4" F	1	20

5331

Inclined pressure reducing valve for safety group. Replaceable cartridge and strainer.

Maximum upstream pressure: 16 bar
Adjustment pressure range: 1–6 bar
Medium temperature range: 2–40 °C
Material: brass
Finish: nickel plated

Code	Connection 1	Connection 2		
533151	3/4" M	3/4" F captive nut	1	25

5332

Inclined pressure reducing valve, with 0–10 bar pressure gauge. Replaceable cartridge and strainer.

Maximum upstream pressure: 16 bar
Adjustment pressure range: 1–6 bar
Medium temperature range: 2–40 °C
Material: brass
Finish: nickel plated

Code	Connection		
533241	1/2" F	1	20
533251	3/4" F	1	20

5334

Inclined pressure reducing valve, with pressure gauge connection.
Replaceable cartridge and strainer.
With 1/4" F pressure gauge connection.

Maximum upstream pressure: 16 bar
Adjustment pressure range: 1–6 bar
Medium temperature range: 2–40 °C
Material: brass
Finish: nickel plated

Code	Connection		
533441	1/2" F	1	20
533451	3/4" F	1	20
533461	1" F	1	25

5338

Inclined pressure reducing valve with compression ends.
Replaceable cartridge and strainer.
With pressure gauge: 0–10 bar.

Maximum upstream pressure: 16 bar
Medium temperature range: 2–40 °C
Adjustment pressure range: 1–6 bar
Material: dezincification resistant brass DR
Finish: nickel plated

Code	Connection		
533841	Ø 15	1	20
533851	Ø 22	1	20

5336

Inclined pressure reducing valve with compression ends.
Replaceable cartridge and strainer.

Maximum upstream pressure: 16 bar
Medium temperature range: 2–40 °C
Adjustment pressure range: 1–6 bar
Material: dezincification resistant brass DR
Finish: nickel plated

Code	Connection		
533641	Ø 15	1	25
533651	Ø 22	1	25

5339

Inclined pressure reducing valve with compression ends and built-in safety relief valve.
Replaceable cartridge and strainer.
Pressure reducing valve.
Safety relief valve.
With stainless steel seat.

Maximum upstream pressure: 1600 kPa
Medium temperature range: 2–40 °C
Adjustment pressure range: 100–600 kPa
Material: dezincification resistant brass DR

Code	Connection		
533944	Ø 15	1	25
533954	Ø 22	1	25

5337

Inclined pressure reducing valve with compression ends.
Replaceable cartridge and strainer.
With 1/4" F pressure gauge connection.

Maximum upstream pressure: 16 bar
Medium temperature range: 2–40 °C
Adjustment pressure range: 1–6 bar
Material: dezincification resistant brass DR
Finish: nickel plated

Code	Connection		
533741	Ø 15	1	20
533751	Ø 22	1	20

Compact pressure reducing valves for high temperature

5330..H

Inclined pressure reducing valve. Replaceable cartridge and strainer. For high temperature. **Certified to EN 1567.**

Maximum upstream pressure: 16 bar
Medium temperature range: 2–80 °C
Adjustment pressure range: 1–5,5 bar
Material: brass
Finish: nickel plated

536591	2" M	with double pressure gauge in glycerine bath	1	-

5366

Pressure reducing valve with replaceable cartridge and flanged connections, PN 16. To be coupled with flat counterflanges EN 1092-1. With stainless steel double pressure gauge in glycerine bath:
- 0–25 bar upstream;
- 0–10 bar downstream.

Maximum upstream pressure: 16 bar
Adjustment pressure range: 0,5–6 bar
Medium temperature range: 2–80 °C
Material: bronze

Code	Connection		
536660	DN 65 - PN 16	1	-

539

Pressure reducing valve. Complete with two 3/4" x 1/2" fittings. With double 1/4" F pressure gauge connection. Certified to EN 1567.

Maximum upstream pressure: 25 bar
Adjustment pressure range: 1–5,5 bar
Medium temperature range: 2–80 °C
Material: dezincification resistant brass DR

Code	Connection		
539250	3/4" M	1	5

537
Soldering union connections.

Code	Inlet connection	Outlet connection

Pressure reducing valves for high-rise building

5335..HS

Inclined pressure reducing valve. Replaceable cartridge and strainer. For applications with higher pressure reduction ratio in hot and cold water distribution system.

Maximum upstream pressure: 2000 kPa
Medium temperature range: 2–80 °C
Adjustment pressure range: 1–6 bar
Material: dezincification resistant brass DR “low lead”

Code	Connection		
533545HS AUS	Rp 1/2" F	1	25
533555HS AUS	Rp 3/4" F	1	25

Pressure reducing and stabilising valves

576

Pressure reducing valve. To be coupled with flat counterflanges EN 1092-1. Complete with two pressure gauges.

Adjustment pressure range: 2–14 bar
Medium temperature range: 1–60 °C
Material: cast iron

Code	Connection	Maximum upstream pressure (bar)		
576062	DN 65 - PN 16	16	1	-

Combined group for pressure control

539...H

Combined group for pressure control in domestic water systems.
 Replaceable cartridge.
 For high temperature.
 Shut-off valve with extended lever.
 EA type check valve.
 With G 1/4" upstream and downstream pressure test ports.
Pressure reducing valve certified to EN 1567.
Check valve certified to EN 13959.

PATENT PENDING

Maximum upstream pressure: 16 bar
 Adjustment pressure range: 1–5,5 bar

5201

Control unit for domestic hot water temperature at the point of distribution, complete with recirculation connection.
Complete with:
- thermostatic mixing valve with thermal shut-off function;
- tee for cold water connection complete with check valves
- kit for recirculation connection complete with check valves;
- shut-off valves;
- temperature gauge with pocket on the mixed water outlet.
Mixing valve certified to EN 1111 and EN 1287.

Maximum working pressure: 10 bar
Medium temperature range: 2–90 °C
Material: dezincification resistant brass DR "low lead"

Code	Inlet connection	Outlet connection	DN	Adjustment temperature (°C)	Kv (m³/h)		
520155	3/4" F	3/4" F	DN 20	35–65	1,7	1	-

Combined group for pressure and temperature control

539...H

Combined group for pressure and temperature control in domestic water systems.

Complete with:

- 539H series combined unit, cold water circuit;
- 539H series combined unit, hot water circuit;
- adjustable thermostatic mixing valve with advanced thermal performance and anti-scale function;
- connection tee complete with check valve;
- pressure gauges (optional).

Thermostatic mixing valve certified to EN 1111 and EN 1287.

Maximum working pressure: 10 bar
Medium temperature range: 2–80 °C
Material: dezincification resistant brass DR "low lead"

Thermostatic mixing valves with thermal disinfection

6005 LEGIOFLOW®

Multi-function compact unit for temperature control, thermal disinfection and distribution for domestic water system.

Complete with:

- **anti-scald** thermostatic mixing valve;
- flushing valve for **thermal disinfection**, with normally closed **thermo-electric actuator**;
- ball shut-off valve with built-in strainers and check valves;
- **outlet kit for cold water circuit**.

Note (*): without thermo-electric actuator.

Performance according to the NF 079 doc. 8, EN 1111 and EN 1287 standards.
PATENT

Maximum working pressure: 10 bar
Medium temperature range: 5–85 °C
Adjustment temperature range: 30–50 °C
Electric supply: 230 V AC
Running power consumption: 3 W
Protection class: IP 44
Supply cable length: 0,8 m
Material: dezincification resistant brass DR
Temperature setting: 43 °C

ELECTRONIC MIXING VALVES

Hybrid electronic mixing valves

6000 LEGIOMIX® 2.0

Hybrid electronic mixing valve.
Complete with:
- hybrid mixing valve with motorised actuator;
- electronic regulator with programming of temperature levels and thermal disinfection cycles, built into the actuator casing;
- integrated flow temperature probe;
- circuit return temperature probe;
- flow temperature gauge.

Fitted for data saving function (optional), with recording of temperatures and functional parameters.

Fitted for connection to remote control system (optional).
PATENT PENDING

Maximum working pressure: 10 bar
Medium temperature range: 5–90 °C
Adjustment temperature range: 35–65 °C
Disinfection temperature range: 50–85 °C
Electric supply: 230 V AC
Protection class: IP 54
Material: dezincification resistant brass DR

6000 LEGIOMIX® 2.0

RS-485 USB cable and Caleffi Software. Using the cable with RS-485 USB interface and the Caleffi Software included in the package, it is possible to manage the device from PC.

The two software programs can manage LEGIOMIX® 24 V and LEGIOMIX® 2.0 mixers.

Electronic mixing valve with thermal disinfection - 230 V

6000 LEGIOMIX®

Electronic mixing valve with programmable thermal disinfection and check on disinfection, 230 V. Male threaded connections with union. Female threaded mixed connection.

- Complete with:
- three-way ball valve;
 - actuator;
 - regulator;
 - flow temperature probe;
 - return temperature probe.

PATENT

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Adjustment temperature range: 20–85 °C
 Disinfection temperature range: 40–85 °C
 Electric supply: 230 V AC
 Running power consumption: (6,5+6) VA
 Protection class: IP 65 (actuator)
 Material: brass

6000 LEGIOMIX®

Electronic mixing valve with programmable thermal disinfection and check on disinfection, 230 V. Flanged connection.

To be coupled with flat counterflanges EN 1092-1.

- Complete with:
- three-way ball valve;
 - actuator;
 - regulator;
 - flow temperature probe;
 - return temperature probe.

PATENT

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Adjustment temperature range: 20–85 °C
 Disinfection temperature range: 40–85 °C
 Electric supply: 230 V AC
 Running power consumption: (6,5+10,5) VA

Electronic mixing valve with thermal disinfection - 24 V

6000 LEGIOMIX®

Electronic mixing valve with programmable thermal disinfection and check on disinfection, 24 V. Male threaded connections with union. Female threaded mixed connection.

Complete with:

- three-way ball valve;
- actuator;
- regulator;
- flow temperature probe;
- return temperature probe.

Fitted for remote control connection with RS-485 and MODBUS-RTU protocols.

With auxiliary microswitch. PATENT

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Adjustment temperature range: 20–85 °C
 Disinfection temperature range: 40–85 °C
 Electric supply: 24 V AC
 Running power consumption: (6,5+6) VA
 Protection class: IP 65 (actuator)
 Material: brass

6000 LEGIOMIX®

Electronic mixing valve with programmable thermal disinfection and check on disinfection, 24 V. Flanged connection PN 16.

To be coupled with flat counterflanges EN 1092-1.

Complete with:

- three-way ball valve;
- actuator;
- regulator;
- flow temperature probe;
- return temperature probe.

Fitted for remote control connection with RS-485 and MODBUS-RTU protocols.

With auxiliary microswitch. PATENT

Maximum working pressure: 10 bar

7550

BACnet/Modbus-RTU converter for connection with BMS systems.

Pre-configured for communication with:

- CONTECA EASY heat meters and AQUAPRO EASY data acquisition devices (max. 35 devices).
- LEGIOMIX (max. 32 devices) and LEGIOMIX 2.0 (max. 25 devices) electronic mixing valves.

To be mounted on DIN rail.

Ambient temperature range: -20–70 °C
 Electric supply: 12-24 V DC, 24 V AC
 Running power consumption: 3 W

Code	Notes		
755052		1	-

Advanced electronic mixing valve with connectivity

6003 LEGIOMIX® evo

Advanced electronic mixing valve with programmable thermal disinfection. **With connectivity.** Male threaded connections with union. Female threaded mixed connection.

Notes:

- **A: 3-point control signal**
- **B: 0-10 V control signal with failsafe**

Material: dezincification resistant brass DR "low lead" (24 V version)

Material: brass (230 V version)

Complete with:

- three-way ball valve;
 - actuator;
 - regulator;
 - flow temperature probe;
 - return temperature probe;
 - storage temperature probe (optional code 600003).
- PATENT

Maximum working pressure: 10 bar
 Medium temperature range: 5–100 °C
 Adjustment temperature range: 20–85 °C
 Disinfection temperature range: 40–85 °C
 Running power consumption: (9+6) VA

6000

Storage temperature probe for electronic mixing valve 6003 series.

Code		
600003	1	-

Main specification

- Application in systems with high flow rates
- Ball mixing valve
- Programmable thermal disinfection
- Connectivity with Caleffi Cloud (via integrated ModBus or Bacnet) for remote control
- Easy to use via touchscreen
- Failsafe function in the event of electricity supply failure
- Recirculation pump management
- Three temperature probes: mixed, return and storage

Function

The electronic mixing valve is used in centralised systems, of any size, that produce and distribute domestic hot water. With fully electronic operation, the regulator and actuator are separate devices to allow optimum positioning in the central unit and the relevant programming management. The regulator is also designed for installation with previous versions of LEGIOMIX electronic mixing valves. Retrofitting is possible both if you decide to improve the functions of an existing mixing valve by installing an advanced regulator, and if it becomes necessary to replace the previous regulator due to a malfunction.

Failsafe function

The Failsafe function built into specific actuators allows automatic closure of the hot line to avoid endangering the system and users in the event of a power failure.

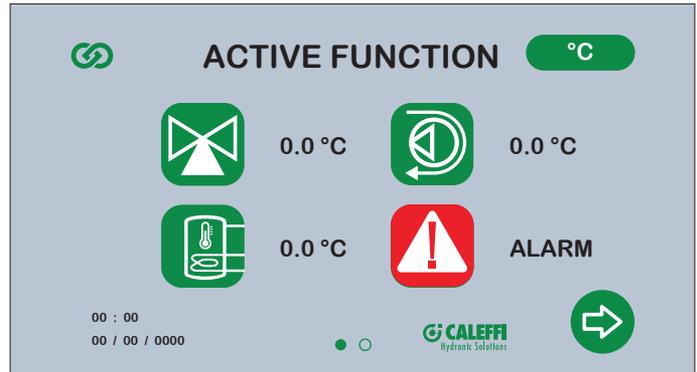

Recirculation pump management

The regulator can be used to set time bands for recirculation pump activation only when actually necessary, in order to optimise electricity and thermal energy consumption.

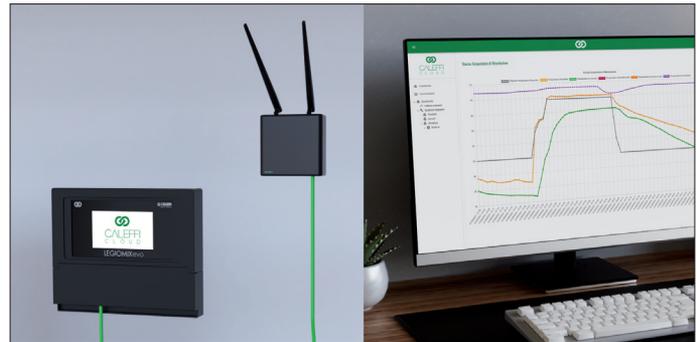

Touchscreen display

The large touchscreen display makes it easy and intuitive to adjust all regulator settings and to read the data required to ensure the system is working properly.

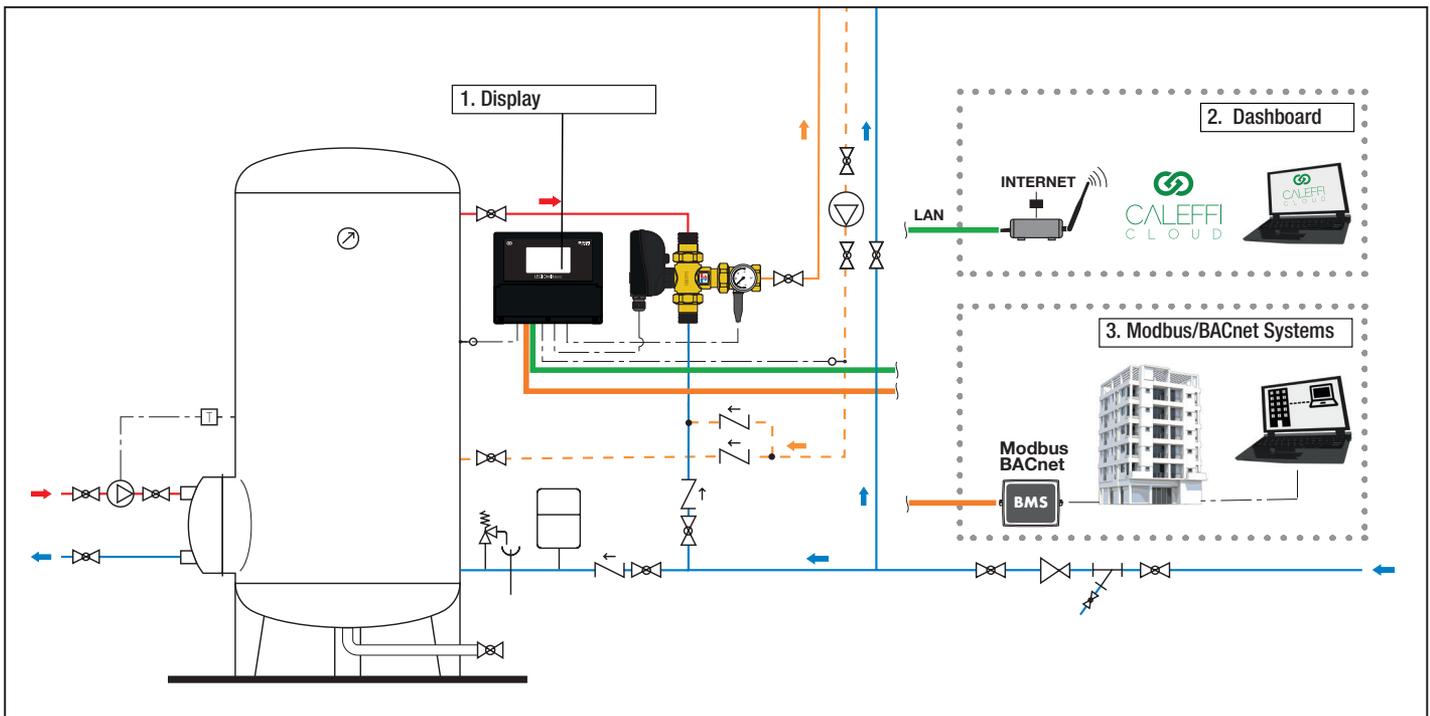

Display log and dashboard

LEGIOMIX evo can be used to manage all settings and to view all temperature and disinfection logs directly via the regulator display. When the device is online, the Caleffi cloud can be accessed and a dedicated dashboard provides the option of viewing detailed graphs and tables, as well as managing all regulator settings.

MANIFOLDS FOR DOMESTIC WATER SYSTEMS

Distribution manifolds with individual shut-off valves

359

Domestic water distribution manifolds pre-assembled in boxes **with individual shut-off valves**.

Complete with:
 - pair of manifolds with shut-off knobs;
 - box for manifolds (270 x 190 x 80 mm) complete with supports for manifolds and fixing brackets;
 - protection cover for mounting;
 - 2 end fitting caps with fixing clips.
 PATENT PENDING

Maximum working pressure: 10 bar
 Medium temperature range: 5–90 °C
 Outlet centre distance: 35 mm
 Material: brass

Code	Hot outlet connection	Cold outlet connection

359

Multi-grip press fittings for multi-layer pipes with fixing clip.

Code	Connection	Notes		
359024	Ø 16x2 compression ends	-	1	10
359064	Ø 20x2 compression ends	-	1	10
359025	Ø 16x2,25 compression ends	-	1	10
359065	Ø 20x2,25 compression ends	-	1	10
359066	Ø 20x2,5 compression ends	-	1	10
359087	Ø 26x3 compression ends	only with H - TH profile crimp tool	1	10

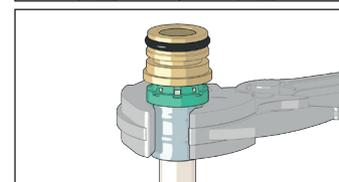

Can be used with H - TH - U profile crimp tool.
To use these fittings correctly, the multi-layer pipe must be calibrated with a Caleffi 679 series gauge before use.

Calibrator 679 series page 107

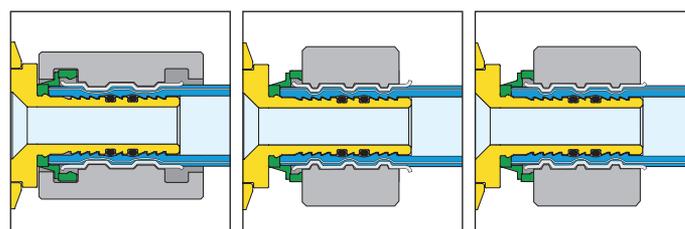

After calibrating the pipe with the calibrator, fit the pipe onto the fitting, taking care to insert it as far as it will go. Check the pipe position through the peepholes.

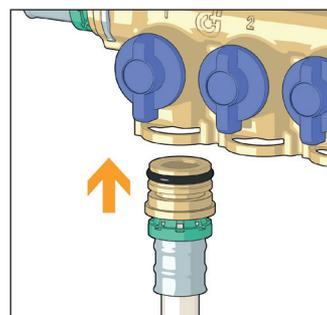

Crimp the pipe with the crimp tool until it clicks automatically.

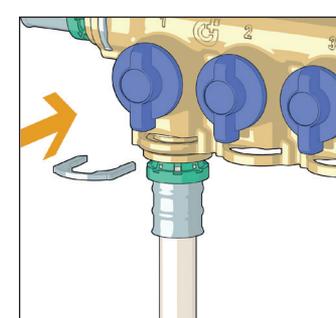

TH profile crimp tool U profile crimp tool H profile crimp tool

Insert the pipe complete with fitting into the seat on the manifold.

Fasten it with the dedicated fixing clip.

See page 162 for actuators

Accessories for modular manifolds

359

Manifold with individual shut-off valves (red knobs).

Code	Outlet connection		
359330	- 3 out., clip connection	1	-

Code		
F0002304	1	-

Characteristic components

1. Body
2. Outer protection cover
3. Internal elements
4. Filter
5. Transparent filter container
6. Magnet
7. Pressure drain plug

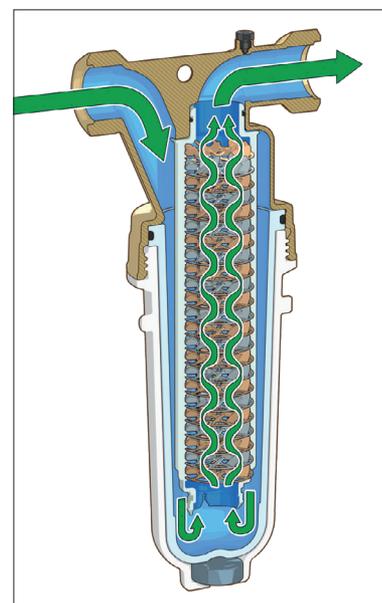

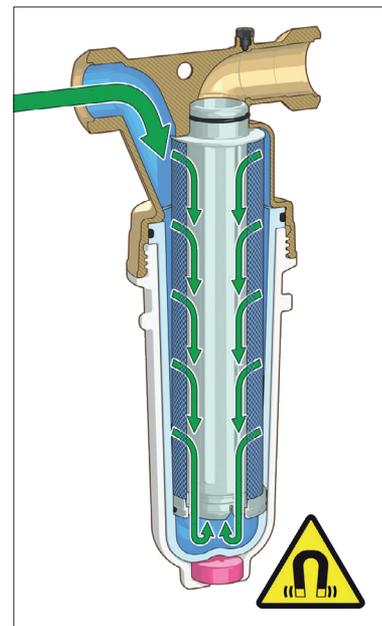

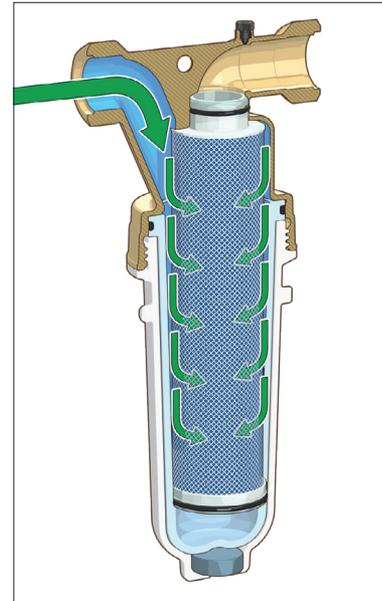

Operating principle

Device operation is divided into three phases:

1) The water enters the device and passes through the filter mesh, which retains the impurities by mechanically selecting the particles according to their size. The large filter mesh surface with a mesh size of 50 µm makes the device less prone to clogging.

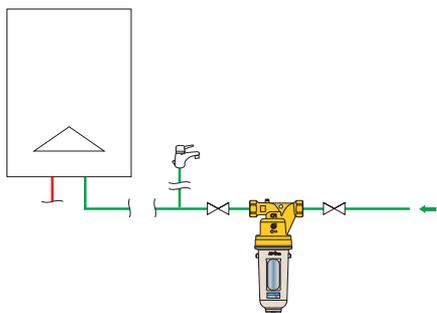

2) The water is channelled towards to bottom of the device, where the magnet is located. The magnet, which does not come into direct contact with the water, captures and retains the ferromagnetic impurities and helps to improve the efficiency of the device. The flow is reversed at the bottom and all the water is therefore channelled into the cartridge.

3) The water passes through the centre of the cartridge and comes into contact with the internal elements (Cu alloy - Zn/Ti), where the battery effect and vortex effect cause the first aragonite crystals to form.

BACKFLOW PREVENTION DEVICES

Diagrams made with BIM families: bim.caleffi.com

Backflow prevention devices
Strainers
Check valves

The following pages are extracted from the specific Monographic Guide, which concerns the problem of pollution of water supplies from backflow and presents the range of Caleffi products specifically designed to prevent this problem. The materials of the components and their performance characteristics meet the specific regulatory and safety requirements of water supply systems.

POLLUTION OF WATER SUPPLIES - NORMATIVE REFERENCES

Pollution is defined as any relative degradation of the quality of potable water.

European standard **EN 1717:2000** "Protection against pollution of potable water in water installations and general requirements of devices to prevent pollution by backflow" is the reference point as regards the prevention of pollution of public water supplies caused the backflow of fluid from private systems downstream.

The above standard is applied in conjunction with **EN 806:2012** "Specifications for installations inside buildings conveying water for human consumption." that indicates the requirements for design, operation and maintenance.

Both these European reference standards should be applied in conjunction with the applicable national standards and regulations.

Installations must be designed and maintained in such a way that they do not cause pollution of the public water supply or of the internal system by backflow of any type of substance considered hazardous.

The standard **EN 1717** classifies fluids contained in installations into five categories according to the degree of risk they pose to human health; these categories range from 1, with no human health hazard, to 5, the most hazardous.

Category 1:

Water to be used for human consumption coming directly from a potable water distribution system.

Category 2:

Fluid presenting no human health hazard, as per 1, the quality of which can have undergone a change in taste, odour, colour or temperature.

Category 3:

Fluid representing some human health hazard due to the presence of one or more harmful substances.

Category 4:

Fluid presenting a human health hazard due to the presence of one or more "toxic" or "very toxic" substances or one or more radioactive, mutagenic or carcinogenic substances.

Category 5:

Fluid presenting a human health hazard due to the presence of micro-biological or viral elements.

According to this classification, suitable backflow prevention devices must be fitted in water distribution circuits.

EN 1717 lists the operating principle and minimum requirements of devices designed to protect the public water supply from the backflow of fluids belonging to one of these five categories.

Protection devices are grouped in eight Families, identified by the letters A, B, C, D, E, G, H, L, each of which may have one or more variants called Types, also identified with the letters A, B, C, or D. EN 1717 specifies for each Type of device the minimum and maximum fluid category and the conditions in which it may be used for to protect the installation against backflow.

The sequence of appliances, including protection device, filters, check valves, shut-off valves, pressure test ports, air gaps, etc. that together comprise the backflow protection, is defined as the **Protection Unit**.

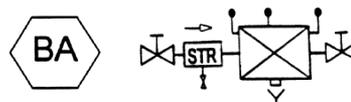

The Protection Point is defined as the point in the system in which the Protection Unit is applied.

The generic symbol used in EN 1717 to identify the Protection Unit is a hexagon containing the letters indicating the protection Family and Type, as shown in the following figure:

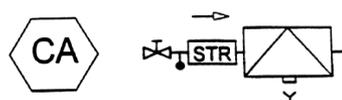

Here below are some examples of Protection Units with the relative sequences of devices required by EN 1717.

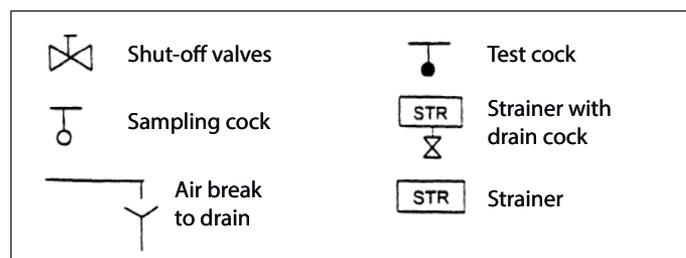

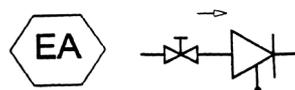

Protection unit: Family B, Type A

Protection unit: Family C, Type Aa

Protection unit: Family E, Type A

The indications in EN 1717 may be applied to all domestic, industrial/commercial and non domestic installations connected to the public potable water supply:

- domestic installations in residential or similar buildings, such as homes, hotels, schools, offices, hostels, etc.: kitchen sinks, hand basins, baths, showers, WCs, domestic hot water systems, domestic washing machines and dishwashers, garden irrigation systems, systems with low concentrations of additives that are not harmful to human health, such as water treatment, conditioning systems, etc.;
- in industrial and commercial installations the standard applies to all applications of potable water with similar use to a domestic installation, excluding therefore process water; also fire fighting, centralised heating or irrigation systems;
- non domestic installations for professional uses of water, for example, industries, commerce, agriculture, clinics, public and private swimming pools and thermal baths.

POLLUTION OF WATER SUPPLIES - NORMATIVE REFERENCES

Backflow

Potable water from the mains supply may be subject to pollution caused mainly by the contaminated fluids flowing back from plumbing installations connected directly to the mains supply. Backflow can be attributed to a variation in the pressure difference that causes a consequent inversion of the normal direction of flow at certain point of the installation. This phenomenon, termed “backflow”, occurs when:

- a) the pressure in the mains system is less than that in the plumbing circuit receiving the supply (back syphonage). This situation can occur, for example, due to a break in the pipework of the mains supply and the consequent maintenance work, or when significant quantities of water are drawn by other users connected upstream, such as fire-fighting systems.
- b) the pressure in the plumbing circuit receiving the supply rises (back pressure) due, for example, to water being pumped from a well.

Risk assessment

Given the potential dangers of the phenomenon and the requirements of current regulations, the risk of pollution caused by backflow must be assessed on the basis of the type of system and the characteristics of the fluid that flows inside it.

A suitable backflow prevention device must be selected on the basis of the assessment performed by the system designer and the mains supplier. The device must be located along the supply line at the points at risk of backflow which would be hazardous to human health.

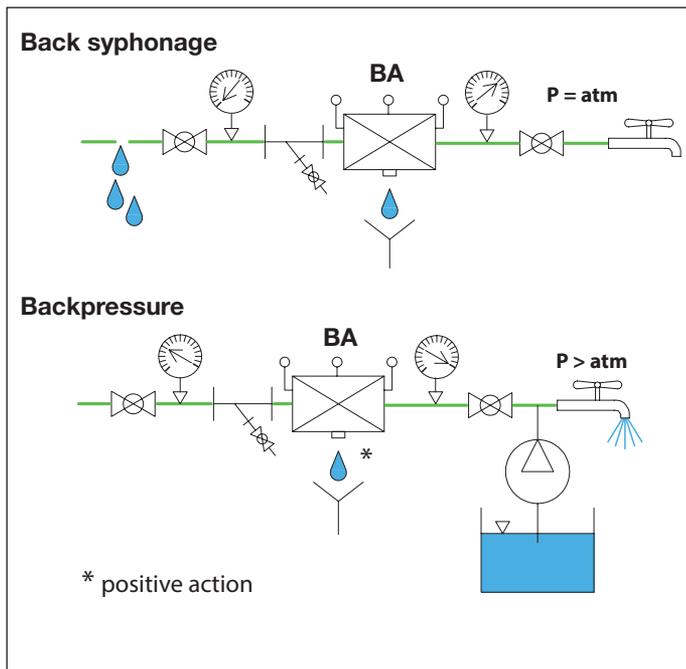

In addition to consultation of the European standard EN 1717, it is always necessary to consult the water supplier and the specific national regulations as, depending the type of installation, there may be more restrictive or more permissive derogations from the European standard.

In situations where there are fluids present that pose different degrees of hazard, backflow prevention should consider the most hazardous of these fluids. In the case of fluids that are exceptionally hazardous, it will be necessary to assess additional technical parameters.

In the case of applications where it is not possible to verify the risk level, it is necessary to hypothesise the greatest risk. The “Protection Matrix” tables reported in the list Monographic Guide various types of installation and the corresponding fluid categories.

Protection Unit - Product standards - Caleffi devices

Tables 1 and 2 below list all the Protection Units defined in EN 1717, with the relative fluid categories, the product standards and the corresponding products in the Caleffi catalogue.

Devices	Category	Authorised level of the Protection Unit
Tap with spray outlet over handbasins, sinks, showers, baths; excluding WCs and bidets	5	Protection unit for category 2 and EB, ED, HC
Tub with water inlet below the rim of the tub (b)	5	Protection unit for category 3
Draw-off tap for hose connection (a b)	5	Protection unit for category 3
Over ground or in-ground irrigation system (b)	5	Protection unit for category 4

(a) Used for washing, cleaning or garden irrigation
 (b) The Protection Unit must be installed above the maximum operating level

Family Type	EN 1717 Protection unit	Fluid category					Product standard	Caleffi series
		1	2	3	4	5		
BA	Backflow preventer with controllable reduced pressure zone	•	•	•	•	-	EN 12729	580,574,575
CA	Backflow preventer with different non controllable pressure zones	•	•	•	-	-	EN 14367	573
EA	Controllable anti-pollution check valves from DN 6 to DN 250	•	•	-	-	-	EN 13959	3045, 3046
EB	Non-controllable anti-pollution check valves from DN 6 to DN 250			■			EN 13959	3047
EC	Controllable anti-pollution double check valves from DN 6 to DN 250	•	•	-	-	-	EN 13959	
ED	Non-controllable anti-pollution double check valves from DN 6 to DN 250			■			EN 13959	

Units with atmospheric vent must not be installed in zones at risk of flooding (for example, AA, BA, CA, GA, GB...)
 • Covers the risk - Does not cover the risk ■ Only for certain sanitary uses (see Table 2)

BACKFLOW PREVENTION DEVICES

CAb type backflow prevention devices

572

Non controllable backflow preventer with different pressure zones for wall mounted boilers.

CAb type.
Certified to EN 14367.

Medium temperature range: 5–40 °C
Nominal pressure: PN 10
Material: brass

Code	Connection		
572106	Ø 6 copper pipe connections	1	50

CAa type backflow prevention devices

573

Non controllable backflow preventer with different pressure zones.

CAa type.
Certified to EN 14367.

Medium temperature range: 5–65 °C
Nominal pressure: PN 10
Material: brass

Code	Connection		
573415	1/2" F	1	10
573515	3/4" F	1	10

573

Non controllable backflow preventer with different pressure zones. Normally closed model. With threaded outlet.

Medium temperature range: 5–65 °C
Nominal pressure: PN 10
Material: brass

Code	Connection		
573405	1/2" F	1	20
573505	3/4" F	1	20

BA type backflow prevention devices

574

Controllable, reduced pressure zone backflow preventer, compact version.
Upstream of the backflow preventer is mandatory to install a strainer 577 series. BA type.
Certified to EN 12729.

Differential operating pressure: 14 kPa
Medium temperature range: 5–65 °C
Nominal pressure: PN 10
Material: dezincification resistant brass DR "low lead"

Code	Connection		
574004	1/2" M	1	10

574

Controllable, reduced pressure zone backflow preventer, standard version.
Upstream of the backflow preventer is mandatory to install a strainer 577 series. BA type.
Certified to EN 12729.

Differential operating pressure: 14 kPa
Medium temperature range: 5–65 °C
Nominal pressure: PN 10
Material: dezincification resistant brass DR "low lead"

Code	Connection		
574040	1/2" M	1	-
574050	3/4" M	1	-
574006	1" M	1	-

574

Controllable, reduced pressure zone backflow preventer, standard version.
Upstream of the backflow preventer is mandatory to install a strainer 577 series. BA type.
Certified to EN 12729.

Differential operating pressure: 14 kPa
 Medium temperature range: 5–65 °C
 Nominal pressure: PN 10
 Material: dezincification resistant brass DR "low lead"

Code	Connection		
574600	1" M	1	-
574700	1 1/4" M	1	-
574008	1 1/2" M	1	-

575

Controllable, reduced pressure zone backflow preventer. Bronze body. Flanged connections.
 To be coupled with flat counterflanges EN 1092-1.
Upstream of the backflow preventer is mandatory to install a strainer 577 series. BA type.
Certified to EN 12729.

Differential operating pressure: 14 kPa
 Medium temperature range: 5–65 °C
 Nominal pressure: PN 10
 Material: bronze

Code	Connection		
575005	DN 50 - PN 10	1	-
575006	DN 65 - PN 10	1	-
575008	DN 80 - PN 10	1	-
575010	DN 100 - PN 10	1	-

574

Controllable, reduced pressure zone backflow preventer, standard version.
 Bronze body.
Upstream of the backflow preventer is mandatory to install a strainer 577 series. BA type.
Certified to EN 12729.

Differential operating pressure: 14 kPa
 Medium temperature range: 5–65 °C
 Nominal pressure: PN 10
 Material: bronze

Code	Connection		
574800	1 1/2" M	1	-
574900	2" M	1	-

5751

Controllable, reduced pressure zone backflow preventer, standard version.
 Flanged connections.
 To be coupled with flat counterflanges EN 1092-1.
BA type.
Upstream of the backflow preventer is mandatory to install a strainer 579 series.
Certified to EN 12729.

Differential operating pressure: 14 kPa
 Medium temperature range: 5–65 °C
 Nominal pressure: PN 10
 Material: cast iron
 Finish: coated

Code	Connection		
575105	DN 50 - PN 10	1	-
575106	DN 65 - PN 10	1	-
575108	DN 80 - PN 10	1	-
575110	DN 100 - PN 10	1	-

575

Controllable, reduced pressure zone backflow preventer.
To be coupled with flat counterflanges EN 1092-1.
Upstream of the backflow preventer is mandatory to install a strainer 579 series. BA type.
Certified to EN 12729.

Differential operating pressure: 14 kPa
Medium temperature range: 5–60 °C
Nominal pressure: PN 10
Material: cast iron
Finish: coated

Code	Connection		
575150	DN 150 - PN 16	1	-
575200	DN 200 - PN 16	1	-
575250	DN 250 - PN 16	1	-

Pre-assembled group with BA type backflow prevention device

570

Pre-assembled group, female connections.
Complete with:
- 574 series backflow preventer;
- 577 series strainer for backflow preventers;
- manual shut-off valves.

Medium temperature range: 5–65 °C
Nominal pressure: PN 10

Code	Connection		
570004	1/2" F	1	-
570005	3/4" F	1	-
570006	1" F	1	-
570007	1 1/4" F	1	-
570008	1 1/2" F	1	-
570009	2" F	1	-

570

Pre-assembled group, flanged connections.
To be coupled with flat counterflanges EN 1092-1.
Complete with:
- 5751 series backflow preventer;
- 579 series strainer for backflow preventers;
- manual shut-off valves.

Medium temperature range: 5–65 °C
Nominal pressure: PN 10

Code	Connection		
570050	DN 50 - PN 10	1	-
570060	DN 65 - PN 10	1	-
570080	DN 80 - PN 10	1	-
570100	DN 100 - PN 10	1	-

570

Pre-assembled group, flanged connections.
To be coupled with flat counterflanges EN 1092-1.
Complete with:
- 575 series backflow preventer;
- 579 series strainer for backflow preventers;
- manual shut-off valves.

Medium temperature range: 5–60 °C
Nominal pressure: PN 10

Code	Connection		
570150	DN 150 - PN 16	1	-
570200	DN 200 - PN 16	1	-
570250	DN 250 - PN 16	1	-

Spare parts for backflow prevention devices

Discharge device for backflow preventers 574 and 575 series.

Code	Article use		
59978	574004	1	-
59471	574040, 574050, 574006, 570004, 570005	1	-

BA type backflow prevention devices with cartridge

580

Backflow preventer with multifunction geometry. **BA type**. Threaded union connections. Complete with inlet strainer. For in-line, horizontal or vertical installation. **Certified to EN 12729.**

Medium temperature range: 5–65 °C
Nominal pressure: PN 10
Material: dezincification resistant brass DR

Code	Connection	Notes	DN		
580004	1/2" M	-	DN 15	1	5
580040	1/2" M	DN 20 cartridge	DN 15	1	5

580060	1" M	-	DN 25	1	-
580070	1 1/4" M	-	DN 32	1	-

580

Backflow preventer with multifunction geometry. **BA type**. Complete with isolating valve at the inlet and hose connection at the outlet. For vertical installation. Complete with strainer at the inlet. **Certified to EN 12729 and W570-3.**

Medium temperature range: 5–65 °C
Nominal pressure: PN 10
Material: dezincification resistant brass DR

Code	Inlet connection	Outlet connection	Notes	DN		
580240	1/2" M	3/4" M	DN 20 cartridge	DN 15	1	5
580250	3/4" M	3/4" M	-	DN 20	1	5

580

Backflow preventer with multifunction geometry. **BA type**. Complete with connection fitting to the tap at the inlet and hose connection at the outlet. Complete with strainer at the inlet. For vertical installation. **Certified to EN 12729 and Beschluss 4/2007.**

Medium temperature range: 5–65 °C
Nominal pressure: PN 10
Material: dezincification resistant brass DR

Code	Inlet connection	Outlet connection	DN		
580104	3/4" F captive nut	3/4" M	DN 15	1	5
580150	3/4" F captive nut	3/4" M	DN 20	1	5

STRAINERS

**Threaded filters for domestic hot water/
heating systems**

577

Y-strainer.
Filtering mesh in stainless steel AISI 304.

Medium temperature range: -20–110 °C
Maximum percentage of glycol: 30 %
Medium: water, glycol solutions
Material: bronze

Code	Connection	Strainer mesh size ø (mm)	Kv (m³/h)	PN		
577004	1/2" F	0,40	2,5	PN 16	1	
577005	3/4" F	0,40	3,9	PN 16	1	-

577030	3" F	0,53	73	PN 10	1	-

Flanged filters for domestic hot water systems

579

Y-strainer.
To be coupled with flat counterflanges EN 1092-1.
For backflow preventer 575 series and for pressure reducing valve 576 series.
Stainless steel mesh.
With drain cock.
Note (*): rhomboidal reinforcing mesh.

Maximum working pressure: 16 bar
Medium temperature range: 0–60 °C
Material: cast iron
Finish: coated

Code	Connection	Notes	Strainer mesh size ø (mm)	Kv (m³/h)

CHECK VALVES

EA type check valves with built-in shut-off valve

324

Anti-pollution check valve with built-in shut-off valve **EA type**.
Replaceable check valve cartridge.
Pressure test ports upstream and downstream.
Certified to EN 13959 e EN 13828.
PATENT PENDING

Maximum working pressure: 10 bar
Minimum check valve opening pressure: 0,5 kPa
Medium temperature range: 5–65 °C
Medium: domestic water
Material: dezincification resistant brass DR
"low lead"

Code	Connection	DN		
324140	1/2" M	DN 20 (check valve)	1	10
324150	3/4" M	DN 20 (check valve)	1	10

324

Anti-pollution check valve with built-in shut-off valve **EA type**.
Replaceable check valve cartridge.
Pressure test ports upstream and downstream.
Certified to EN 13959 e EN 13828.
PATENT PENDING

Maximum working pressure: 10 bar
Minimum check valve opening pressure: 0,5 kPa
Medium temperature range: 5–65 °C
Medium: domestic water
Material: dezincification resistant brass DR
"low lead"

Code	Inlet connection	Outlet connection	DN		
324250	3/4" F	3/4" M	DN 20	1	10

324

Anti-pollution check valve with built-in shut-off valve **EA type**.
Replaceable check valve cartridge.
Pressure test ports upstream and downstream.
Certified to EN 13959 e EN 13828.
PATENT PENDING

Maximum working pressure: 10 bar
Minimum check valve opening pressure: 0,5 kPa
Medium temperature range: 5–65 °C
Medium: domestic water
Material: dezincification resistant brass DR
"low lead"

Code	Connection	DN		
324110	Ø 15	DN 20	1	10
324120	Ø 22	DN 20	1	10

Pressure gauge for 533H series inclined micro pressure reducing valves for special applications

and 539H combined group.

Code	Connection		
F0002665	1/4" M radial connection	1	-

Ball valves with built-in check valves

3230 BALLSTOP

Ball valve with built-in check valve, female connections. Butterfly handle.

Maximum working pressure: 16 bar
Medium temperature range: 5–90 °C
Material: brass

Code	Connection		
323040	1/2" F	10	-
323050	3/4" F	10	-
323062	1" F	4	-

333 BALLSTOP

Ball valve with built-in check valve, female - captive nut connection. Drilled anti-tamper safety nut, butterfly handle.

Maximum working pressure: 16 bar
Medium temperature range: 5–90 °C
Material: brass

Code	Inlet connection	Outlet connection		
333400	1/2" F	3/4" F captive nut	10	-
333500	3/4" F	3/4" F captive nut	10	-

3230 BALLSTOP

Ball valve with built-in check valve, female connections. Lever handle.

Maximum working pressure: 16 bar
Medium temperature range: 5–90 °C
Material: brass

Code	Connection		
323060	1" F	4	-
323070	1 1/4" F	4	-
323080	1 1/2" F	2	-

334 BALLSTOP

Ball valve with built-in check valve, male - captive nut connection. Drilled anti-tamper safety nut, butterfly handle.

Maximum working pressure: 16 bar
Medium temperature range: 5–90 °C
Material: brass

Code	Inlet connection	Outlet connection		
334400	1/2" M	3/4" F captive nut	10	-
334500	3/4" M	3/4" F captive nut	10	-

332 BALLSTOP

Ball valve with built-in check valve, male - female connections. Butterfly handle.

Maximum working pressure: 16 bar
Medium temperature range: 5–90 °C
Material: brass

Code	Inlet connection	Outlet connection		
332400	1/2" M	1/2" F	10	-

Single and double check valve

**3037
ROBOCHECK-1**

15 mm single check valve with compression ends.

Maximum working pressure: 10 bar
Medium temperature range: 2–90 °C
Material: dezincification resistant brass DR
Finish: chrome plated

Code	Connection		
303715	Ø 15	10	100

**3038
ROBOCHECK-2**

15 mm controllable double check valve with compression ends.

Maximum working pressure: 10 bar
Medium temperature range: 2–90 °C
Material: dezincification resistant brass DR
Finish: chrome plated

Code	Connection		
303815	Ø 15	5	100

EA type check valves

3045

Check valve, female connections.
EA type.
Controllable.
Certified to EN 13959.

Maximum working pressure: 10 bar
Medium temperature range: 5–65 °C
Material: brass

Code	Connection		
304540	1/2" F	10	100
304550	3/4" F	10	50

Double check valve

3048

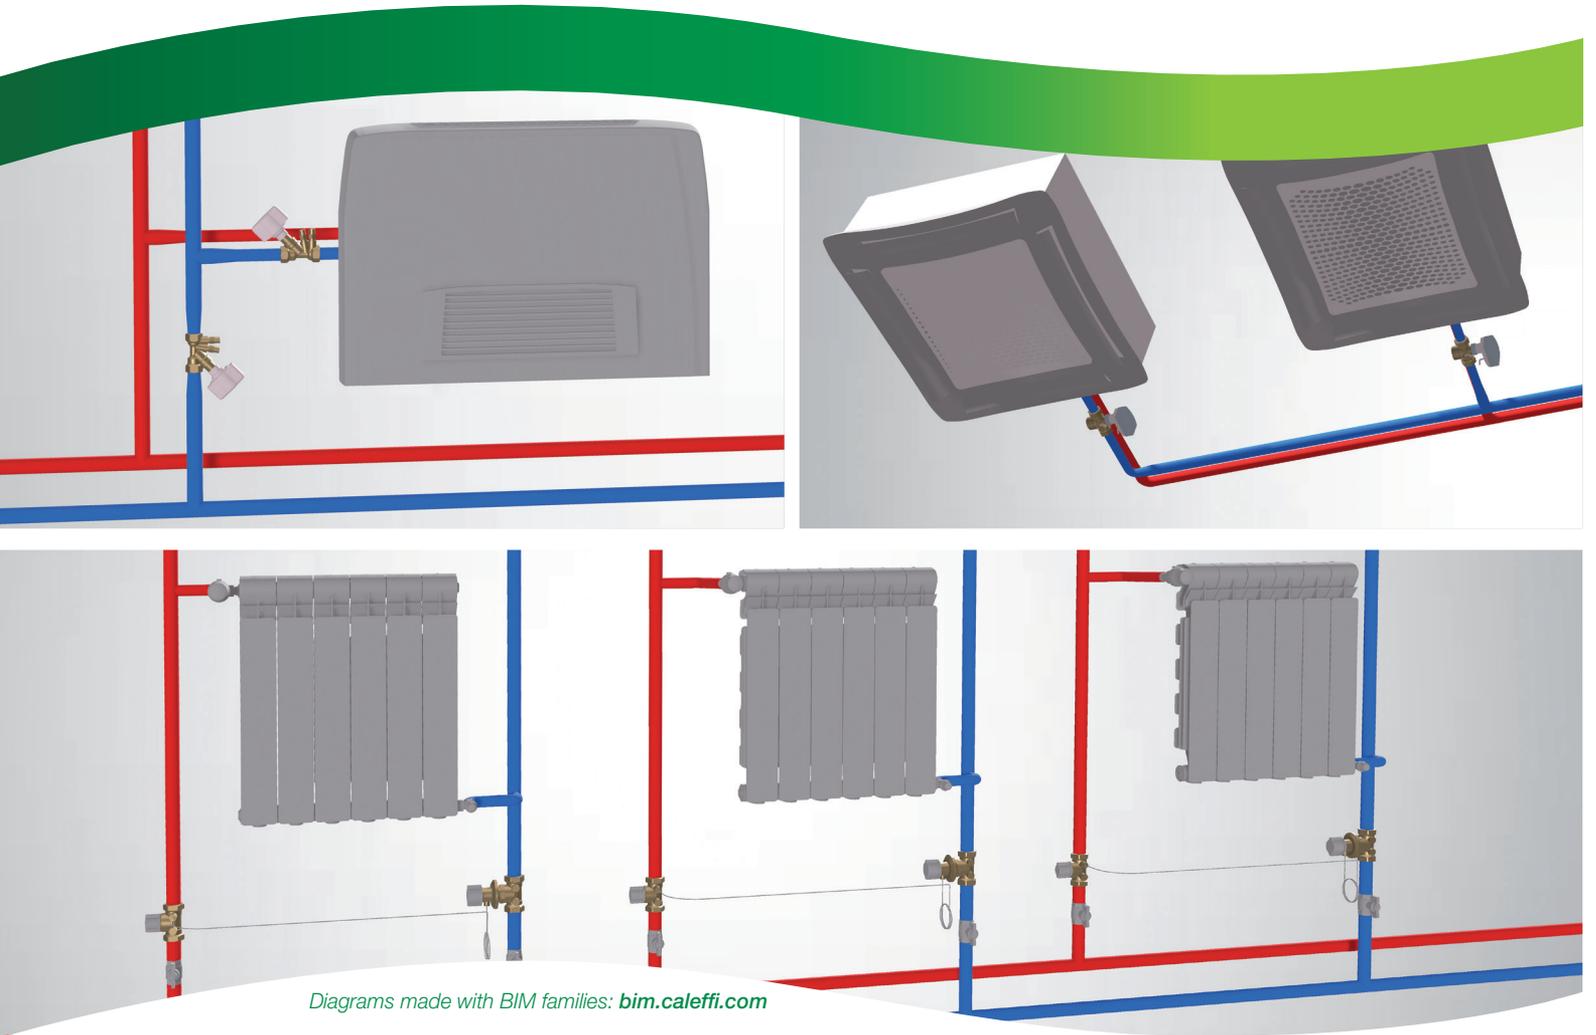

Double check valve, female connections.
 Controllable.

Maximum working pressure: 10 bar
 Medium temperature range: 5–65 °C
 Material: brass

Code	Connection		
304840	1/2" F	1	50
304850	3/4" F	1	50

BALANCING AND CONTROL DEVICES

- Static balancing devices**
- Dynamic balancing and control devices**
- Automatic flow rate regulator (AUTOFLOW®)**
- Differential pressure control devices**
- Regulating globe valves**
- Butterfly valves**
- Regulating mixing valves**

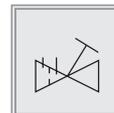

BALANCING AND CONTROL DEVICES

Circuit balancing devices can be classified in accordance with their method of action and the type of control they perform in relation to the hydronic circuit.

Static balancing devices

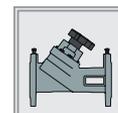

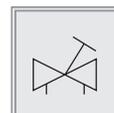

- Manual balancing valve, with Venturi device

130 series

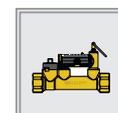

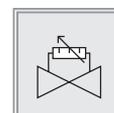

- Manual balancing valve, with variable orifice

130 series

- Balancing valve with flow meter

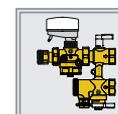

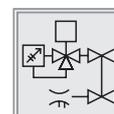

132 series

Dynamic balancing and control devices

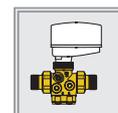

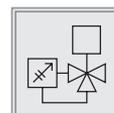

- Connection and regulation kit for HVAC terminal units

149 series

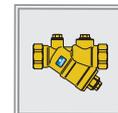

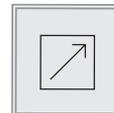

- Pressure independent control valve (PICV)

145-146 series

- Automatic flow rate regulator, fixed flow rate

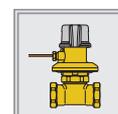

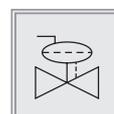

127-128-121-126-
120-125-103 series

Differential pressure control devices

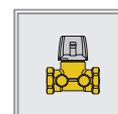

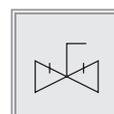

- Differential pressure control valve

140 series

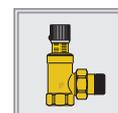

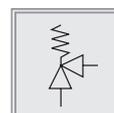

- Shut-off and pre-regulation valve

142 series

- Differential by-pass valve

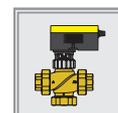

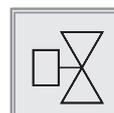

519 series

Regulating valves

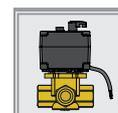

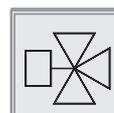

- Regulating valves

636 series

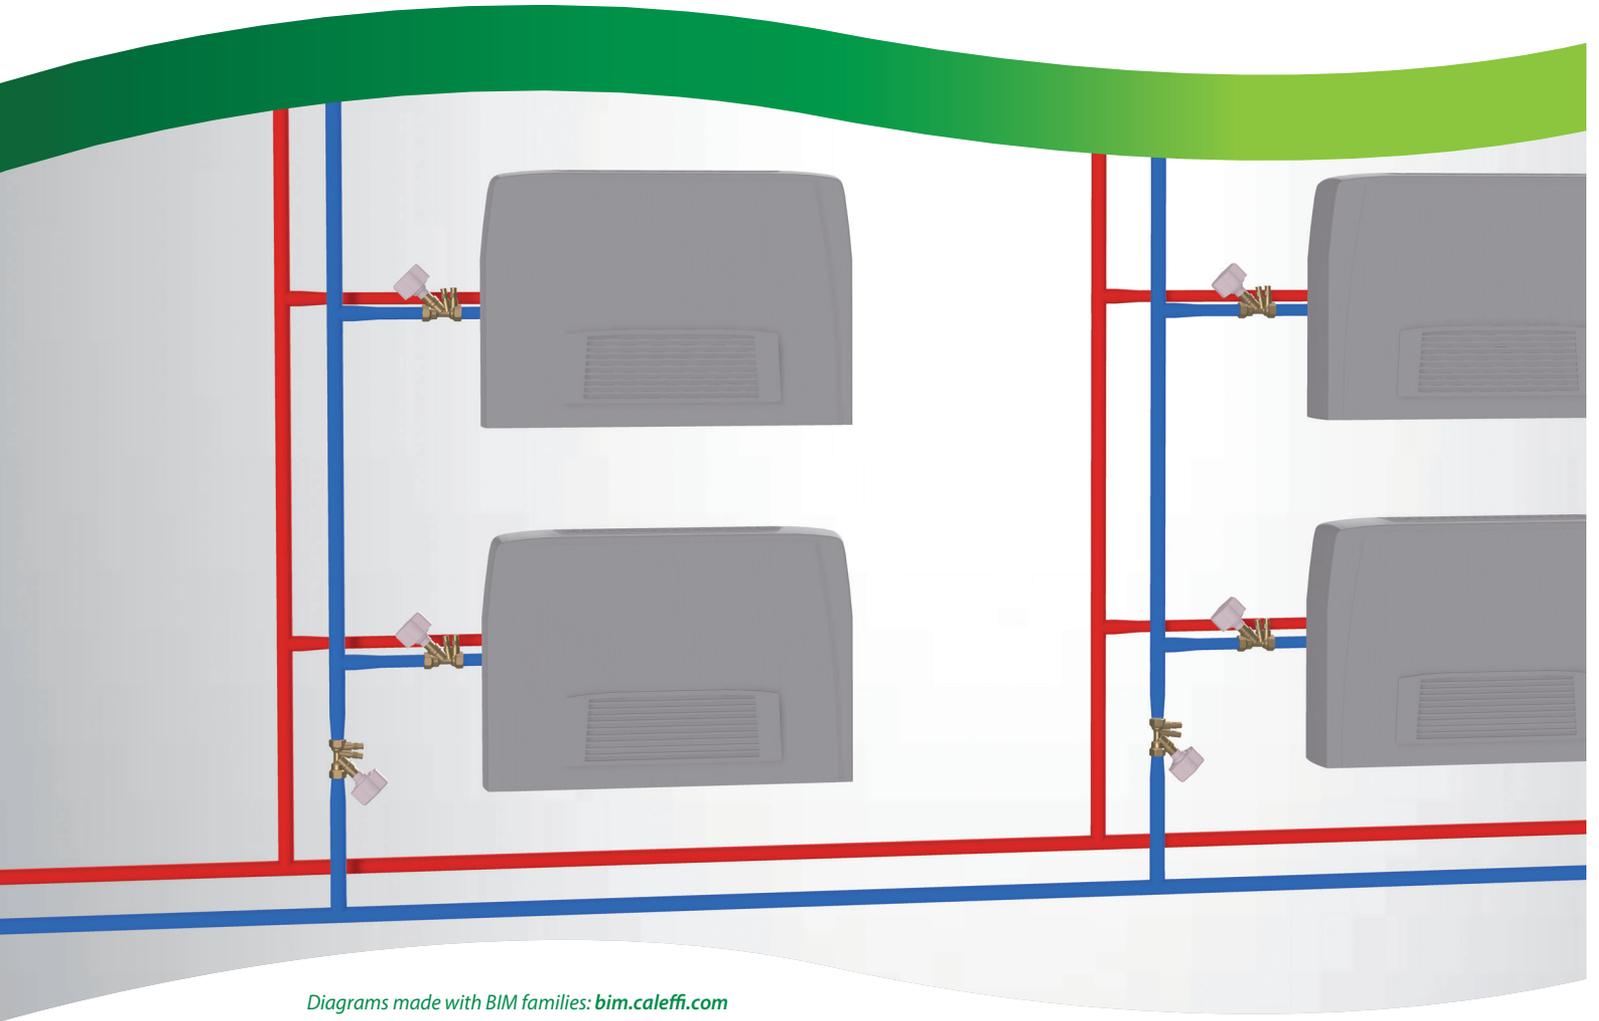

- Temperature regulating valves

610-611-612 series

STATIC BALANCING DEVICES

Diagrams made with BIM families: bim.caleffi.com

Balancing valves
Measurement and control
Balancing valves with flow meter

STATIC BALANCING DEVICES

130

Balancing valve for hydraulic systems. Flow meter with Venturi device. Stainless steel obturator. Complete with quick-fit pressure test ports.

Maximum working pressure: 16 bar
Medium temperature range: -20–120 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions
Material: dezincification resistant brass DR

Code	Connection	Notes		
130401	1/2" F	Low flow	1	5
130400	1/2" F	-	1	5
130500	3/4" F	-	1	5
130600	1" F	-	1	5
130700	1 1/4" F	-	1	5
130800	1 1/2" F	-	1	5
130900	2" F	-	1	5

130

Pre-formed insulation for balancing valves with threaded connections 130 series.

Code	Notes		
CBN130400	1/2"	1	-
CBN130500	3/4"	1	-

CBN130700	1 1/4"	1	-
CBN130800	1 1/2"	1	-
CBN130900	2"	1	-

142

Balancing valve.

Maximum working pressure: 16 bar
Medium temperature range: -10–120 °C
Maximum percentage of glycol: 50 %
Medium: glycol solutions
Material: dezincification resistant brass DR

Code	Connection		
142340	1/2" F	10	-
142345	1/2" F	10	-
142350	3/4" F	10	-

130

Balancing valve for hydraulic systems. Complete with quick-fit pressure test ports. To be coupled with flat counterflanges EN 1092-1.

Maximum working pressure: 16 bar
Medium temperature range: -10–120 °C
Material: cast iron
Medium: water, glycol solutions
Maximum percentage of glycol: 50 %

Code	Connection		
130063	DN 65 - PN 16	1	-
130083	DN 80 - PN 16	1	-
130103	DN 100 - PN 16	1	-
130123	DN 125 - PN 16	1	-
130153	DN 150 - PN 16	1	-
130203	DN 200 - PN 16	1	-
130253	DN 250 - PN 16	1	-
130303	DN 300 - PN 16	1	-

Measurement and control

130

Electronic flow rate and differential pressure measuring station. Supplied with shut-off valves and connection fittings. Bluetooth® transmission between Δp meter and remote control unit. It can also be used to measure the flow rate of series 130 and 142 balancing valves, and the 149 unit. Can be used for measuring Δp on automatic flow rate regulators. Versions complete with remote control unit with Android® application for Smartphone and Tablet.

Measurement range: 0–1000 kPa
Maximum working pressure (static): 1000 kPa
Electric supply: with battery

Code	Notes		
130006	complete with remote control unit, with Android® application	1	-
130005	without remote control unit, with Android® application	1	-

132902	2" F	50–200	1	5

132

Balancing valve with flow meter and direct reading of flow rate.
Graduated scale flow meter with magnetic movement flow rate indicator.
Brass flow meter.
To be coupled with flat counterflanges EN 1092-1.
PATENT

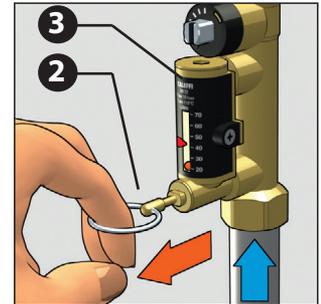

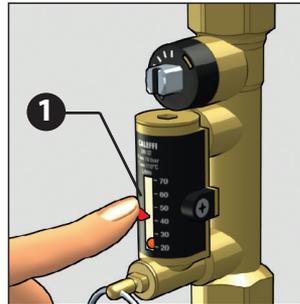

Maximum working pressure: 10 bar
Medium temperature range: -10–110 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions
Material: cast iron

Code	Connection	Flow rate regulation (m³/h)		
132060	DN 65 - PN 16	6–24	1	-
132080	DN 80 - PN 16	8–32	1	-
132100	DN 100 - PN 16	12–48	1	-

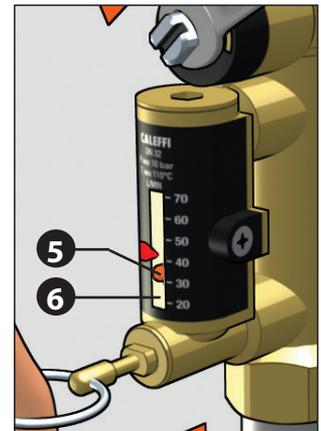

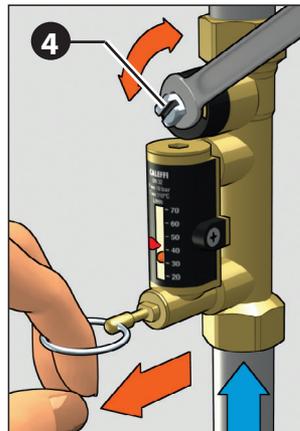

Flow rate adjustment

The flow rate is adjusted by carrying out the following operations:

1. With the aid of the indicator (1), mark the reference flow rate at which the valve has to be set.
2. Use the ring (2) to open the obturator that shuts off the flow of medium in the flow meter (3) under normal operating conditions.

3. Keeping the obturator open, apply a wrench on the control stem of the valve (4) to adjust the flow rate. It is indicated by a metal ball (5) that runs inside a transparent guide (6) marked by a graduated scale in l/min.

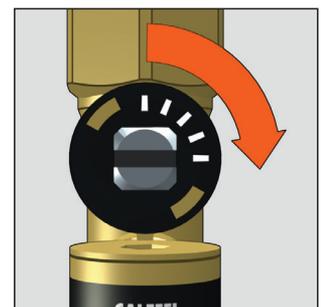

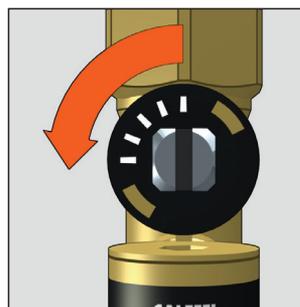

4. After completing the balancing, release the ring (2) of the flow meter obturator that, thanks to an internal spring, will automatically go back into the closed position.
5. After completing the balancing, the indicator (1) can be used to keep in memory the selected setting in case of future inspections.

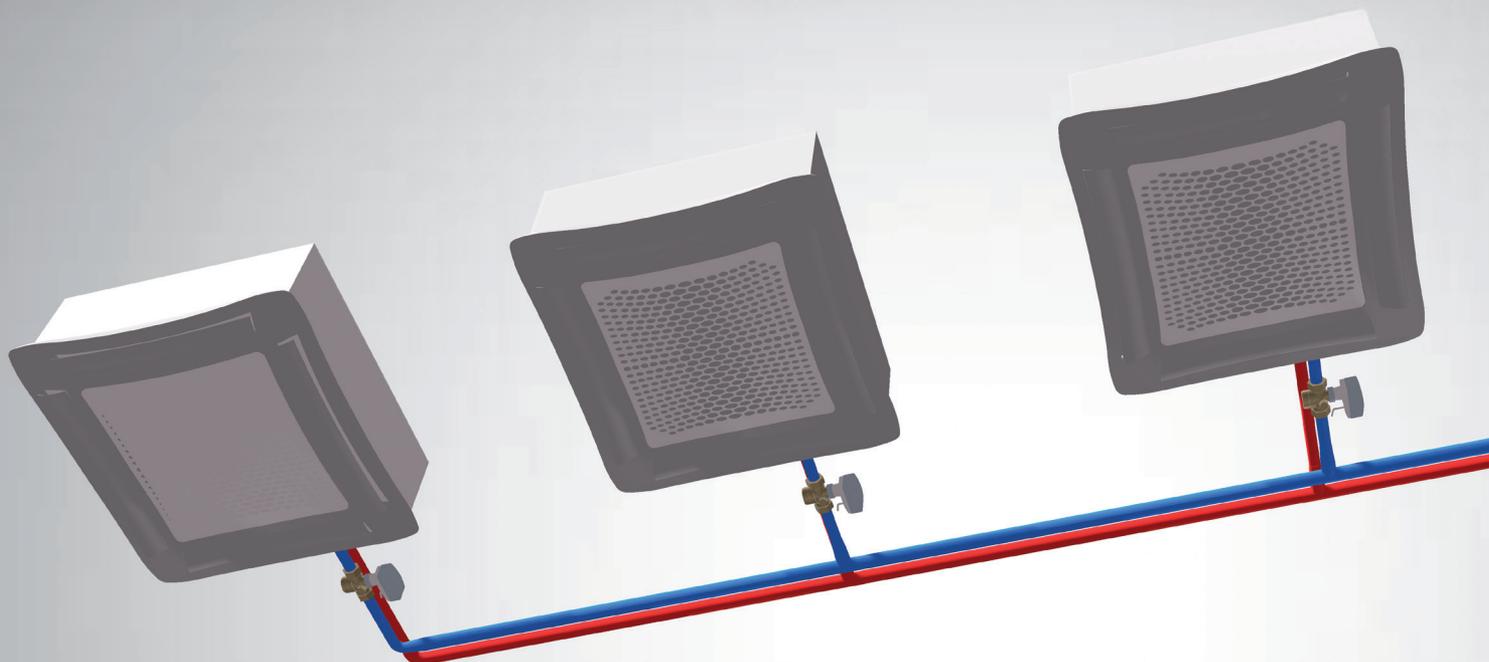

Complete opening and closing of the valve

Complete opening of the valve

Complete closing of the valve

DYNAMIC BALANCING AND CONTROL DEVICES

DYNAMIC BALANCING AND CONTROL DEVICES

Pressure independent control valves (PICV)

145 FLOWMATIC®

Pressure independent control valve. Fitted for 145 series actuator and 6565/6566 series thermo-electric actuator. Flow rate regulator in polymer with membrane in EPDM. Graduated scale indicator. **With pressure test ports.**

Maximum working pressure: 25 bar
 Medium temperature range: -20–120 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions
 Range Δp : 25–400 kPa
 Material: dezincification resistant brass DR

Operating principle

Where:
 p₁ = upstream pressure
 p₂ = intermediate pressure
 p₃ = downstream pressure
 (p₁ - p₂) = total valve Δp

Connection and regulation kit

149

Connection and regulation kit for HVAC terminal units.

With Venturi device.

Complete with:

- pressure independent control valve;
- three-way shut-off valves;
- built-in by-pass;
- Venturi device;
- filter cartridge;
- pre-formed shell insulation;
- drain cock.

With insulation.

PATENT PENDING

Can be combined with actuators code 145018, 145019 and 6565 series thermo-electric actuators.

Actuators for 145 FLOWMATIC and 149 series

145

Proportional linear actuator for FLOWMATIC® 145 series control valve and 149 series kit.

Ambient temperature range: 0–50 °C
 Protection class: IP 54
 Control signal: 0 (2)–10 V, 2 point, 3 point
 Feedback signal: 0–10 V
 Supply cable length: 1,5 m

Code	Electric supply
145019	24 V AC/DC

1 40

6565

Thermo-electric actuator for FLOWMATIC 145 series control valve and 149 series kit. Quick-coupling installation with fixing clip adaptor.

Normally closed.

Ambient temperature range: 0–60 °C
 Running power consumption: 1 W
 Protection class: IP 54
 Supply cable length: 1 m
 Control signal: ON/OFF

Code	Electric supply
656502	230 V AC
656504	24 V AC/DC

1 100
 1 100

145

Proportional linear actuator for FLOWMATIC® 145 series control valve and 149 series kit, with **fail-safe function**.

Ambient temperature range: 0–50 °C
 Protection class: IP 54
 Control signal: 0 (2)–10 V, 2 point
 Feedback signal: 0–10 V
 Supply cable length: 1,5 m

Code	Electric supply
145018	24 V AC/DC

1 40

6566

Thermo-electric actuator. For FLOWMATIC 145 series control valve, 149 series kit, user modules 7002 and 7004 series.

Quick-coupling installation with fixing clip adaptor.

Normally open.

Ambient temperature range: 0–60 °C
 Running power consumption: 1 W
 Protection class: IP 54
 Supply cable length: 1 m
 Control signal: ON/OFF

Code	Electric supply
656602	230 V AC

145017	145895, 145905	24 V AC/DC	1	-

146

Pressure independent control valve. To be coupled with flat counterflanges EN 1092-1. Complete with pressure test ports.

Maximum working pressure: 16 bar
 Medium temperature range: -10–120 °C
 Maximum percentage of glycol: 50 %
 Medium: glycol solutions
 Range Δp : 30–400 kPa
 Material: cast iron

Code	Connection	Flow rate working range (m ³ /h)

146150	DN 150 - PN 16	27–160	1	-

146

Rotational proportional actuator for pressure independent control valve 146 series. Manual override.

Ambient temperature range: -30–50 °C
 Protection class: IP 54
 Control signal: 2–10 V
 Feedback signal: 2–10 V

AUTOMATIC FLOW RATE REGULATOR (AUTOFLOW®)

Compact automatic flow rate regulator, in line

127
AUTOFLOW®

Compact automatic flow rate regulator, in line, with high resistance tecnopolymer cartridge.

Flow rates: 0,02–0,06 m³/h - Δp range: 20–200 kPa - Accuracy: ± 15 %.

Flow rates: 0,085–11,0 m³/h - Δp range: 15–200 kPa - Accuracy: ± 10 %.

PATENT

Maximum working pressure: 16 bar
Medium temperature range: 0–100 °C
Medium: water, glycol solutions
Maximum percentage of glycol: 50 %
Material: brass

Method for coding AUTOFLOW® 121 - 126 - 127 - 128 series

For correct identification of the device, fill in the form indicating: series, size, flow rate and Δp range.

Complete code

			1		1			
SERIES			SIZE		FLOW RATE - Δp RANGE			

SERIES

1 st	2 nd	3 rd

The first three digits indicate the series

121	AUTOFLOW® regulator and ball valve
126	AUTOFLOW® regulator
127	AUTOFLOW® compact regulator
128	AUTOFLOW® compact regulator

SIZE

5 th

The fifth digit indicates the size

Size	1/2"	3/4"	1"	1 1/4"	1 1/2"	2"
Digit	4	5	6	7	8	9

FLOW RATE - Δp RANGE

7 th	8 th	9 th

The last three digits indicate the available flow rate

Δp range 20–200 kPa					
m ³ /h	digit	m ³ /h	digit	m ³ /h	digit
0,02	M02	0,04	M04	0,06	M06

Δp range 15–200 kPa											
m ³ /h	digit	m ³ /h	digit	m ³ /h	digit	m ³ /h	digit	m ³ /h	digit	m ³ /h	digit
0,085	M08	0,40	M40	1,20	1M2	2,75	2M7	4,50	4M5	7,50	7M5
0,12	M12	0,50	M50	1,40	1M4	3,00	3M0	4,75	4M7	8,00	8M0
0,15	M15	0,60	M60	1,60	1M6	3,25	3M2	5,00	5M0	8,50	8M5
0,20	M20	0,70	M70	1,80	1M8	3,50	3M5	5,50	5M5	9,00	9M0
0,25	M25	0,80	M80	2,00	2M0	3,75	3M7	6,00	6M0	9,50	9M5
0,30	M30	0,90	M90	2,25	2M2	4,00	4M0	6,50	6M5	10,0	10M
0,35	M35	1,00	1M0	2,50	2M5	4,25	4M2	7,00	7M0	11,0	11M

Minimum differential pressure required

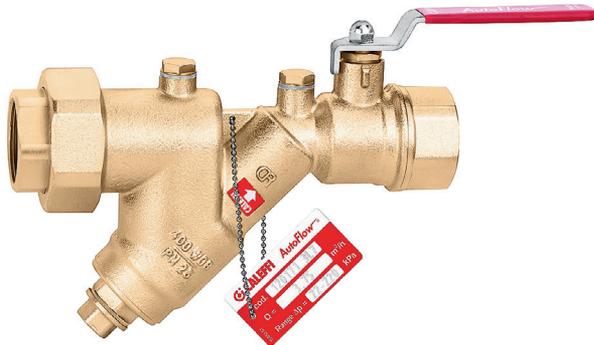

This is given by the sum of two values:

1. the minimum working Δp of the AUTOFLOW cartridge;
2. the Δp required for the nominal flow rate to pass through the valve body. This value can be determined on the basis of the values of Kv shown above referring to the valve body.

Pump head $H = \Delta p_{\text{circuit}} + \Delta p_{\text{prequisite}}$

AUTOMATIC FLOW RATE REGULATOR (AUTOFLOW®)

Automatic flow rate regulator with stainless steel cartridge and ball valve

**120
AUTOFLOW®**

Combination of automatic flow rate regulator, with stainless steel cartridge, and ball valve.
Accuracy: ± 5 %.

Designed for pressure point and drain valve connection.

Maximum working pressure: 25 bar
Medium temperature range: 0–110 °C
Material: dezincification resistant brass DR
Medium: glycol solutions
Maximum percentage of glycol: 50 %

Minimum differential pressure required

This is given by the sum of two values:

1. the minimum working Δp of the AUTOFLOW cartridge;
2. the Δp required for the nominal flow rate to pass through the valve body. This value can be determined on the basis of the values of Kv shown above referring to the valve body.

Pump head $H = \Delta p_{\text{circuit}} + \Delta p_{\text{prequise}}$

Method for coding AUTOFLOW® 120 - 125 series

For correct identification of the device, fill in the form indicating: series, size, flow rate and Δp range.

Complete code

			1		1			
SERIES			SIZE	FLOW RATE AND Δp RANGE				

SERIES

1st 2nd 3rd The first three digits indicate the series:

120	AUTOFLOW® regulator and ball valve

Automatic flow regulator with stainless steel cartridge, flanged

103 AUTOFLOW®

Automatic flow rate regulator with stainless steel cartridge.
Complete with flanges, rods, seals and quick-fit pressure test ports.

Maximum working pressure: 16 bar
Medium temperature range: -20–110 °C
Material: cast iron
Medium: water, glycol solutions
Maximum percentage of glycol: 50 %

Measurement and control accessories

130

Electronic flow rate and differential pressure measuring station. Supplied with shut-off valves and connection fittings. Bluetooth® transmission between Δp meter and remote control unit.

It can also be used to measure the flow rate of series 130 and 142 balancing valves, and the 149 unit.

Can be used for measuring Δp on automatic flow rate regulators.

Versions complete with remote control unit with Android® application for Smartphone and Tablet.

Measurement range: 0–1000 kPa

Maximum working pressure (static): 1000 kPa

Electric supply: with battery

Code	Notes		
130006	complete with remote control unit, with Android® application	1	-
130005	without remote control unit, with Android® application	1	-

100

Pair of fast-plug pressure/temperature test ports.

Cap cover facing available in:

- Red for upstream pressure test port.
 - Green for downstream pressure test port.
- EPDM seals.

Maximum working pressure: 30 bar

Medium temperature range: -5–130 °C

Material: brass

Code	Connection		
100000	1/4" M	1	100

538

Manual shut-off cock. Seals in non-asbestos fibre.

Maximum working pressure: 16 bar

Medium temperature range: -10–120 °C

Material: brass

Code	Connection 1	Connection 2		
538203	1/4" F	1/4" M	1	-

Actuator for flanged regulating valves 636 series.

Operating time:
 40 s/80 s/120 s DN 65-DN 80;
 80 s/160 s/240s DN 100-DN150.

Ambient temperature range: -10–55 °C
 Protection class: IP 66
 Control signal: 4–20 mA, 2 point, 3 point, 0–10 V
 Feedback signal: 0–10 V

REGULATING MIXING VALVES

Cast iron mixing regulation valves

610

Three-way butterfly mixing valve, threaded connections.
Factory configuration: boiler inlet on the RH connection.

Maximum working pressure: 6 bar
 Medium temperature range: 2–110 °C

Code	Connection	Kv (m ³ /h)		
610005	3/4" F	7,5	1	-
610006	1" F	11,9	1	-
610007	1 1/4" F	16,8	1	-
610008	1 1/2" F	30	1	-
610009	2" F	45	1	-
610020	2 1/2" F	72	1	-

610

Three-way butterfly mixing valve, flanged connections.
 To be coupled with flat counterflanges EN 1092-1.

Factory configuration: boiler inlet on the RH connection.

Maximum working pressure: 6 bar
 Medium temperature range: 2–110 °C
 Nominal pressure: PN 6

Code	Connection	Kv (m ³ /h)		
610050	DN 50 - PN 6	45	1	-
610060	DN 65 - PN 6	72	1	-

610120	DN 125 - PN 6	340	1	-

611

Four-way butterfly mixing valve, threaded connections.
Factory configuration: boiler inlet on the RH connection.

Maximum working pressure: 6 bar
 Medium temperature range: 2–110 °C

Code	Connection	Kv (m ³ /h)		
611005	3/4" F	7,8	1	-
611006	1" F	12,3	1	-
611007	1 1/4" F	18,5	1	-
611008	1 1/2" F	30	1	-
611009	2" F	53	1	-
611020	2 1/2" F	80	1	-

611

Four-way butterfly mixing valve, flanged connections.
 To be coupled with flat counterflanges EN 1092-1.

Factory configuration: boiler inlet on the RH connection.

Maximum working pressure: 6 bar
 Medium temperature range: 2–110 °C
 Nominal pressure: PN 6

Code	Connection	Kv (m ³ /h)		
611050	DN 50 - PN 6	53	1	-

Actuators

638

Actuator for mixing valves from 3/4" to 1 1/2".
 Complete with adapter.
With auxiliary microswitch.

Auxiliary microswitch contact rating (230 V):
 6 (2) A
 Protection class: IP 65

Code	Electric supply	Opening-Closing time		
638002	230 V AC	50 s (90° rot.)	1	5

638

Actuator for mixing valves from 3/4" to 1 1/2".
 Complete with adapter.
With auxiliary microswitch.

Auxiliary microswitch contact rating (230 V):
 6 (2) A
 Protection class: IP 65

Code	Electric supply	Opening-Closing time		
638032	230 V AC	50 s (90° rot.)	1	5

638

Actuator for mixing valves from 2" to 5".
 Complete with adapter.
With double auxiliary microswitch.

Auxiliary microswitch contact rating (230 V):
 6 (2) A
 Protection class: IP 65

Code	Electric supply	Opening-Closing time		
638022	230 V AC	60 s (90° rot.), 180 s (90° rot.)	1	5

6370

Actuator for sector mixing valve, **three-point control**.
 For mixing valves codes 610 from 1/2" to 2" and for unit 167 series.
 Actuator torque 5 N-m.

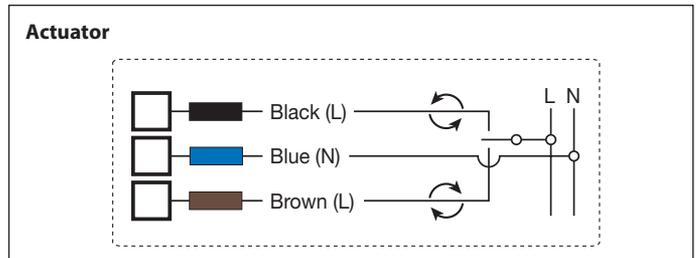

Ambient temperature range: 0–55 °C
 Protection class: IP 44
 Supply cable length: 1,5 m

Code	Article use	Electric supply	Opening-Closing time		
637042	167652HE1, 167662HE2, 167652HE3, 167662HE4	230 V AC	150 s (90° rot.)	1	-

Wiring diagram

6370

Actuator for sector mixing valve, **proportional control**.
 For mixing valves codes 610 from 1/2" to 2" and for unit 167 series.
 Actuator torque 5 N-m.

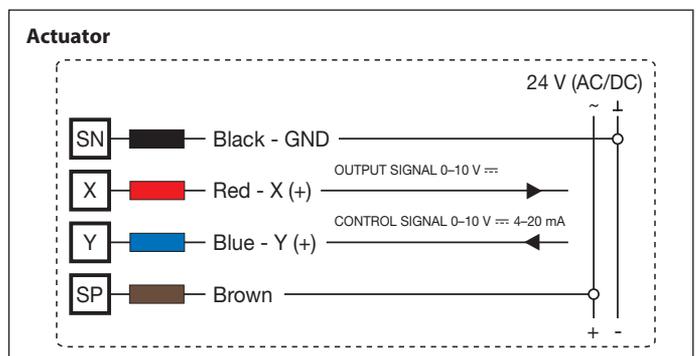

Ambient temperature range: 0–55 °C
 Protection class: IP 44
 Supply cable length: 1,5 m
 Control signal: 0 (2)–10 V, 0 (4)–20 mA, 0–5 V, 5–10 V

Code	Article use	Electric supply	Opening-Closing time		
637044	167654HE1, 167664HE2, 167654HE3, 167664HE4	24 V AC	75 s (90° rot.)	1	-

Wiring diagram

Regulators

161  

Digital regulator with synoptic diagram for **heating and cooling**. Complete with immersion flow probes with pocket and Pt1000 Ø 6 mm return probe (pocket to be chosen according to the pipe, see accessories).
Optional climatic probe.

Adjustment temperature range: 5–95 °C
Electric supply: 230 V AC
Protection class: IP 20
Probe/cable length: 1,5 m
Control signal: 3 point, 0–10 V

Code			
161010		1	-

1520  

Digital temperature controller for heating and cooling. Complete with flow probe, outside probe and max. relative humidity probe.

Electric supply: 230 V AC
Running power consumption: 5,5 VA
Protection class: IP 40
Control signal: 3 point

Code	Notes		
152021	1 channel	1	-

1520 

Outside compensated digital temperature regulator, **only for heating**. Complete with contact flow probe and outside probe.

Adjustment temperature range: 20–90 °C
Electric supply: 230 V AC
Protection class: IP 40
Control signal: 3 point

Code	Notes		
152001	1 channel	1	-
152002	2 channels	1	-
152003	3 channels	1	-

161

Outside temperature probe.

Code			
161002		1	-

161

Pressure safety switch. Complete with cable for wiring.

Medium temperature range: 5–100 °C
Supply cable length: 1 m
Adjustment pressure range: 0,5–10 bar

Code			
161003		1	-

161

Dew point detector.

Working range (humidity) UR: 30–100 %

Code			
161004		1	-

161

Remote regulator.

Functions:

- translation of the setting curves, from +15 K to -15 K;
- maximum temperature;
- position OFF.

Code			
161005		1	-

161

Pt1000 probe, Ø6 mm.

Code	Notes	Article use		
161006	L 45 mm, L cable 2,5 m	161010	1	-
161015	L 20 mm, L cable 1,5 m	161010	1	-

161

Pt1000 contact probe for pipes, Ø 6 mm.

Code	Notes	Article use		
161012	L cable 2,5 m	161010	1	-

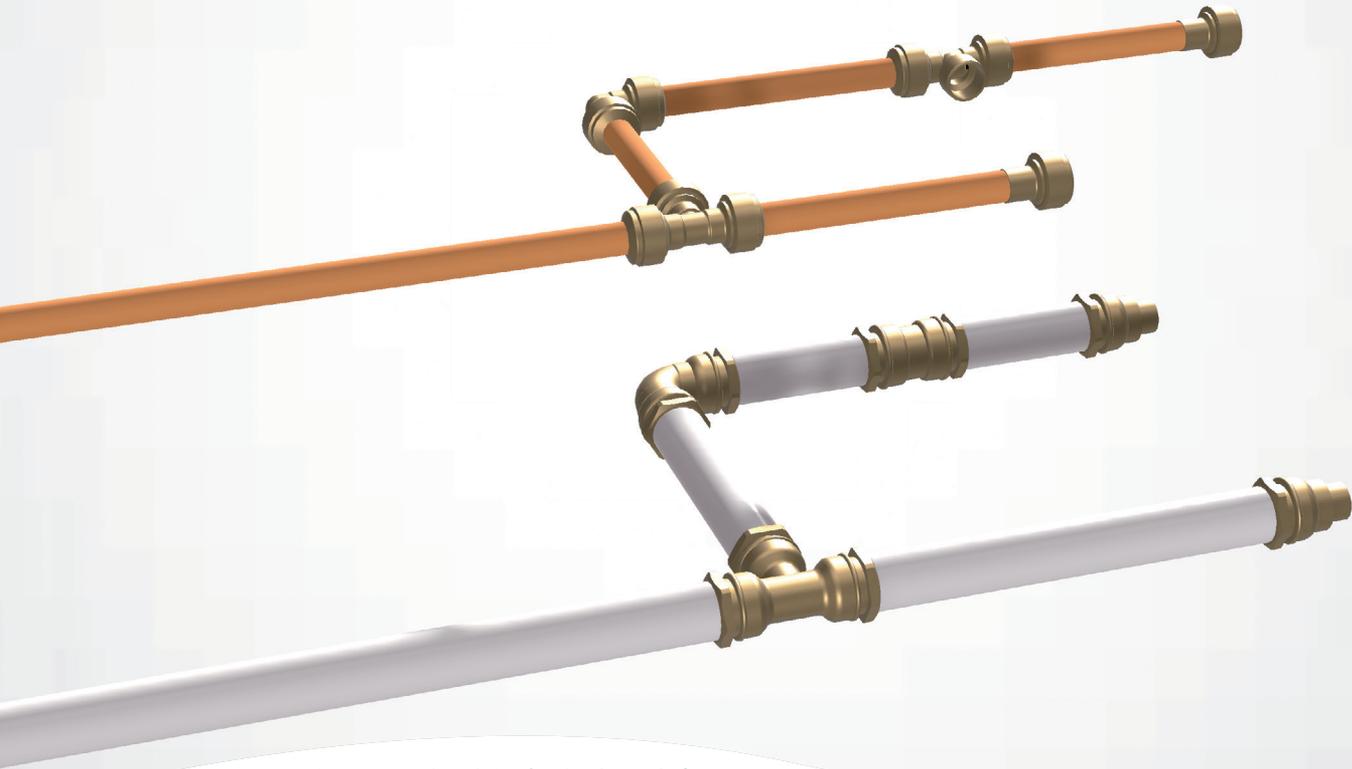

161

Pt1000 probe pocket, size 1/2" M.

Code	Notes	Article use		
161013	L 60 mm	161010	1	-
161014	L 100 mm	161010, 150006, 257006	1	-

FITTINGS

Diagrams made with BIM families: bim.caleffi.com

Fittings for pipe connections

FITTINGS FOR PIPE CONNECTIONS

for gas and hydrocarbons - EN 549 standard

for hydraulic and domestic water systems - EN 681.1 standard

Fittings highlighted in yellow are supplied with two O-Rings: yellow to be used for gas and fluid hydrocarbons - black to be used for hydraulic systems.

To be used for gas systems with power output up to 35 kW, according to UNI 7129-2015 standard only.

Three-piece fittings

588

Three-piece union fitting.
For gas and fluid hydrocarbons: yellow O-Ring according to EN 549 standard. Temperature range: -20-100 °C.
For hydraulic and domestic water systems: black O-Ring according to EN 681.1 standard.

Maximum working pressure: 16 bar
 Medium temperature range: -25-120 °C

Code	Connection 1	Connection 2		
588030	3/8" F	3/8" M	1	50
588040	1/2" F	1/2" M	1	50
588050	3/4" F	3/4" M	1	25
588060	1" F	1" M	1	20

Compression fittings with O-ring seal

900

Female fitting.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
With double O-Ring.
Conforms to standard UNI EN 1254-4.
For gas and fluid hydrocarbon systems (yellow O-ring conforms to standard EN 549).
For hydraulic and domestic water systems (Black o-ring conforms to standard EN 681.1).
Note (*): to be used only with water and non-dangerous glycol solutions.

Maximum working pressure: 16 bar
Medium temperature range: -25–120 °C

Code	Connection	Pipe connection	Notes

903022	Ø 22	1	25

9050

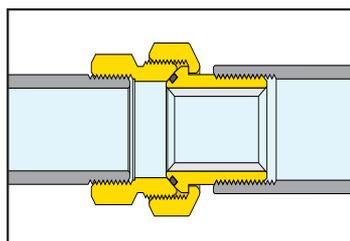

Elbow fitting.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
Conforms to standard UNI EN 1254-4.
For hydraulic and domestic water systems: black O-Ring conforms to standard EN 681.1.

Maximum working pressure: 16 bar
Medium temperature range: -25–120 °C

Code	Pipe diameter		
905010	Ø 10	1	25
905012	Ø 12	1	25
905014	Ø 14	1	25

905018	Ø 18	1	25
905022	Ø 22	1	25

O-Ring seal

The hydraulic tightness between the two fitting components is a tapered type with O-Ring. This allows to screw the fitting up smoothly with a full safety warranty.

9057

Male elbow fitting.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
With double O-ring.
Conforms to standard UNI EN 1254-4.
For gas and fluid hydrocarbon systems (yellow O-ring conforms to standard EN 549).
For hydraulic and domestic water systems (black O-ring conforms to standard EN 681.1).

Maximum working pressure: 16 bar
Medium temperature range: -25–120 °C

Code	Connection	Pipe diameter		
905730	3/8" M	Ø 10	1	25
905732	3/8" M	Ø 12	1	25

905752	3/4" M	Ø 22	1	25

9058

Female elbow fitting.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
With double O-ring.
Conforms to standard UNI EN 1254-4.
For gas and fluid hydrocarbon systems (yellow O-ring conforms to standard EN 549).
For hydraulic and domestic water systems (black O-ring conforms to standard EN 681.1).

Maximum working pressure: 16 bar
Medium temperature range: -25–120 °C

Code	Connection	Pipe diameter

9060

Tee fitting.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
Conforms to standard UNI EN 1254-4.
For hydraulic and domestic water systems (Black O-ring conforms to standard EN 681.1).

Maximum working pressure: 16 bar
Medium temperature range: -25–120 °C

Code	Pipe diameter		
906010	Ø 10	1	25
906012	Ø 12	1	25
906014	Ø 14	1	25

906018	Ø 18	1	25
906022	Ø 22	1	20

9067

Male tee fitting.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
Conforms to standard UNI EN 1254-4.
For hydraulic and domestic water systems. (Black O-ring conforms to standard EN 681.1).

Maximum working pressure: 16 bar
Medium temperature range: -25–120 °C

Code	Connection	Pipe diameter		
906740	1/2" M	Ø 10	1	25

930

Elbow fitting with wall connection.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
With double O-Ring.
Conforms to standard UNI EN 1254-4.
For gas and fluid hydrocarbon systems
(yellow O-Ring conforms to standard EN 549).
For hydraulic and domestic water systems
(black O-ring conforms to standard EN 681.1).

Maximum working pressure: 16 bar
Medium temperature range: -25–120 °C

Code	Connection	Pipe diameter		
930412	1/2" F	Ø 12	1	25
930414	1/2" F	Ø 14	1	25

913

Coupling sleeve.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
Conforms to standard UNI EN 1254-4.
For hydraulic and domestic water systems.
(Black O-ring conforms to standard EN 681.1).

Maximum working pressure: 16 bar
Medium temperature range: -25–120 °C

Code	Pipe diameter		
913010	Ø 10	1	50
913012	Ø 12	1	50
913014	Ø 14	1	50

Mechanical fittings with O-ring seal are not suitable for use with fuel added with RME (Rape Methyl ester)

Spare parts for mechanical fittings with O-ring seal

Spare O-Ring.
For 900, 903, 904, 9050, 9057, 9058, 9060, 9067, 9068, 930, 910, 913 and 914 series mechanical fittings.

For hydraulic systems and for human consumption.

Gas filters and regulators
Gas solenoid valves
Gas control devices and accessories

GAS FILTERS AND REGULATORS

Gas filters

847

Compact gas filter.
Filtering capacity: $\varnothing \geq 50 \mu\text{m}$.

Maximum working pressure: 2 bar
Gas filtration class: G2 (according to EN 779)

Code	Connection		
847004	Rp 1/2" F	1	20
847005	Rp 3/4" F	1	20

848

Gas filter.
Filtering capacity: $\varnothing \geq 50 \mu\text{m}$.

Maximum working pressure: 2 bar
Gas filtration class: G2 (according to EN 779)

Code	Connection		
848004	Rp 1/2" F	1	30
848005	Rp 3/4" F	1	30
848006	Rp 1" F	1	30
848007	Rp 1 1/4" F	1	15
848008	Rp 1 1/2" F	1	15
848009	Rp 2" F	1	10

848

Gas filter. Flanged connections.
To be coupled with flat counterflanges EN 1092-1.
Filtering capacity: $\varnothing \geq 50 \mu\text{m}$.

Maximum working pressure: 2 bar
Gas filtration class: G2 (according to EN 779)

Code	Connection		
848060	DN 65 - PN 16	1	-
848080	DN 80 - PN 16	1	-
848100	DN 100 - PN 16	1	-

Standard gas filters and regulators

850

Gas pressure closing filter regulator, double diaphragm. Threaded connections.
Filtering capacity: $\varnothing \geq 50 \mu\text{m}$.
Regulation and closing at null flow according to UNI EN 88.
Compliance with directive ATEX (II 2G - II 2D).

Maximum upstream pressure: 500 mbar
Medium temperature range: -15-60 °C
Gas filtration class: G2 (according to EN 779)

Code	Connection	Adjustment pressure range (mbar)		
850004	Rp 1/2" F	18-40	1	-
850005	Rp 3/4" F	18-40	1	-

GAS CONTROL DEVICES AND ACCESSORIES

Gas accessories

841

Extendible stainless steel joint according to UNI 11353, for gas systems in domestic applications (max. 35 kW).
Fixed male connection: AISI 303.
Flexible: AISI 316L.
Captive female connection: AISI 303.

Maximum working pressure: 0,5 bar
Material: stainless steel

Code	Connection 1	Connection 2	Length (mm)		
841414	1/2" M	1/2" F	90-130	1	-

842

Antivibration joint for gas systems. Conforms to standards UNI EN 676.
Threaded version: body AISI 316L, fixed male connection: FE 37.
Flanged version: body AISI 321, free flanged connections: ASTM A 105 - PN 10.
To be coupled with flat counterflanges EN 1092-1.

Maximum working pressure: 0,5 bar
Material: stainless steel

Code	Connection	Length (mm)		
842004	1/2" M	145	1	-

846104	3/8" M radial connection	0-100	1	50

Gas detector

8563

Gas detector, with built-in sensor and relay outlet.
For solenoid valves 8540, 8541, 837, 838 and 839 series.
With BUS connection, for auxiliary remote sensor.
Outlet contact: 8 (2) A.
Domestic use.

Electric supply: 230 V AC
Protection class: IP 42

Code	Notes		
856300	for methane gas	1	8
856302	for LPG	1	-

855

Gas detector, with built-in sensor and relay outlet.
Without BUS connection.
With solenoid valve normally open.

Electric supply: 230 V AC
Protection class: IP 42

Code	Connection	Notes		
855400	Rp 1/2" F	for methane gas	1	10
855500	Rp 3/4" F	for methane gas	1	4
855410	Rp 1/2" F	for LPG	1	4
855510	Rp 3/4" F	for LPG	1	8

8563

Auxiliary remote sensor.
For gas detector 8563 series.
Domestic use.

Electric supply: 230 V AC
Protection class: IP 42

Code	Notes		
856310	for methane gas	1	-
856312	for LPG	1	8

8561

Rotating siren.
112 dB/1m.

Electric supply: 230 V AC
Protection class: IP 14

Code		
856102	1	-

8565

Gas detector, with built-in sensor and relay outlet.
Without BUS connection.
Outlet contact: 8 (2) A.
For domestic use.

Electric supply: 230 V AC
Protection class: IP 42

Code	Notes		
856500	for methane gas	1	8
856502	for LPG	1	8

8562

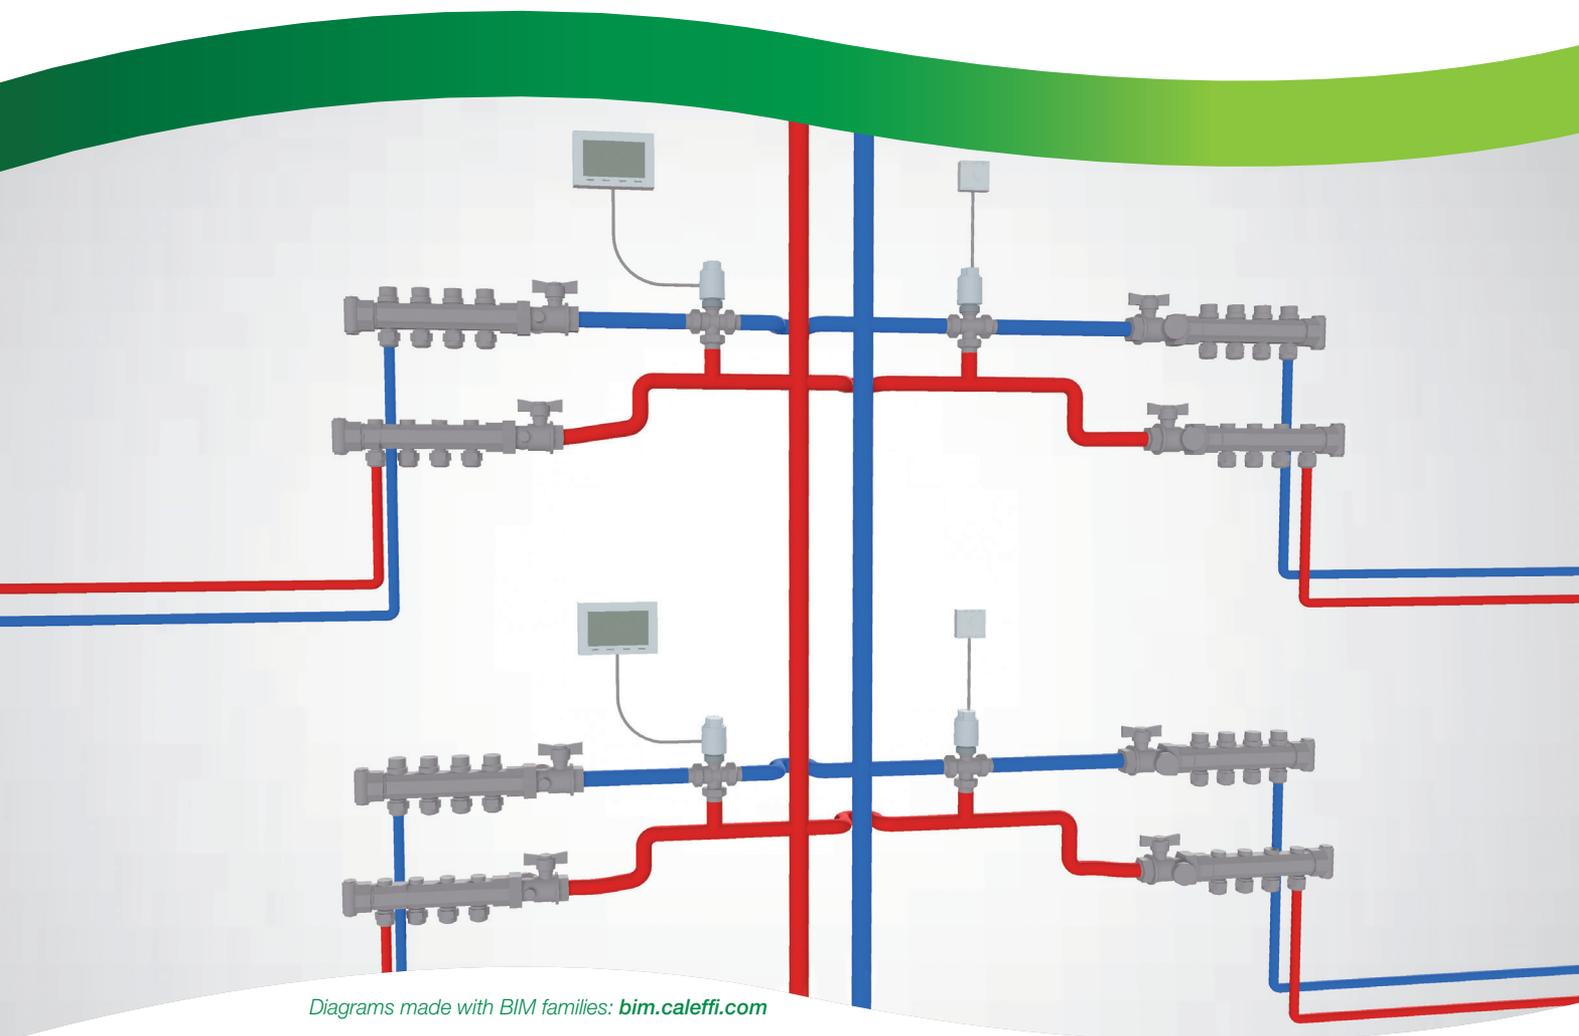

Electronic intermittence blinker.
Lamp power 40 W.

Electric supply: 230 V AC
Protection class: IP 65

Code		
856202	1	-

EXPANSION VESSELS, CHRONO-THERMOSTATS, THERMOSTATS

Expansion vessels

Control devices for autoclaves

Temperature regulators, thermostats and chrono-thermostats

EXPANSION VESSELS

Expansion vessels for heating systems

556

Welded expansion vessel, for heating systems, EC certification. Diaphragm membrane. Conformity to EN 13831 standard.

Maximum working pressure: 6 bar
System working temperature range: -10–120 °C
Diaphragm temperature range: -10–70 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions
Pre-charge: 1,5 bar

Code	Connection	Volume (l)	 
556008	3/4" M	8	1
556012	3/4" M	12	1

Code	Inlet connection	Outlet connection		
558510	3/4" F	3/4" M	1	50

CONTROL DEVICES FOR AUTOCLAVES

Pressure switch and float switch

625

Pressure switch for boosting sets and domestic water applications.

Medium temperature range: 0–55 °C
Ambient temperature range: 0–55 °C
Protection class: IP 44
Contact rating (up to 500V tripolar): 16 (10) A

Code	Connection	Maximum working pressure (bar)	Adjustment pressure range (bar)		
625005	1/4" F	5	1–5	1	10
625010	1/4" F	12	3–12	1	10

613

Float switch, 250 V 10 A.
Approved for heavy commissioning.

Code	Probe/cable length (m)		
613030	3	1	5
613050	5	1	5

TEMPERATURE REGULATORS, THERMOSTATS AND CHRONO-THERMOSTATS

Temperature regulators

161

Digital regulator with synoptic diagram **for heating and cooling**.
Complete with immersion flow probes with pocket and Pt1000 Ø 6 mm return probe (pocket to be chosen according to the pipe, see accessories).
Optional climatic probe.

Adjustment temperature range: 5–95 °C
Electric supply: 230 V AC
Protection class: IP 20
Probe/cable length: 1,5 m
Control signal: 3 point, 0–10 V

Code		
161010	1	-

1520

Digital temperature controller **for heating and cooling**.
Complete with flow probe, outside probe and max. relative humidity probe.

Electric supply: 230 V AC
Running power consumption: 5,5 VA
Protection class: IP 40
Control signal: 3 point

Code	Notes		
152021	1 channel	1	-

1520

Outside compensated digital temperature regulator, **only for heating**.
Complete with contact flow probe and outside probe.

Adjustment temperature range: 20–90 °C
Electric supply: 230 V AC
Protection class: IP 40
Control signal: 3 point

Code	Notes		
152001	1 channel	1	-
152002	2 channels	1	-
152003	3 channels	1	-

Accessories for regulator 161010

161
Outside temperature probe.

Code	Notes	Article use		
161002			1	-

161
Pressure safety switch.
Complete with cable for wiring.

Medium temperature range: 5–100 °C
Supply cable length: 1 m
Adjustment pressure range: 0,5–10 bar

Code	Notes	Article use		
161003			1	-

161
Dew point detector.

Working range (humidity) UR: 30–100 %

Code	Notes	Article use		
161004			1	-

161
Remote regulator.
Functions:
- translation of the setting curves, from +15 K to -15 K;
- maximum temperature;
- position OFF.

Code	Notes	Article use		
161005			1	-

161
Pt1000 contact probe for pipes, Ø 6 mm.

Code	Notes	Article use		
161012	L cable 2,5 m	161010	1	-

161
Pt1000 probe pocket, size 1/2" M.

Code	Notes	Article use		
161013	L 60 mm	161010	1	-
161014	L 100 mm	161010, 150006, 257006	1	-

161
Pt1000 probe, Ø6 mm.

Code	Notes	Article use		
161015	L 20 mm, L cable 1,5 m	161010	1	-
161006	L 45 mm, L cable 2,5 m	161010	1	-

Thermostats

620
Room thermostat with changeover switch
16 (2,5) A - 250 V.
Ecodesign Directive Class: I.

Protection class: IP 30

Code	Notes		
620000	without warning lamp	1	20
620100	with warning lamp	1	20
620110	with warning lamp ON/OFF switch	1	20
620120	with warning lamp and SUMMER - WINTER switch	1	20

620
Digital room thermostat with display.
With 5 (3) A switched contact.
ON/OFF function with adjustable differential from 0,2 to 2 °C or proportional.
Two temperature levels + antifreeze.
SUMMER - WINTER control.
Adjustable temperature with 0,1 °C steps.
Ecodesign Directive Class: I.

Protection class: IP 30

Code	Electric supply		
620300	with battery	1	10
620302	230 V AC	1	10

6205

Control bar.
Timer switch input.
Pump outlet control.
SUMMER - WINTER switch input.

Electric supply: 230 V AC
Running power consumption: 5,5 VA
Protection class: IP 30 (with rubber cable gland)
Contact rating on switch-over: 10 A

Code	Notes		
620542	4 channels	1	8
620582	8 channels	1	8

738

Digital room chrono-thermostat with battery electric supply.
Backlit display and navigation via menu.
Weekly programmable clock. Fitted for phone programmer.
3 temperature levels + antifreeze.
30-minute minimum programme.
ON/OFF function with adjustable differential from 0,2 to 2 °C or proportional.
SUMMER - WINTER switch.
Adjustable temperature with 0,1°C steps.
Relais output with changeover switch contact: 5 (3) A / 250 V.
Ecodesign Directive Class: I-IV.

Electric supply: with battery
Protection class: IP 30

Code		
738407	1	10

Chrono-thermostats

618

Digital chrono-thermostat, with battery supply.
Daily and weekly programming.
Two temperature levels + antifreeze.
Fitted for phone programmer.
30-minute minimum programme.
Output contact: 8 (2) A.
Ecodesign Directive Class: I-IV.

Electric supply: with battery
Protection class: IP 30

Code	Notes		
618101	daily	1	10
618107	weekly	1	10

738

Digital room chrono-thermostat.
Backlit display and navigation via menu.
Weekly programmable clock.
Fitted for phone programmer.
3 temperature levels + antifreeze.
30-minute minimum programme.
ON/OFF function with adjustable differential from 0,2 to 2 °C or proportional.
SUMMER - WINTER switch.
Adjustable temperature with 0,1°C steps.
Relais output with changeover switch contact: 5 (3) A / 250 V.
Ecodesign Directive Class: I-IV.

Electric supply: 230 V AC
Protection class: IP 30

Code		
738427	1	-

739

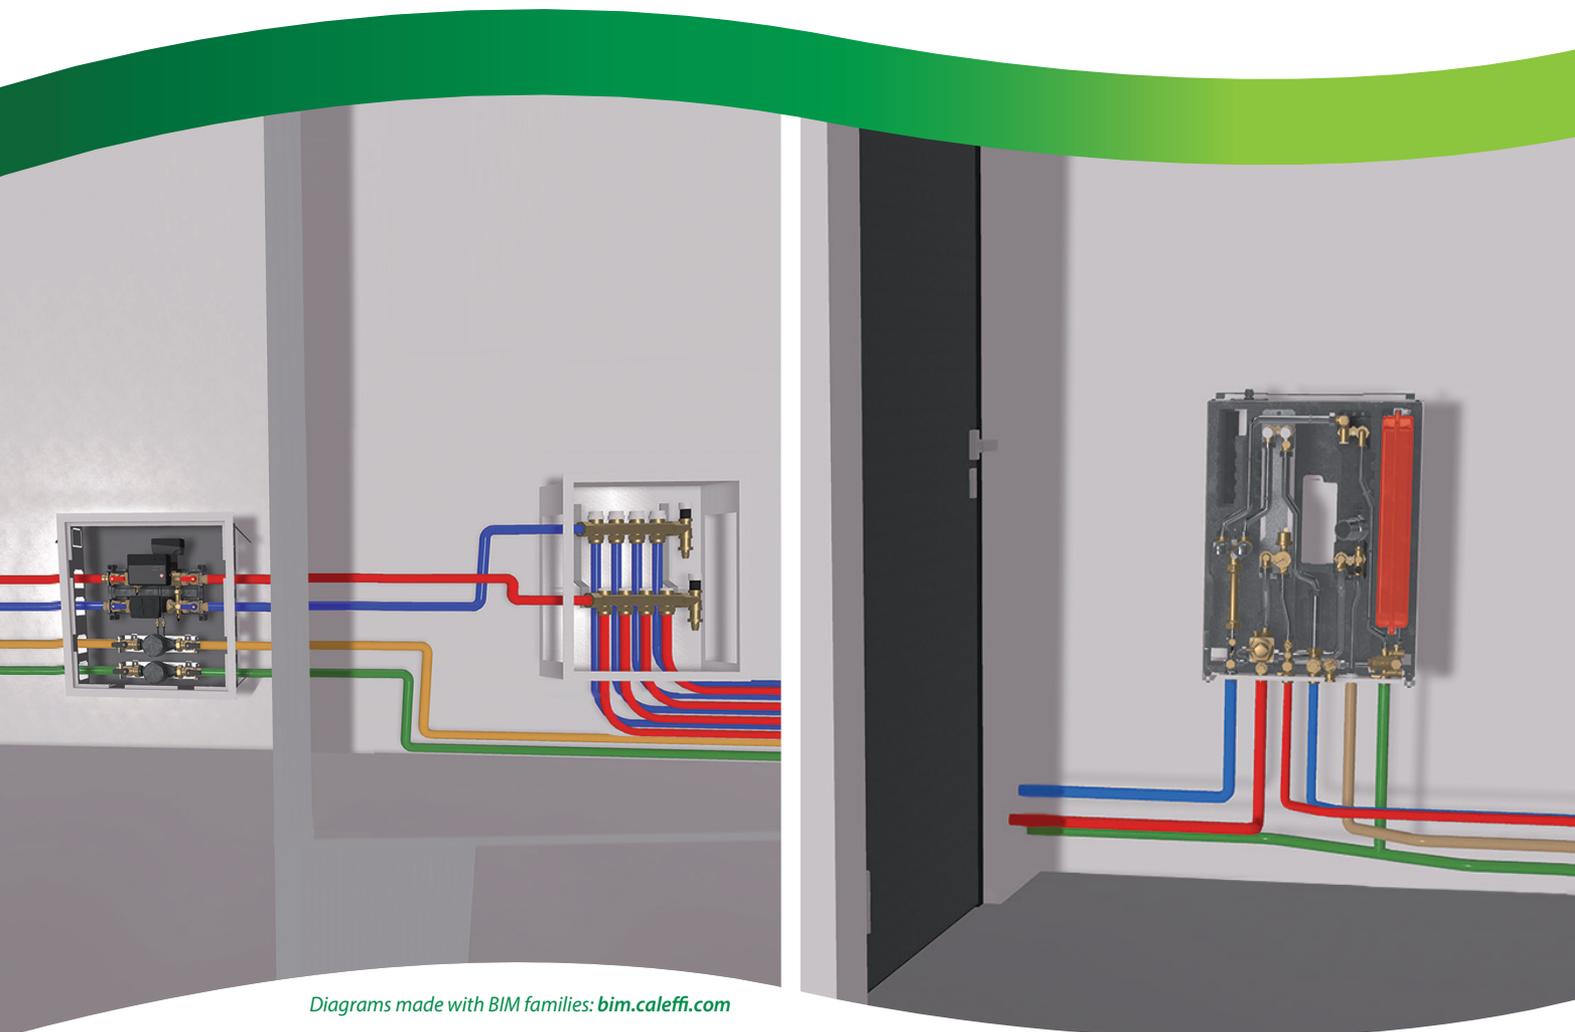

Digital chrono-thermostat, with battery supply.
Weekly programming. Quickly programming.
SUMMER - WINTER switch.
Output contact 5 (2) A.
Ecodesign Directive Class: I-IV

Electric supply: with battery
Protection class: IP 30
Length: 135 mm
Depth: 28 mm
Height: 90 mm

HEAT METERS

Turbine heat meters

7504 CONTECA® EASY

Direct heat meter for heating and cooling systems (*).

Complete with:

- electronic integrator with LCD display;
- pair of temperature probes ;
- pair of Y fitting probe pockets;
- turbine volume meter with pulse output;
- 2 pulse inlets for DCW and DHW reading.

Can be integrated with additional configuration options, to be ordered concurrently (*).

Medium temperature range: 2–90 °C

Nominal pressure: PN 16

Accuracy class: 3

Probe/cable length: 1,9 m

Electric supply: 24 V AC

Running power consumption: 1 W

Protection class: IP 54

Communication protocol: M-Bus on RS485

Code	Connection	Permanent flow rate (Qp) (m³/h)	Minimum flow rate (Qi) (l/h)	Measure type

 - Couple of 8 m temperature probes (cod. 750931)

Configuration options

7558

Cooling metering option.
The configuration option allows the upgrade on CONTECA EASY heat meters.

Code
755810

7508

MODBUS-RTU transmission option.
The option allows to add the function to CONTECA EASY heat meter devices.
Max n. devices on Modbus network: 50
Communication parameters: 9600,8,N,1

Code
750811

7558

Flow rate scanning software option for DHW recirculation.
The option allows to add the function to CONTECA EASY heat meters.
The option must be ordered in combination with 755826 00. or 755826 105 DHW meter and AUTOFLOW kit.

Code
755826

7509

Couple of temperature probes.
For Conteca Easy heat meters.
Probe/cable length: 8 m

Code
750931

Compact ultrasonic heat meters

**CAL1918
SENSONICAL ULTRA**

Compact direct ultrasonic heat meter for heating and cooling systems.
Complete with:
- electronic integrator with LCD display;
- pair of temperature probes;
- ultrasonic volume meter.
Non-replaceable battery (up to 10 years life).

Nominal pressure: PN 16
Permanent flow rate (Qp): 2,5 m³/h
Minimum flow rate (Qi): 25 l/h
Accuracy class: 2
Probe/cable length: 1,5 m
Electric supply: with battery
Protection class: IP 54

Code	Connection	Notes	Communication protocol		
CAL19185MI	3/4" M	with 3 pulse inputs	M-Bus	1	10

CAL1918

3/4" F ball shut-off valve with connection for M10x1 probe.

Code	Connection		
CAL19180	3/4" F	1	5

CAL1918

3/4" tee with connection for M10x1 probe.

Code	Connection		
CAL19181	3/4" F	1	5

WATER METERS

Water meters

7942

Water meter **with pulse output**.
Complete with fittings.

Medium: domestic water
Pulse weight: 10 l/pulse
Nominal pressure: PN 16
Probe/cable length: 1 m

2014/32/UE (MI001)

Code	Connection	Notes	Medium temperature range (°C)	Permanent flow rate (DW) (Q3) (m³/h)

*** for installation with horizontal dial facing upwards or in vertical position**

**** for installation with dial horizontal facing upwards**

Maximum extension of the volume meter/logger connection cable: 50 m.
For use with a shielded cable with the same cross-section and routed in a dedicated raceway.

Water metering for domestic hot water recirculation systems

750 NEW
AQUAPRO EASY

Multiple data acquisition device for domestic hot and cold water consumption. Complete with:
- electronic integrator with LCD display;
- 4 pulse inputs;
Supports DHW recirculation loops for up to two units.

Electric supply: 24 V AC
Running power consumption: 1 W
Protection class: IP 54
Communication protocol: ModBus

Code

750947 601

1 -

7558

Hydraulic kit for water metering with DHW recirculation.

For installation on templates code 700009.

Complete with:
- water meter with pulse output;
- 128 series AUTOFLOW® flow rate regulator.

Pulse weight: 1 l/pulse

Code	attacco contatore volumetrico	attacco AUTOFLOW	Nominal flow rate (l/h)	Permanent flow rate (DW) (Q3) (m³/h)

COMPACT USER MODULES

PLURIMOD user modules

7008  **PLURIMOD®**

Compact pre-assembled user module for heating and cooling systems (*).
 Complete with:
 - strainer cartridge with stainless steel mesh;
 - suitable for AUTOFLOW cartridge or static balancing headwork;
 - 2 way ball zone valve;
 - actuator with auxiliary microswitch;
 - **CONTECA® EASY** (24 V AC) heat meter with turbine flow meter.
 Reversible installation for primary side on left-hand (factory setting) or right-hand side.
 Can be integrated with additional configuration options, to be ordered concurrently (*).

Nominal pressure: PN 10
 Maximum recommended flow rate: 1600 l/h
 Medium temperature range: 3–90 °C

Code	Electric supply		
700815	230 V AC	1	2
700816	24 V AC	1	2

7008  **PLURIMOD® ULTRA**

Compact pre-assembled user module for heating and cooling systems (*).
 Complete with:
 - strainer cartridge with stainless steel mesh;
 - suitable for AUTOFLOW cartridge or static balancing headwork;
 - 2 way ball zone valve;
 - actuator with auxiliary microswitch;
 - **CONTECA® EASY ULTRA** (24 V AC) heat meter with ultrasonic flow meter.
 Reversible installation for primary side on left-hand (factory setting) or right-hand side.
 Can be integrated with additional configuration options, to be ordered concurrently (*).

Nominal pressure: PN 10
 Maximum recommended flow rate: 1800 l/h
 Medium temperature range: 3–90 °C

Code	Electric supply		
700815 007	230 V AC	1	2
700816 007	24 V AC	1	2

7008  **PLURIMOD®**

Compact user module with heat meter template for heating and cooling systems (*).

Complete with:
 - strainer cartridge with stainless steel mesh;
 - suitable for AUTOFLOW cartridge or static balancing headwork;
 - 2 way ball zone valve;
 - actuator with auxiliary microswitch;
 - copper template for heat meter.

Nominal pressure: PN 10
 Medium temperature range: 3–90 °C

Code	Electric supply		
700815 001	230 V AC	1	2
700816 001	24 V AC	1	2

7008

Spare technopolymer AUTOFLOW cartridge. Suitable for PLURIMOD user modules.

7008

Headwork for static balancing. Suitable for PLURIMOD user modules.

Code		
700801	1	-

(*): Available configuration options:
 - Cooling metering option (cod. 755810);
 - MODBUS-RTU transmission option (cod. 750811);
 - Flow rate scanning software option for DHW recirculation (cod. 755826);
 - Couple of 8 m temperature probes (cod. 750931).

PLURIMOD EASY self-balanced user modules

7002
PLURIMOD® EASY

Compact pre-assembled user module for heating and cooling systems (*). Complete with:
 - strainer cartridge with stainless steel mesh;
 - fixed setting pressure differential control valve;
 - 2 way zone valve with presetting;
 - thermoelectric actuator with auxiliary microswitch;
 - CONTECA® EASY (24 V AC) heat meter with turbine flow meter.
 Reversible installation for primary side on left-hand (factory setting) or right-hand side. Can be integrated with additional configuration options, to be ordered concurrently (*).

Nominal pressure: PN 10
 Medium temperature range: 3–90 °C

Code	Electric supply	Max. recommended flow rate (l/h)	Differential pressure fixed setting (kPa)		
700213	230 V AC	900	20	1	2
700214	24 V AC	900	20	1	2
700215	230 V AC	1400	30	1	2
700216	24 V AC	1400	30	1	2

7002
PLURIMOD® EASY ULTRA

Compact pre-assembled user module for heating and cooling systems (*). Complete with:
 - strainer cartridge with stainless steel mesh;
 - fixed setting pressure differential control valve;
 - 2 way zone valve with presetting;
 - thermoelectric actuator with auxiliary microswitch;
 - CONTECA® EASY ULTRA (24 V AC) heat meter with ultrasonic flow meter.
 Reversible installation for primary side on left-hand (factory setting) or right-hand side. Can be integrated with additional configuration options, to be ordered concurrently (*).

Nominal pressure: PN 10
 Medium temperature range: 3–90 °C

Code	Electric supply	Max. recommended flow rate (l/h)	Differential pressure fixed setting (kPa)	x		
700213 007	230 V AC	900	20		1	2
700214 007	24 V AC	900	20		1	2

700220 001	24 V AC	1400	30	1	2

Configuration options

7558

Cooling metering option.
 The configuration option allows the upgrade on CONTECA EASY heat meters.

Code		
755810	1	-

7508

MODBUS-RTU transmission option.
 The option allows to add the function to CONTECA EASY heat meter devices. Max n. devices on Modbus network: 50
 Communication parameters: 9600,8,N,1

Code		
750811	1	-

7558

Flow rate scanning software option for DHW recirculation.
 The option allows to add the function to CONTECA EASY heat meters. The option must be ordered in combination with 755826 00. or 755826 105 DHW meter and AUTOFLOW kit.

Code		
755826	1	-

(*) Configuration options needs to be chosen when placing the order on heat meter in which they have to be enabled.

Installation templates

7000

Recessed box for PLURIMOD® and PLURIMOD EASY® user modules.
Complete with:
- painted door for interior installation;
- technopolymer mounting bracket with thermal break;
- full EPP insulation;
- 2 pairs of ball shut-off valves;
- 2 technopolymer flushing pipes (T max. 55 °C);
- 2 positioning hooks for 7000 series domestic water outlets.

Height: 480 mm
Width: 480 mm
Depth: 130–160 mm

Code	Connection		
700000	3/4" M	1	-

7000

Recessed box with painted door for interior installation.
5 positioning hooks.

Height: 550 mm
Width: 550 mm
Depth: 120–150 mm

Code	Notes		
700024		1	-

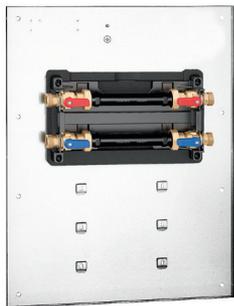

7000

Recessed box with painted door for interior installation.
12 positioning hooks.

Height: 1175 mm
Width: 550 mm
Depth: 140–180 mm

Code	Notes		
700025		1	-

7000

Wall hanging steel plate for PLURIMOD® and PLURIMOD EASY user modules.
Complete with:
- painted door for interior installation;
- technopolymer mounting bracket with thermal break;
- full EPP insulation;
- 2 pairs of ball shut-off valves;
- 2 technopolymer flushing pipes (T max. 55 °C);
- 3 positioning hooks for 7000 series domestic water outlets.

Height: 610 mm
Width: 480 mm

Code	Connection		
700000 003	3/4" M	1	-

7000

Template for PLURIMOD® and PLURIMOD EASY® user modules.
Complete with:
- painted door for interior installation;
- technopolymer mounting bracket with thermal break;
- full EPP insulation;
- 2 pairs of ball shut-off valves;
- 2 technopolymer flushing pipes (T max. 55 °C).

Code	Connection		
700000 002	3/4" M	1	-

Water meters

7000

Template for domestic water meter.
Complete with:
- BALLSTOP ball shut-off valve with check valve;
- water meter;
- ball shut-off valve with male terminal;
- technopolymer flushing pipe template (T max. 55 °C);
- mounting bracket.

Medium: domestic water
Permanent flow rate (Domestic water circuit) (Q3): 4,0 m³/h
Nominal pressure: PN 16

Code	Connection	Notes	Medium temperature range (°C)	Pulse weight		
700050	3/4" M	DHW	30–90	-	1	-
700051	3/4" M	DHW	30–90	10 l/pulse	1	-

700053	3/4" M	DCW	0–50	10 l/pulse	1	-

7000

Template for domestic water meter.
For 7942 series meter, 3/4" connections.
Complete with:
- BALLSTOP ball shut-off valve with check valve (inlet);
- ball shut-off valve (outlet);
- technopolymer flushing pipe template (T max. 55 °C);
- mounting bracket.

Code	Connection		
700009	3/4" M	2	10

Completion elements - single user with manifold

70028

Recessed box for PLURIMOD® and PLURIMOD® EASY.

Complete with:

- couple of manifolds 662 series (3-8 connections) for fan coil systems;
- painted door for interior use;
- composite mounting bracket with thermal break;
- full EPP insulation;
- 2 pairs of ball shut-off valves;
- 2 technopolymer flushing pipes (T max. 55 °C);
- 2 positioning hooks for 7000 series domestic water outlets with condensation collection tank.

Reversible installation for primary side on left-hand (factory setting) or right-hand side.

Height: 866 mm
Width: 600 mm
Depth: 140-180 mm

70029H	3/4" M	23 p. 1,5 - 8 out.	1	-

70026

Recessed box for PLURIMOD® and PLURIMOD® EASY.

Complete with:

- couple of manifolds 664 series (3-8 connections) for underfloor heating systems;
- painted door for interior use;
- composite mounting bracket with thermal break;
- full EPP insulation;
- 2 pairs of ball shut-off valves;
- 2 technopolymer flushing pipes (T max. 55 °C);
- 2 positioning hooks for 7000 series domestic water outlets with condensation collection tank.

Reversible installation for primary side on left-hand (factory setting) or right-hand side.

Height: 866 mm
Width: 600 mm
Depth: 140-180 mm

Code	Connection	Outlet connection		
70026C	3/4" M	3/4" M - 3 out.	1	-

For applications in cooling systems, provide insulation of the connection pipes (to be carried out on site) and of the manifolds (insulation for series 662 and 664).

COMPACT USER MODULES WITH DYNAMIC BALANCING

PLURIMOD XM user modules

**7004
PLURIMOD® XM**

Self balanced user module.
Complete with:
- 2 pairs of 3/4" M ball valves;
- differential pressure control valve with presetting;
- technopolymer template for flow meter (T max. 55 °C);
- inspectable strainer with probe connection;
- technopolymer mounting bracket with thermal break;
- first flushing strainer;
- full EPP insulation;
To be coupled with thermo-eleetric actuators 6565/6566 series.
With insulation.

Medium temperature range: 3–90 °C

Code	Flow rate working range (m³/h)		
700475 002	0,04–0,34	1	-
700485 002	0,20–1,05	1	-

Compact user modules with automatic flow rate control

7002
User module with heat meter template.
Complete with:
- 2 pairs of 3/4" M ball valves;
- pressure independent control valve with presetting;
- technopolymer template for flow meter (T max. 55 °C);
- inspectable strainer with probe connection;
- technopolymer mounting bracket.
To be coupled with thermo-electric actuators 6565/6566 series.

Medium temperature range: 3–90 °C

Code	Flow rate regulation (m³/h)		
700255 H20	0,02–0,20	1	-
700255 1H2	0,12–1,20	1	-
700255 H40	0,08–0,40	1	-

Actuators

6565

Thermo-electric actuator for FLOWMATIC 145 series control valve and 149 series kit. Quick-coupling installation with fixing clip adaptor.
Normally closed.

Ambient temperature range: 0–60 °C
Running power consumption: 1 W
Protection class: IP 54
Supply cable length: 1 m
Control signal: ON/OFF

Code	Electric supply		
656502	230 V AC	1	100
656504	24 V AC/DC	1	100

6566

Thermo-electric actuator. For FLOWMATIC 145 series control valve, 149 series kit, user modules 7002 and 7004 series. Quick-coupling installation with fixing clip adaptor.
Normally open.

Ambient temperature range: 0–60 °C
Running power consumption: 1 W
Protection class: IP 54
Supply cable length: 1 m
Control signal: ON/OFF

Code	Electric supply		
656602	230 V AC	1	100
656604	24 V AC/DC	1	100

COOLING INTERFACE UNIT

Cooling interface unit

797 ❄️

Wall-hanging cooling interface unit.

Complete with:

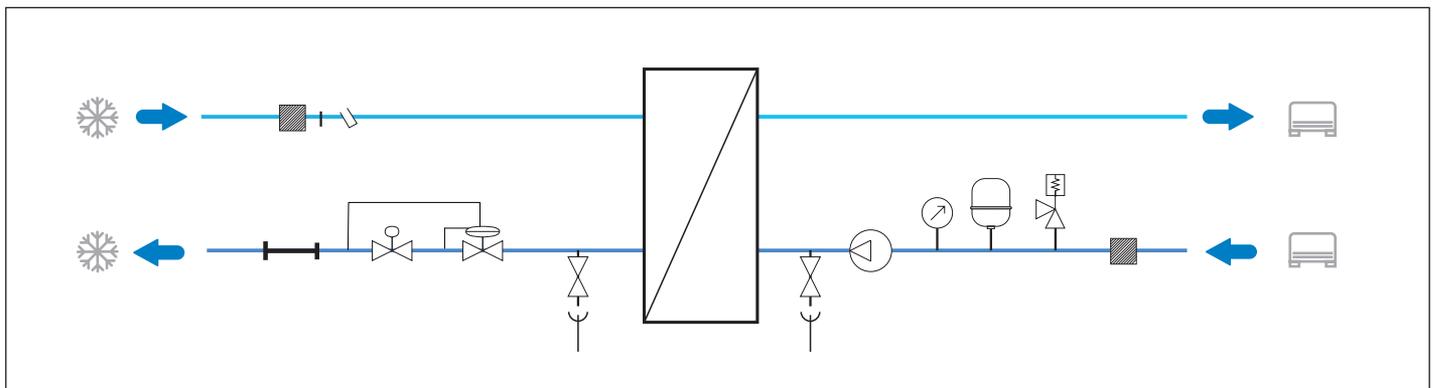

- pressure independant control valve;
 - electro-thermic actuator;
 - plate heat exchanger;
 - high efficiency pump;
 - 5 L expansion vessel;
 - safety relief valve (3 bar setting);
 - suitable for CONTECA EASY codes 750405G or 750705G heat meters, with 755810 option.
- With insulation.

Maximum working pressure: 16 bar
 Medium temperature range: 3–85 °C
 Electric supply: 230 V AC
 Maximum percentage of glycol: 30 %
 Medium: water, glycol solutions
 Height: 780 mm
 Width: 480 mm
 Depth: 220 mm
 Δp max.: 4 bar

Code	Connection	Nominal heat exchanger capacity (kW)		
797601	1" M	3	1	-
797603	1" M	8	1	-
797605	1" M	15	1	-

Hydraulic diagram 797 series

SUPPLY UNITS SUITABLE FOR HEAT METERING

Direct supply units

765 

Direct supply unit DN 25 for heating and cooling systems.

Factory configuration: upstream flow - supply on the RH side.

Complete with:

- high efficiency pump;
- designed for the installation of CONTECA EASY code 750405G or 750705G heat meters.

RH/LH reversible.

With insulation.

Maximum working pressure: 10 bar
 Medium temperature range: 5–90 °C
 Electric supply: 230 V AC
 Main centre distance: 125 mm
 Flow rate with available head 4 m w.g.: 2,1 m³/h
 Type of pump: Para 25-9

Code	Boiler side connection	System side connection		
765600HE	1 1/2" M	1" F	1	-

Motorised regulating units

767 

Motorised regulating unit DN 25, for heating and cooling systems.

Factory configuration: upstream flow - supply on the RH side.

Complete with:

- high-efficiency pump;
- motorised mixing valve;
- designed for heat meter installation CONTECA EASY codes 750405G or 750705G.

RH/LH reversible.

With insulation.

With auxiliary microswitch.

Maximum working pressure: 10 bar
 Medium temperature range: 5–90 °C
 Adjustment temperature range: 25–50 °C
 Main centre distance: 125 mm
 Type of pump: Para 25-9

Code	Boiler side connection	System side connection	Electric supply	Control signal		
767662HE2	1 1/2" M	1" F	230 V AC	3 point	1	-
767664HE2	1 1/2" M	1" F	24 V AC/DC	0–10 V	1	-

Thermostatic regulating units

766 

Thermostatic regulating unit DN 25 for heating systems.

Factory configuration: upstream flow - supply on the RH side.

Complete with:

- high efficiency pump;
- designed for the installation of CONTECA EASY code 750405G or 750705G heat meters.

RH/LH reversible.

With insulation.

Maximum working pressure: 10 bar
 Medium temperature range: 5–90 °C
 Adjustment temperature range: 25–50 °C
 Electric supply: 230 V AC
 Main centre distance: 125 mm
 Flow rate with available head 4 m w.g.: 2,1 m³/h
 Type of pump: Para 25-9

Code	Boiler side connection	System side connection		
766600HE	1 1/2" M	1" F	1	-

WALL MOUNTED HEAT INTERFACE UNITS WITH ELECTRONIC REGULATION

Direct heat interface unit with advanced electronic regulation

SATK22 

Electronic wall-hanging HIU for low temperature heating system.

Complete with:

- differential pressure control valve;
- modulating control valves;
- thermal safety thermostat and valve;
- high efficiency pump (primary circuit);
- plate heat exchanger (DHW circuit);
- user interface with chronothermostat option;
- suitable to CONTECA EASY 7504K and 7507K series heat meters.

Main electronic functions:

- DHW exchanger preheating programmable on hourly base;
- primary flow limitation;
- outside compensated temperature regulation.

With insulation.

Maximum working pressure: 10 bar

Δp max.: 6 bar

Primary inlet working temperature range: 2–90 °C

Adjustment temperature range (heating system): 25–45 °C

Adjustment temperature range (DHW): 42–60 °C

Maximum DHW instantaneous production: 24 l/min

Electric supply: 230 V AC

Running power consumption: 80 W

Height: 500 mm

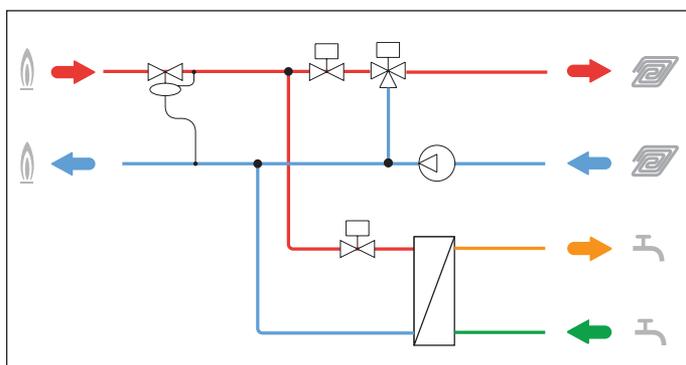

Width: 490 mm

Depth: 245 mm

Code	Notes	Nominal heat exchanger capacity		
SATK22103	-	50 kW	1	-
SATK22105	-	60 kW	1	-
SATK22107	for systems with low primary temperature	-	1	-

Hydraulic diagram SATK22 - LOW temperature

SATK22 

Electronic wall-hanging HIU for medium temperature heating system.

Complete with:

- differential pressure control valve;
- modulating control valves;
- high efficiency pump (primary circuit);
- plate heat exchanger (DHW circuit);
- user interface with chronothermostat option;
- suitable to CONTECA EASY 7504K and 7507K series heat meters.

Main electronic functions:

- DHW exchanger preheating programmable on hourly base;
- primary flow limitation;
- outside compensated temperature regulation.

With insulation.

Maximum working pressure: 10 bar

Δp max.: 6 bar

Primary inlet working temperature range: 2–90 °C

Adjustment temperature range (heating system): 45–75 °C

Adjustment temperature range (DHW): 42–60 °C

Maximum DHW instantaneous production: 24 l/min

Electric supply: 230 V AC

Running power consumption: 80 W

Height: 500 mm

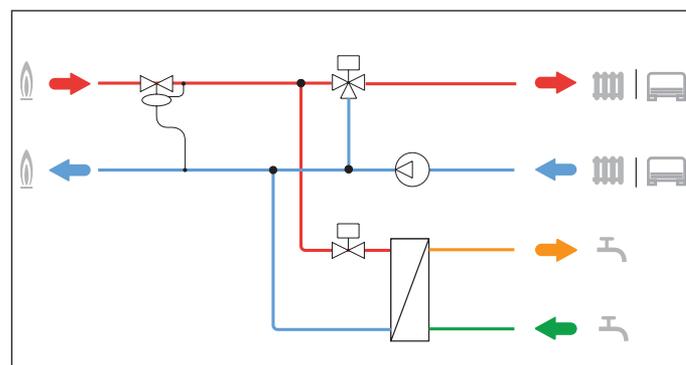

Width: 490 mm

Depth: 245 mm

Code	Notes	Nominal heat exchanger capacity		
SATK22203	-	50 kW	1	-

Hydraulic diagram SATK22 - HIGH temperature, with booster pump

Indirect heat interface unit with advanced electronic regulation

SATK32

Electronic wall-hanging HIU with hydraulic separation.

Complete with:

- differential pressure control valve;
- modulating control valves;
- thermal safety thermostat;
- high efficiency pump (heating circuit);
- plate heat exchanger (DHW circuit);
- plate heat exchanger (heating circuit);
- 7 L expansion vessel;
- safety relief valve (3 bar setting);
- automatic filling unit with CB type backflow preventer;
- suitable to CONTECA EASY 7504K and 7507K series heat meters.

Main electronic functions:

- DHW exchanger preheating programmable on hourly base;
- return temperature control;
- primary flow limitation;
- outside compensated temperature regulation.

With insulation.

Maximum working pressure: 16 bar

Δp max.: 6 bar

Primary inlet working temperature range: 2–90 °C

Adjustment temperature range (heating system): 25–75 °C

Adjustment temperature range (DHW): 42–60 °C

Maximum DHW instantaneous production: 24 l/min

Electric supply: 230 V AC

Running power consumption: 80 W

Height: 630 mm

789 **NEW**
Pair of three-way flushing valves with removable bypass and preinstalled PT ports.
Complete with:
- lateral levers with flow direction markings;
- frontal caps with preinstalled PT ports;
- U-shaped copper by-pass pipe;
- full EPP insulation with internal by-pass holder.
With insulation.

Maximum working pressure: 16 bar
Medium temperature range: 5-90 °C
Main centre distance: 70 mm

Code	HIU side connection	Primary connection		
789112	3/4" F	Ø 22	1	5

Direct heat interface unit with basic electronic regulation

SATK20

Mechanical wall-hanging HIU for low temperature heating system.

Complete with:

- modulating control valves;
- thermal safety thermostat and valve;
- high efficiency pump (heating circuit);
- plate heat exchanger (DHW circuit);
- PPE insulation cover;
- suitable to CONTECA EASY 7504K and 7507K series heat meters.

Main electronic functions:

- DHW exchanger preheating;
- compensated set point regulation.

Maximum working pressure: 10 bar

Δp max.: 0,9 bar

Primary inlet working temperature range: 2–85 °C

Adjustment temperature range (heating system): 25–45 °C

Adjustment temperature range (DHW): 42–60 °C

MECHANICAL WALL MOUNTED HEAT INTERFACE UNIT

Mechanical wall mounted heat interface unit

SATK15  

Mechanical wall-hanging HIU for high temperature heating system.

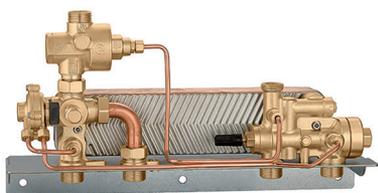

Complete with:

- differential pressure control valve with fixed setting;
- diverter valve for DHW priority;
- proportional mechanical flow rate control valve;
- plate heat exchanger (DHW circuit);
- plate heat exchanger (DHW circuit).

Maximum working pressure: 10 bar

Δp max.: 2 bar

Maximum DHW instantaneous production: 18 l/min

Code	Notes		
SATK15324 DPCV	-	1	-
SATK15325 DPCV	for systems with low primary temperature	1	-

SATK15  

Mechanical wall-hanging HIU for high temperature heating system with bottom connections.

Complete with:

- differential pressure control valve with fixed setting;
 - diverter valve for DHW priority;
 - proportional mechanical flow rate control valve;
 - plate heat exchanger (DHW circuit);
 - suitable to CONTECA EASY codes 750405G or 750705G heat meters.
- Instantaneous DHW production.

Maximum working pressure: 10 bar

Δp max.: 2 bar

Maximum DHW instantaneous production: 18 l/min

Code	Notes		
SATK15324 ABC	-	1	-
SATK15325 ABC	for systems with low primary temperature	1	-

SATK16  

Mechanical wall-hanging HIU.

Complete with:

- differential pressure control valve with fixed setting;
 - diverter valve for DHW priority;
 - proportional mechanical flow rate control valve;
 - plate heat exchanger (DHW circuit);
 - heating zone valve with thermoelectric actuator;
 - thermostatic mixing valve;
 - suitable to CONTECA EASY codes 750405G or 750705G heat meters.
- Instantaneous DHW production.

Maximum working pressure: 10 bar

Depth: 200 mm

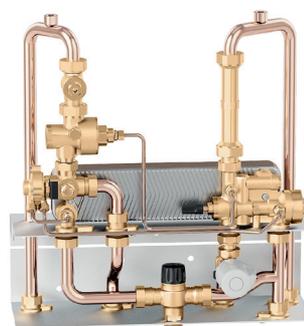

Height: 450 mm

Width: 420 mm

Δp max.: 2 bar

Δp max. - Notes: primary circuit

Primary inlet working temperature range: 2-85 °C

Code

RECESS MOUNTED HEAT INTERFACE UNIT WITH ELECTRONIC REGULATION

Recess mounted direct heat interface unit with basic regulation

SATK50 

Electronic recessed HIU for low temperature heating system.

Complete with:

- high temperature additional outlet;
- modulating control valve;
- thermal safety thermostat;
- high efficiency pump (heating circuit);
- plate heat exchanger (DHW circuit);
- suitable to CONTECA EASY 7504K and 7507K heat meters.

Main electronic functions:

- DHW exchanger preheating programmable on hourly base;
- outside compensated temperature regulation.

Maximum working pressure: 10 bar

Δp max.: 0,9 bar

Primary inlet working temperature range: 2–85 °C

Adjustment temperature range (DHW): 42–60 °C

Adjustment temperature range (heating system): 25–45 °C

Maximum DHW instantaneous production: 18 l/min

Electric supply: 230 V AC

Running power consumption: 80 W

Height: 410 mm

Width: 570 mm

Depth: 110 mm

SATK50 

Electronic recessed HIU for medium temperature heating system.

Complete with:

- modulating control valves;
- high efficiency pump (heating circuit);
- plate heat exchanger (DHW circuit);
- suitable to CONTECA EASY 7504K and 7507K heat meters.

Main electronic functions:

- DHW exchanger preheating programmable on hourly base;
- outside compensated temperature regulation.

Maximum working pressure: 10 bar

Δp max.: 0,9 bar

Primary inlet working temperature range: 2–85 °C

Adjustment temperature range (DHW): 42–60 °C

Adjustment temperature range (heating system): 45–75 °C

Maximum DHW instantaneous production: 18 l/min

Hydraulic diagram SATK50 - HIGH temperature

7949

Recessed box for SATK50.

Complete with:

- painted sheet metal box;
- ball shut-off valves.

For SATK50 series.
Height: 700 mm
Width: 600 mm
Depth: 120 mm

Code	Notes		
794950		1	-

Recess mounted indirect heat interface unit with basic regulation

SATK60

Compact recessed indirect heat interface unit **with hydraulic separation**.

Complete with:

- modulating control valves;
- thermal safety thermostat;
- high-efficiency pump (heating circuit);
- plate heat exchanger (DWS circuit);
- plate heat exchanger (heating circuit);
- expansion vessel 7 L;
- safety valve (setting 3 bar);
- charging unit with CB-type backflow preventer;
- suitable to CONTECA EASY cod. 750405G o 750705G heat meters.

Main electronic functions:

- DWS heat exchanger preheating;
- compensated set point regulation.

Maximum working pressure: 16 bar

Δp max.: 1,65 bar

Primary inlet working temperature range: 2–85 °C

Adjustment temperature range (DHW): 42–60 °C

Adjustment temperature range (heating system): 25–75 °C

Maximum DHW instantaneous production: 18 l/min

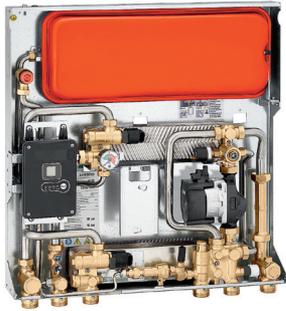

Electric supply: 230 V AC

Running power consumption: 80 W

Height: 590 mm

Width: 570 mm

Depth: 110 mm

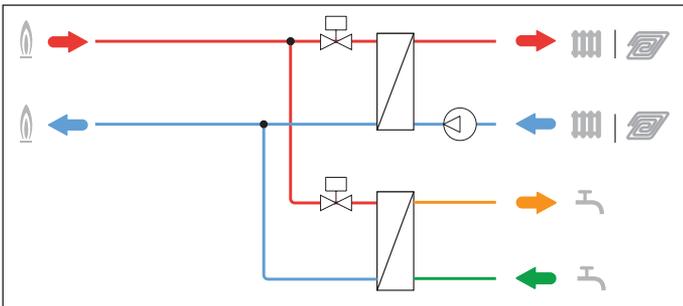

Nominal heat exchanger capacity (kW)

- ball shut-off valves.

For SATK60 series.

Height: 890 mm

Width: 625 mm

Depth: 120 mm

Code			
794960		1	-

COMPLEMENTARY HEAT METERS

Complementary heat meters

**7504G
CONTECA® EASY**

Direct heat meter for heating and cooling systems (*).
Complete with:
- electronic integrator with LCD display;
- pair of immersion temperature probes;
- turbine volume meter with pulse output;
- 2 pulse inputs for DHW and DCW.
Upgradable with configuration options to be ordered together (*).

Medium temperature range: 2–90 °C
Nominal pressure: PN 16
Accuracy class: 3
Probe/cable length: 1 m
Electric supply: 24 V AC
Running power consumption: 1 W
Protection class: IP 54
Communication protocol: M-Bus on RS485

Code	Connection	Permanent flow rate (Qp) (m³/h)	Minimum flow rate (Qi) (l/h)	Measure type		
750405G	1" M	2,5	50	single nozzle	1	-

**7504K
CONTECA® EASY**

Direct heat meter for heating and cooling systems (*).
Complete with:
- electronic integrator with LCD display;
- pair of immersion temperature probes;
- turbine volume meter with pulse output;
- mounting brackets;
- pulse input for DCW.
Upgradable with configuration options to be ordered together (*).

Medium temperature range: 2–90 °C
Nominal pressure: PN 16
Accuracy class: 3
Probe/cable length: 1 m
Electric supply: 24 V AC
Running power consumption: 1 W
Protection class: IP 54
Communication protocol: M-Bus on RS485

Code	Connection	Permanent flow rate (Qp) (m³/h)	Minimum flow rate (Qi) (l/h)	Measure type		
750405K	1" M	2,5	50	single nozzle	1	-

**7507G
CONTECA® EASY
ULTRA**

Direct heat meter for heating and cooling systems(*).
Complete with:
- electronic integrator with LCD display
- pair of immersion temperature probes;
- ultrasonic volume meter with pulse output;
- 2 pulse inputs for DHW and DCW.
Upgradable with configuration options to be ordered together (*).

Medium temperature range: 2–90 °C
Nominal pressure: PN 16
Accuracy class: 2
Probe/cable length: 1 m
Electric supply: 24 V AC
Running power consumption: 1 W
Protection class: IP 54
Communication protocol: M-Bus on RS485

Code	Connection	Permanent flow rate (Qp) (m³/h)	Minimum flow rate (Qi) (l/h)		
750705G	1" M	2,5	10	1	-

**7507K
CONTECA® EASY
ULTRA**

Direct heat meter for heating and cooling systems (*).
Complete with:
- electronic integrator with LCD display;
- pair of immersion temperature probes;
- ultrasonic volume meter with pulse output;
- mounting brackets;
- pulse input for DCW.
Upgradable with configuration options to be ordered together (*).

Medium temperature range: 2–90 °C
Nominal pressure: PN 16
Accuracy class: 2
Probe/cable length: 1 m
Electric supply: 24 V AC
Running power consumption: 1 W
Protection class: IP 54
Communication protocol: M-Bus on RS485

Code	Connection	Permanent flow rate (Qp) (m³/h)	Minimum flow rate (Qi) (l/h)		
750705K	1" M	2,5	10	1	-

7558

Cooling metering option.
The configuration option allows the upgrade on CONTECA EASY heat meters.

Code	Notes	Quantity	Availability
755810		1	-

7508

MODBUS-RTU transmission option.
The option allows to add the function to CONTECA EASY heat meter devices.
Max n. devices on Modbus network: 50
Communication parameters: 9600,8,N,1

Code	Notes	Quantity	Availability
750811		1	-

(*) Configuration options needs to be chosen when placing the order on heat meter in which they have to be enabled.

COMMUNICATION PROTOCOL CONVERTERS

Communication protocol converters

7550

BACnet/MODBUS-RTU converter for connection with BMS systems.
Pre-configured for communication with:
- CONTECA EASY heat meters and AQUAPRO EASY data acquisition devices (max. 35 devices).
- LEGIOMIX (max. 32 devices) and LEGIOMIX 2.0 (max. 25 devices) electronic mixing valves.
To be mounted on DIN rail.

Ambient temperature range: -20–70 °C
Electric supply: 12-24 V DC, 24 V AC
Running power consumption: 3 W

Code	Notes	Quantity	Availability
755052		1	-

7550

M-Bus/RS-485 slave converter.
For CONTECA EASY heat meters and AQUAPRO EASY data acquisition devices.

Ambient temperature range: -10–60 °C
Electric supply: 230 V AC

Code	Notes	Quantity	Availability
755058	M-Bus/RS-485 slave converter, max. 250 devices	1	-

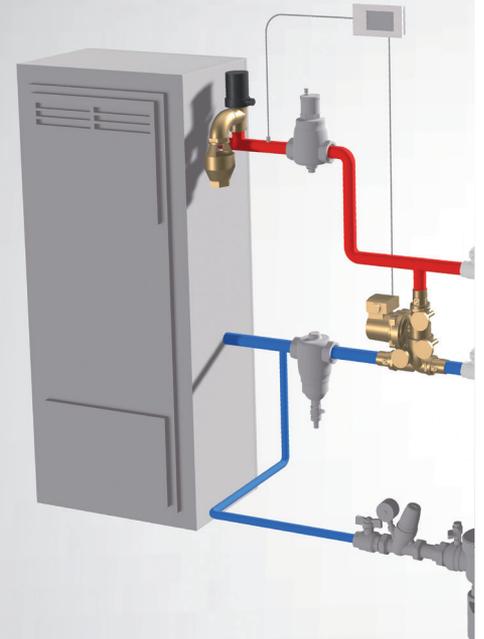

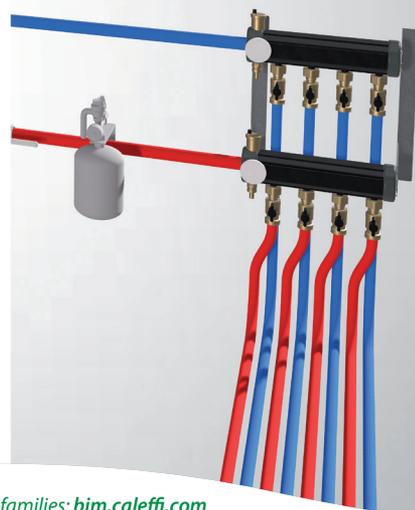

755

M-Bus/RS-485 slave converter.
For CONTECA EASY heat meters and AQUAPRO EASY data acquisition devices.

Ambient temperature range: -10–60 °C

Code	Notes	Quantity	Availability
755158	M-Bus/RS-485 slave converter, max. 5 devices	1	-

COMPONENTS FOR SOLAR THERMAL SYSTEMS

The CALEFFI SOLAR product range has been specifically developed for use in solar thermal systems, where high temperatures can normally be reached and where, depending on the kind of system, there can be glycol. Materials and performance of the components must necessarily take into account these particular operating conditions.

- Components for closed systems

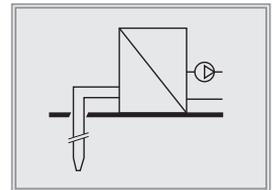

- Components for opened systems

COMPONENTS FOR GEOTHERMAL SYSTEMS

The products in the CALEFFI GEO series have been specifically designed for use in heat pump systems. In ground source heat pumps a mixture of water and antifreeze fluid is generally used to protect against freezing temperatures. The components are made with high-performance materials for this type of applications.

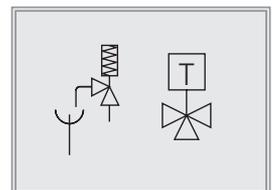

- Components for water-water heat pumps

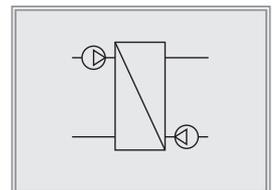

COMPONENTS FOR BIOMASS SYSTEMS

The CALEFFI BIOMASS® product series has been created specifically to be used in circuits of systems with wood solid fuel generators, operating at high temperature with water or glycol solutions as thermal medium. The materials of the components and their performance take account of the specific system needs in terms of efficiency and safety of the generators and systems.

SAFETY DEVICES FOR SOLAR THERMAL SYSTEMS

Safety relief valves for solar thermal systems

253

Safety relief valves for solar systems.

TÜV approved according to TRD 721 - SV 100 § 7.7.

Medium temperature range: -30-160 °C
 Nominal pressure: PN 10
 Finish: nickel plated
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions
 Material: brass

Code	Connection	Drain connection	Maximum discharge rating (kW)	Pressure setting (bar)

Anti-freeze devices

603
ICECAL®

Anti-freeze safety device.
For solar thermal systems, to protect the hot water storage.
 PATENT

Maximum working pressure: 10 bar
 Ambient temperature range: -30-90 °C
 Opening temperature: 3 °C
 Closing temperature: 4 °C
 Material: dezincification resistant brass DR

Code	Connection		
603040	1/2" F captive nut	1	50

Temperature and pressure relief valves for solar thermal systems

309

Temperature and pressure relief valve.
For solar thermal systems, to protect the hot water storage.
 For solar thermal systems, to protect the hot water storage.
 Certified to EN 1490 with settings: 7 - 10 bar.

Finish: chrome plated
 Material: dezincification resistant brass DR
 Temperature setting: 90 °C

Code	Connection	Drain connection	Maximum discharge rating (kW)	Pressure setting (bar)

AUTOMATIC AIR VENTS AND DEAERATORS FOR SOLAR THERMAL SYSTEMS

Automatic air vents for solar thermal systems

250

Automatic air vent for solar thermal systems.
 Complete with:
 - automatic air vent for solar thermal systems;
 - shut-off cock complete with seal.

Maximum working pressure: 10 bar
 Maximum air discharge pressure: 5 bar
 Medium temperature range: -30-180 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions
 Material: brass
 Finish: nickel plated

Code	Connection	Notes		
250031	3/8" M	without cock	1	25
250131	3/8" M	-	1	25
250041	1/2" M	without cock	1	25

The automatic air vent must be shut off after the system has been filled.

250

Shut-off cock.
Complete with seal.

Maximum working pressure: 10 bar
Medium temperature range: -30–200 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions
Material: brass
Finish: nickel plated

Code	Connection 1	Connection 2	Notes		
250300	3/8" M	3/8" F	butterfly handle	1	10
250400	1/2" M	1/2" F	lever handle	1	10

250

Automatic air vent for solar thermal systems.
Complete with:
- automatic air vent for solar thermal systems;
- shut-off cock complete with seal.

Maximum working pressure: 10 bar
Maximum air discharge pressure: 2,5 bar
Medium temperature range: -30–180 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions
Material: brass
Finish: nickel plated

Code	Connection	Notes		
250831	3/8" M	without cock	10	50
250931	3/8" M	-	1	50

251 DISCALAIR®

High-performance automatic air vent for solar thermal systems.

Maximum working pressure: 10 bar
Maximum air discharge pressure: 10 bar
Medium temperature range: -30–160 °C
Maximum percentage of glycol: 50 %
Medium: glycol solutions
Material: brass
Finish: nickel plated

Code	Connection		
251004	1/2" F	1	10

Deaerators for solar thermal systems

251 DISCAL®

Deaerator for solar thermal systems.

Maximum working pressure: 10 bar
Maximum air discharge pressure: 10 bar
Medium temperature range: -30–160 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions
Material: brass

Code	Connection		
251003	3/4" F	1	10

251 DISCAL®

Deaerator for solar thermal systems.
With drain.

Maximum working pressure: 10 bar
Maximum air discharge pressure: 10 bar
Medium temperature range: -30–160 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions
Material: brass

Code	Connection		
251006	1" F	1	-
251007	1 1/4" F	1	-

Manual air separator for solar thermal systems

251

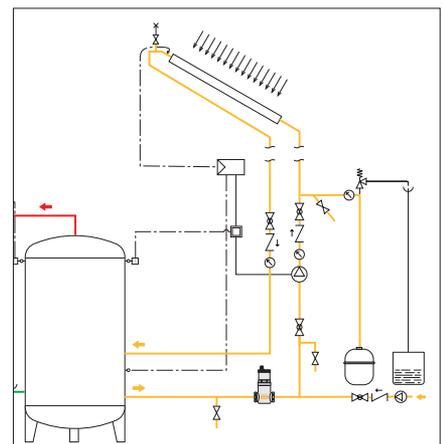

Manual air separator for solar thermal systems.

Maximum working pressure: 10 bar
Medium temperature range: -30–200 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions
Material: brass

Code	Connection		
251093	3/4" F	1	10

Application diagram of DISCAL® 251 series

PUMP STATIONS FOR SOLAR THERMAL SYSTEMS

Pump stations for solar thermal systems

278

Pump station for solar thermal systems, return connection.

With PWM control.

Complete with:

- Solar circulation pump;
- 253 series safety relief valve for solar thermal systems;
- filler/drain cock;
- instrument holder fitting with pressure gauge;
- flow meter;
- return temperature gauge;
- shut-off and check valve;
- 2 hose connections.

With insulation.

Maximum working pressure: 10 bar
 Medium temperature range: -10-110 °C
 Medium: water, glycol solutions
 Maximum percentage of glycol: 50 %
 Type of pump: UPM3 15-75
 Electric supply: 230 V AC

Code	Connection	Notes	Flow meter scale (l/min)		
278050HE	3/4" F	with PWM control	1-13	1	-
278052HE	3/4" F	-	8-30	1	-

Can be combined with controller featuring PWM or ON/OFF control.

279

Pump station for solar thermal systems, flow and return connection.

With PWM control.

Complete with:

- Solar circulation pump;
- 253 series safety relief valve for solar thermal systems;
- filler/drain cock;
- instrument holder fitting with pressure gauge;
- flow meter;
- return temperature gauge;
- shut-off and check valve;
- 2 hose connections.

With insulation.

Maximum working pressure: 10 bar
 Medium temperature range: -10-110 °C
 Medium: glycol solutions, water
 Maximum percentage of glycol: 50 %
 Type of pump: UPM3 15-75
 Electric supply: 230 V AC

Code	Connection	Flow meter scale (l/min)		
279050HE	3/4" F	1-13	1	-
279052HE	3/4" F	8-30	1	-

Can be combined with controller featuring PWM or ON/OFF control.

255

Pump station for solar thermal systems, flow and return connection.

With PWM control.

Complete with:

- Grundfos Solar circulation pump with PWM control only;
- 253 series safety relief valve for solar thermal systems;
- 2 filler/drain cocks complete with hose connection;
- instrument holder fitting with pressure gauge;
- flow regulator with flow meter;
- air vent device;
- flow temperature gauge;
- return temperature gauge;
- 2 shut-off and check valves.

Can be combined with controller featuring PWM control.
(For other settings refer to 253).

With insulation.

Maximum working pressure: 10 bar
 Medium temperature range: -30–120 °C
 Medium: water, glycol solutions
 Maximum percentage of glycol: 50 %
 Type of pump: PML 25-145
 Electric supply: 230 V AC

Code	Connection	Flow meter scale (l/min)		
255266HE	1" F	5-40	1	-

Can be combined with controller featuring PWM control.

Regulator for solar thermal systems

278

Digital regulator DeltaSol SLL with PWM control. Complete with 3 Pt1000 probes, with optional fourth probe. Functions: differential temperature regulator with supplementary and optional functions. Inlet: for 4 Pt1000 temperature probes. Outputs: 3 semiconductor relays. 2 PWM. **With insulation.**

Electric supply: 230 V AC

Code		
278005	1	-

Cable with PWM connector.

Electric supply: 230 V AC
 Supply cable length: 1 m

Code	Notes		
F29883		1	-

161

Pt1000 probe pocket, size 1/2" M.

Code	Notes	Article use		
161014	L 100 mm	161010, 150006, 257006	1	-

Expansion vessels for solar thermal systems

259

Welded expansion vessel only for primary circuit of solar thermal systems, EC certification.
Bladder membrane.
Conforms to EN standard 13831.

Maximum working pressure: 10 bar
System working temperature range: -10–120 °C
Diaphragm temperature range: -10–70 °C
Medium: water, glycol solutions
Maximum percentage of glycol: 50 %

Pre-charge: 2,5 bar

Code	Connection	Volume (l)		
259008	3/4" M	8	1	
259012	3/4" M	12	1	
259018	3/4" M	18	1	
259025	3/4" M	25	1	
259033	3/4" M	33	1	

259

Welded expansion vessel only for primary circuit of solar thermal systems, EC certification.
Diaphragm membrane.
Conforms to EN standard 13831.

Maximum working pressure: 10 bar
System working temperature range: -10–120 °C
Diaphragm temperature range: -10–70 °C
Medium: water, glycol solutions
Maximum percentage of glycol: 50 %

Pre-charge: 2,5 bar

Code	Connection	Volume (l)		
259050	3/4" M	50	1	
259080	1" M	80	1	

5580

Ball shut-off valve for expansion vessels, **with drain cock. For solar thermal systems.**

Maximum working pressure: 6 bar
Medium temperature range: 5–120 °C
Medium: water, glycol solutions
Maximum percentage of glycol: 50 %

Code	Connection		
558052	3/4" F	1	20
558062	1" F	1	20

Accessories and spare parts for pump stations for solar thermal systems

255

Expansion vessel connection kit.
Complete with:
- stainless steel hose (L=610 mm);
- automatic shut-off cock;
- wall mounting bracket (for vessels up to 24 litres).

Maximum working pressure: 10 bar
Medium temperature range: -10–110 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions

Code	Connection		
255007	3/4" F	1	-

255

System filling pump for pump stations 279, 278 and 255 series.
For 255, 256, 267, 266, 279 and 278 series circulation units.

Code		
255010	1	-

Accessory for circulation units in the 266, 267, 268, 269, 278 and 279 series.
For use during installation of 253 series 1/2" valves.

Code	Notes		
F21224	adapter	1	-

SPARE PARTS FOR CIRCULATION UNITS

Spare parts for circulation units for 278-279 series

Spare pump UPM3 15-75 for 278HE and 279HE series, complete with cable.

Code	Type of pump		
F29885	UPM3 15-75	1	-

Spare parts for circulation units for 255 series

Spare pump UPML Solar 25-145 for 255266 unit. **May only be used in conjunction with controller featuring PWM control.**

Code	Notes		
F0000565	PML 25-145 pump, with PWM control only	1	-

FITTINGS FOR SOLAR THERMAL SYSTEMS

Mechanical O-ring seal for solar thermal systems

2540

Female fitting, mechanical O-Ring seal for solar thermal systems.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
 Black nickel-plated nut.

Maximum working pressure: 16 bar
 Medium temperature range: -30–160 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions

Code	Connection	Pipe diameter		
254055	3/4" F	Ø 15	1	25
254058	3/4" F	Ø 18	1	25
254052	3/4" F	Ø 22	1	25
254062	1" F	Ø 22	1	25
254068	1" F	Ø 28	1	10

2543

Coupling sleeve, mechanical O-Ring seal for solar thermal systems.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
 Black nickel-plated nut.

Maximum working pressure: 16 bar
 Medium temperature range: -30–160 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions

Code	Pipe diameter		
254305	Ø 15	1	25
254308	Ø 18	1	25
254302	Ø 22	1	25

2544

Male fitting, mechanical O-Ring seal for solar thermal systems.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
 Black nickel-plated nut.

Maximum working pressure: 16 bar
 Medium temperature range: -30–160 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions

Code	Connection	Pipe diameter		
254455	3/4" M	Ø 15	1	25
254458	3/4" M	Ø 18	1	25

254465	1" M	Ø 15	1	25
254462	1" M	Ø 22	1	25

2545

Elbow coupling sleeve, mechanical O-Ring seal for solar thermal systems.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
 Black nickel-plated nut.

Maximum working pressure: 16 bar
 Medium temperature range: -30–160 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions

Code	Pipe diameter		
254505	Ø 15	1	25
254508	Ø 18	1	25
254502	Ø 22	1	25

2546

Elbow coupling sleeve, mechanical O-Ring seal for solar thermal systems.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
 Black nickel-plated nut.

Maximum working pressure: 16 bar
 Medium temperature range: -30–160 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions

Code	Pipe diameter		
254602	Ø 22	1	20

2547

Male elbow fitting, mechanical O-Ring seal for solar thermal systems.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
 Black nickel-plated nut.

Maximum working pressure: 16 bar
 Medium temperature range: -30–160 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions

Code	Connection	Pipe diameter		
254755	3/4" M	Ø 15	1	25
254758	3/4" M	Ø 18	1	25
254752	3/4" M	Ø 22	1	25

2548

Female elbow fitting, mechanical O-Ring seal for solar thermal systems.
For annealed copper, hard copper, brass, mild steel and stainless steel pipes.
 Black nickel-plated nut.

Maximum working pressure: 16 bar
 Medium temperature range: -30–160 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions

Code	Connection	Pipe diameter		
254855	3/4" F	Ø 15	1	25
254858	3/4" F	Ø 18	1	25

2540

Plug for Ø 22 copper pipe.

Code	Pipe diameter		
254002	Ø 22	1	25

Three-piece union fitting

588

Three-piece union fitting for solar thermal systems.
Black nickel-plated nut.

Maximum working pressure: 16 bar
Medium temperature range: -30–160 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions

Code	Connection 1	Connection 2		
588052	3/4" F	3/4" M	1	25
588062	1" F	1" M	1	20

DIRECT HEAT METER

Turbine heat meter for solar systems

75025 CONTECA® EASY SOLAR

Compact direct heat meter for heating solar systems.
The metering module is supplied complete with:
- pair of temperature probes with immersion pockets;
- Y pockets for immersion probes;
- electronic integrator with LCD display.
Local reading via LCD display/centralised reading via BUS transmission.

Medium temperature range: 5–120 °C
Nominal pressure: PN 16
Accuracy class: 3
Maximum percentage of glycol: 50 %
Probe/cable length: 1,9 m
Electric supply: 24 V AC/DC
Running power consumption: 1 W
Protection class: IP 54
Communication protocol: M-Bus on RS485

Code	Connection	Nominal flow rate (m³/h)	Minimum flow rate (Qi) (l/h)	Measure type		
750254	1/2" M	1,5	30	single nozzle	1	-
750255	3/4" M	2,5	50	single nozzle	1	-
750256	1" M	3,5	70	multi-nozzle	1	-

750259	2" M	15	300	multi-nozzle	1	-

SHUT-OFF AND BALANCING VALVES FOR SOLAR THERMAL SYSTEMS

Balancing valves for solar thermal systems

258

Balancing valve with flow meter, for solar thermal systems. Direct reading of flow rate. Ball valve for flow rate adjustment. Graduated scale flow meter with magnetic movement flow rate indicator.

With insulation. PATENT

Maximum working pressure: 10 bar
 Medium temperature range: -30-130 °C
 Maximum percentage of glycol: 50 %
 Medium: glycol solutions, water

Material: brass

Code	Connection	Flow rate regulation		
258503	3/4" F		1	5
258523	3/4" F		1	5
258533	3/4" F		1	5
258603	1" F		1	5

Shut-off valves for solar thermal systems

240

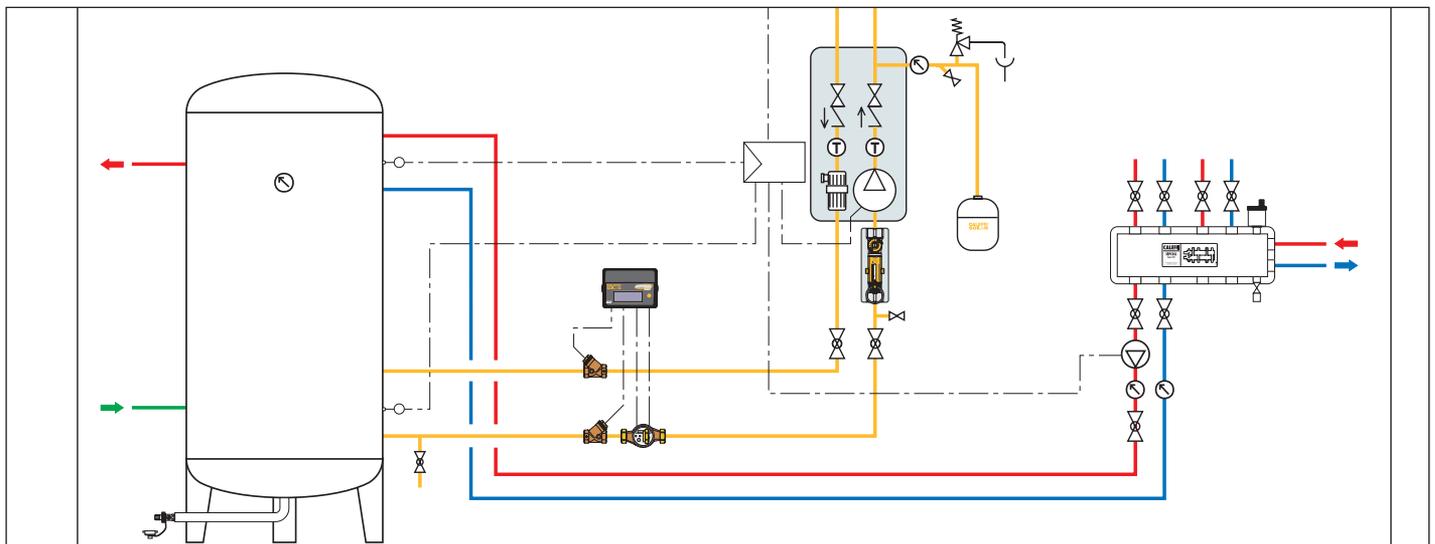

Ball valve for solar thermal system, AISI 304 stainless steel. AISI 304 stainless steel basket.

Medium temperature range: -30-200 °C
 Nominal pressure: PN 63
 Maximum percentage of glycol: 50 %
 Medium: glycol solutions, water
 Material: stainless steel

Code	Connection		
240400	1/2" F	1	5
240500	3/4" F	1	5
240600	1" F	1	5

Application diagram of heat meter 75025 series and balancing valve 258 series

ZONE/DIVERTER VALVES

Zone/diverter ball valves (three-way)

6443

Motorised three-way ball diverter valve. Complete with **three-point control** actuator. **With auxiliary microswitch.**
 Maximum working pressure: 10 bar
 Medium temperature range: -5-110 °C
 Ambient temperature range: 0-55 °C

Protection class: IP 54
 Supply cable length: 1 m
 Auxiliary microswitch contact rating (230 V): 0,8 A
 Opening-Closing time: 10 s (90° rot.)

Code	Connection	Electric supply	Kv (m³/h)

MOTORISED DIVERTER VALVE FOR SOLAR THERMAL SYSTEMS

Thermostatic diverter valves for solar thermal systems

2620

Thermostatic diverter valve for solar thermal systems.

Medium temperature range: 2-100 °C
 Maximum working pressure: 10 bar
 Material: dezincification resistant brass DR

Code	Connection	Adjustment temperature (°C)	Kv (m³/h)		
262040	1/2" M	35-55	1,5	1	10
262050	3/4" M	35-55	1,7	1	10

2620

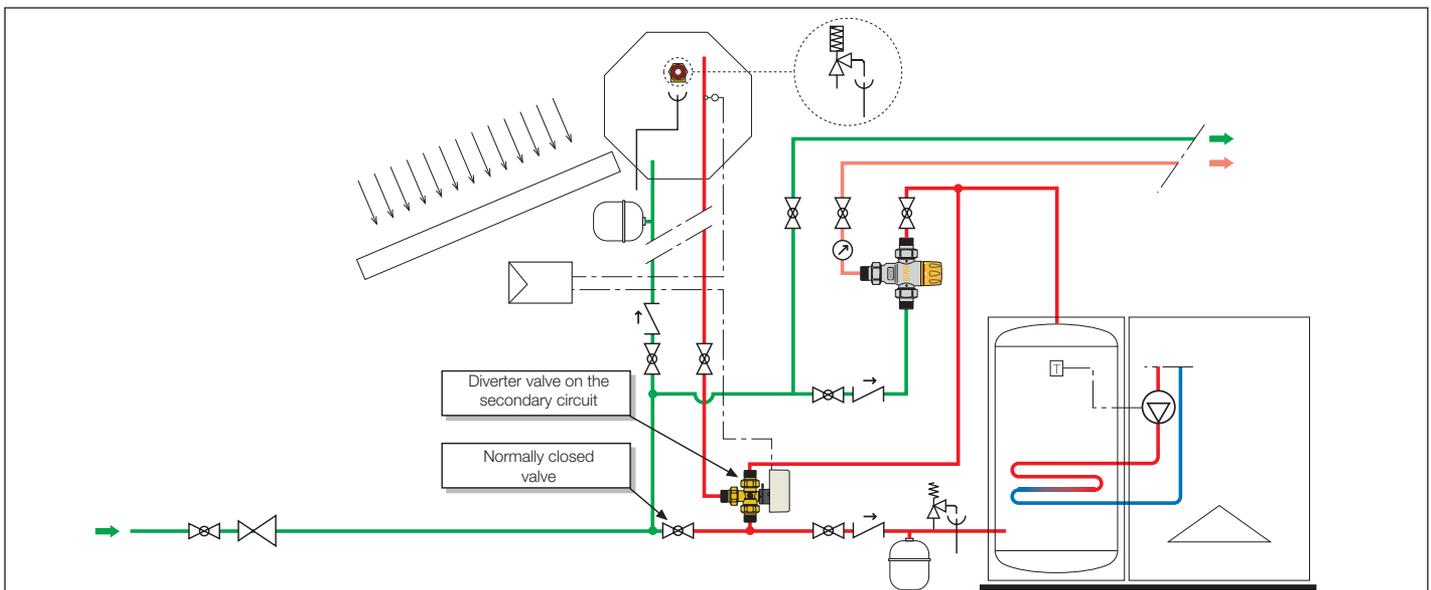

Thermostatic diverter valve for solar thermal systems.

Maximum working pressure: 10 bar
 Medium temperature range: 2-100 °C
 Temperature setting: 45 °C
 Material: dezincification resistant brass DR
 Finish: nickel plated

Code	Connection	Adjustment temperature (°C)	Kv (m³/h)		
262060	1" M	38-52	2,6	1	5

THERMOSTATIC MIXING VALVE FOR SOLAR THERMAL SYSTEMS

Solar thermostatic mixing valve for domestic applications

2521

Adjustable thermostatic mixing valve for solar thermal systems.

Maximum working pressure: 14 bar
Medium temperature range: 2–100 °C
Material: dezincification resistant brass DR “low lead”
Finish: nickel plated

Code	Connection	Notes	Adjustment temperature (°C)	Kv (m³/h)		
252140	1/2" M	-	30–65	2,6	1	10
252150	3/4" M	-	30–65	2,6	1	10
252153	3/4" M	with check valves	30–65	2,6	1	10

2522

High performance adjustable anti-scald tempering valve **with check valves and strainers at the inlets.**

Suitable for solar and instantaneous hot water systems.

Certification AS 4032.1.

Maximum working pressure: 14 bar
Medium temperature range: 2–100 °C
Material: dezincification resistant brass DR “low lead”

Code	Connection	Adjustment temperature (°C)	DN	Kv (m³/h)		
252212HP AUS	1/2" M	35–55	DN 15	1,5	1	10

SOLAR STORAGE-TO-BOILER CONNECTION KIT

Solar storage-to-boiler motorised connection kit

264 SOLARNOCAL

Solar storage-to-boiler connection kit, **without thermal integration.**

Three-contact type actuator.

Complete with:

- anti-scald thermostatic mixing valve with knob, for solar systems;
- inlet strainers and check valves;
- diverter valve with three-contact actuator and auxiliary microswitch;
- thermostat with probe to actuate diverter valves in solar systems;
- temperature display;
- protective pre-formed shell cover. Mixing valve-valve coupling with adjustable inlet and outlet connection positions.

With auxiliary microswitch.

Maximum working pressure: 10 bar
 Medium temperature range: 5–110 °C
 Adjustment temperature range: 35–55 °C
 Electric supply: 230 V AC
 Material: dezincification resistant brass DR

Code	Connection		
264352	3/4" M	1	-

265 SOLARINCAL

Solar storage-to-boiler connection kit, with thermal integration.

Complete with:

- anti-scald thermostatic mixing valve with knob, for solar systems;
- inlet strainers and check valves;
- diverter valve with three-contact actuator and auxiliary microswitch;
- thermostat with probe to actuate diverter valves in solar systems;
- temperature display;
- protective pre-formed shell cover.
- Mixing valve-valve coupling with adjustable inlet and outlet connection positions.

With auxiliary microswitch.

Maximum working pressure: 10 bar
 Medium temperature range: 5–110 °C
 Adjustment temperature range: 35–55 °C
 Electric supply: 230 V AC
 Material: dezincification resistant brass DR

Accessories for geothermal manifold

GEOHERMAL MANIFOLD

Preassembled geothermal manifold

110

Preassembled geothermal manifold.

Complete with:

- automatic air vent;
- Ø80 mm temperature gauges;
- filler/drain cocks;
- composite flow and return manifolds;
- end fitting caps with insulation;
- stainless steel wall mounting brackets;
- set of flow direction and circuit identification labels;
- wall anchors.

Outlet connections with mechanical seal for 112 series balancing valves and 871 series ball valves.

Maximum working pressure: 6 bar
 Maximum hydraulic test pressure: 10 bar
 Medium temperature range: -10–60 °C
 Ambient temperature range: -20–60 °C
 Maximum percentage of glycol: 50 %
 Medium: water, glycol solutions, saline solutions
 Maximum recommended flow rate: 7 m³/h
 DN: DN 50

SAFETY RELIEF VALVES FOR BIOMASS SYSTEMS

Temperature safety relief valves

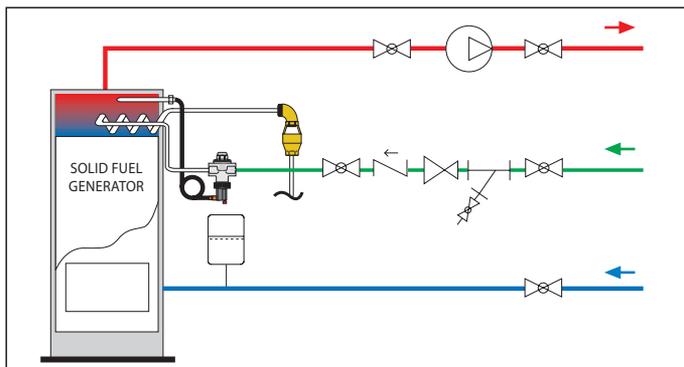

543

Temperature safety relief valve, with double safety sensor.
For solid fuel generators.
Certified to EN 14597.

Maximum working pressure: 10 bar
Medium temperature range: 5–110 °C
Capillary length: 1,3 m
Discharge flow rate with $\Delta p=1$ bar and $T=110$ °C: 3000 l/h

Code	Connection	Temperature setting (°C)		
543513	3/4" F	98	1	10

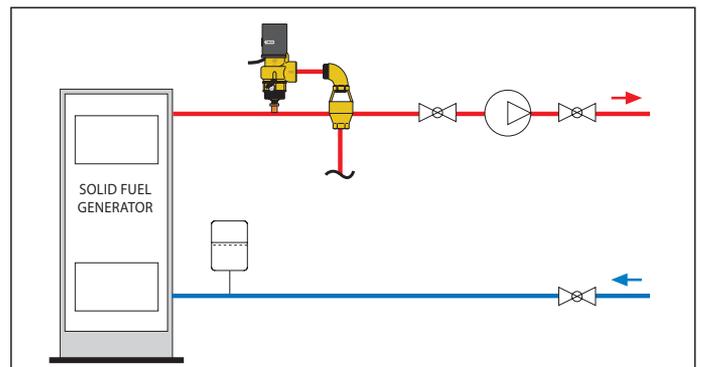

542

Temperature relief valve, with fail-safe action.
Manual reset for burner switch off or alarm activation.
Discharge rating 1 1/2" x 1 1/4" - 136kW; 1 1/2" x 1 1/2" - 419 kW.
Certified and calibrated to INAIL (formerly ISPESL) standards.

Maximum working pressure: 10 bar
Minimum working pressure: 0,3 bar
Medium temperature range: 5–100 °C

Code	Connection	Drain connection	Maximum discharge rating (kW)	Temperature setting (°C)		
542870	1 1/2" M	1 1/4" F	136	98	1	10
542880	1 1/2" M	1 1/2" F	419	99	1	10

543

Temperature safety relief valve, with double safety sensor.
For solid fuel generators.
Certified to EN 14597.

Maximum working pressure: 10 bar
Medium temperature range: 5–110 °C
Capillary length: 1,3 m
Discharge flow rate with $\Delta p=1$ bar and $T=110$ °C: 3000 l/h

Code	Connection	Temperature setting (°C)		
543503	3/4" F	98	1	10

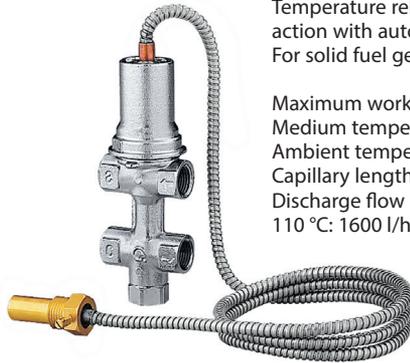

Temperature relief valves with automatic filling

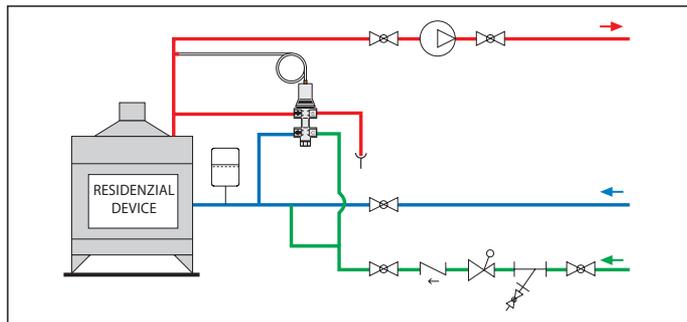

544

Temperature relief valve, with positive action with automatic filling. For solid fuel generators.

Maximum working pressure: 6 bar
 Medium temperature range: 5–110 °C
 Ambient temperature range: 1–50 °C
 Capillary length: 1,3 m
 Discharge flow rate with $\Delta p=1$ bar and T= 110 °C: 1600 l/h

Code	Connection	Temperature setting (°C)		
544400	1/2" F	100	1	10

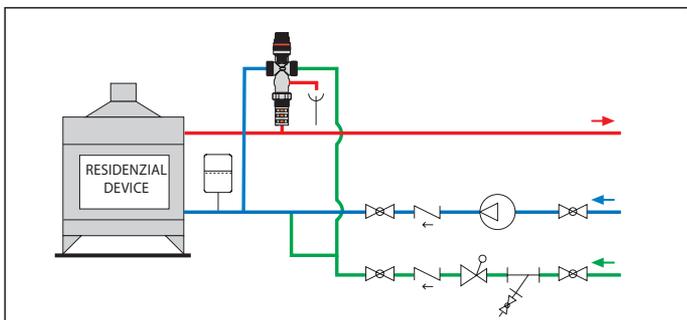

544

Temperature relief valve with automatic filling, with knob for manual discharge. For solid fuel generators.

Maximum working pressure: 6 bar
 Medium temperature range: 5–120 °C
 Discharge flow rate with $\Delta p=1$ bar and T= 110 °C: 1800 l/h

Code	Connection	Temperature setting (°C)		
544501	3/4" M	100	1	-

Draught regulating valve

529

Draught regulating valve. Certified to EN 14597 standard.

Adjustment temperature range: 30–90 °C

Code	Connection	Length pocket (mm)		
529150	3/4" M	58	1	10
529050	3/4" M	58	1	10
529151	3/4" M	78	1	10

CONTROL DEVICES FOR BIOMASS SYSTEMS

Anti-condensation valve

280

Anti-condensation valve with thermostatic control of the return temperature to solid fuel generators.
By-pass complete closing temperature: $T_{min} = T_{set} + 10\text{ }^{\circ}\text{C} = T_r$.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Maximum percentage of glycol: 50 %
Medium: water, glycol solutions
Material: brass

Code	Connection	Notes	DN	Kv (m ³ /h)	Temperature setting (°C)		
280054	3/4" M	-	DN 20	3,2	45	1	10

280065	1" M	-	DN 25	9	55	1	5
280066	1" M	-	DN 25	9	60	1	5
280074	1 1/4" M	-	DN 32	12	45	1	5
280075	1 1/4" M	-	DN 32	12	55	1	5
280076	1 1/4" M	-	DN 32	12	60	1	5

Valve selection

The valve selection should be made according to the Kv value (corresponding to a specific DN body size) and not only according to the threaded connections. Given the system flow rate, the corresponding head losses on the valve should be calculated by using the Kv value. The sum of the head losses on the valve and the head losses of the rest of the system should be compatible with the available head of the generator pump.
Items 1" - DN 20 and 3/4" - DN 20 have the same kv value.

Spare thermostats for anti-condensation valve.

Code	Notes	Temperature setting (°C)		
F29629	part number 28005. / 28026.	45	1	-
F29630	part number 28005. / 28026.	55	1	-
F29631	part number 28005. / 28026.	60	1	-
F29632	part number 28005. / 28026.	70	1	-
F29633	part number 28006. / 28007. (*)	45	1	-
F29634	part number 28006. / 28007. (*)	55	1	-
F29635	part number 28006. / 28007. (*)	60	1	-

Note (*): Also use for 281, 282, 2850, 2851, 2853, 2855 series.

Anti-condensation recirculation and distribution unit

281

Anti-condensation recirculation and distribution unit, with thermostatic control of the return temperature to solid fuel generators.

By-pass complete closing temperature: $T_{min} = T_{set} + 10\text{ }^{\circ}\text{C} = T_r$.
With insulation.

Maximum working pressure: 10 bar
Medium temperature range: 5–100 °C
Maximum percentage of glycol: 50 %
Medium: glycol solutions, water
Maximum recommended flow rate: 2 m³/h
Material: brass
DN: DN 25
Type of pump: Para MS/7

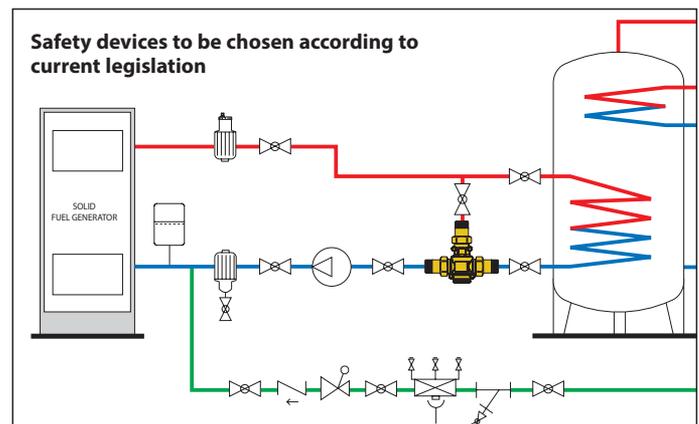

Code	Connection	Temperature setting (°C)		
281064WYP	1" F	45	1	-
281065WYP	1" F	55	1	-
281066WYP	1" F	60	1	-
281074WYP	1 1/4" F	45	1	-
281075WYP	1 1/4" F	55	1	-
281076WYP	1 1/4" F	60	1	-

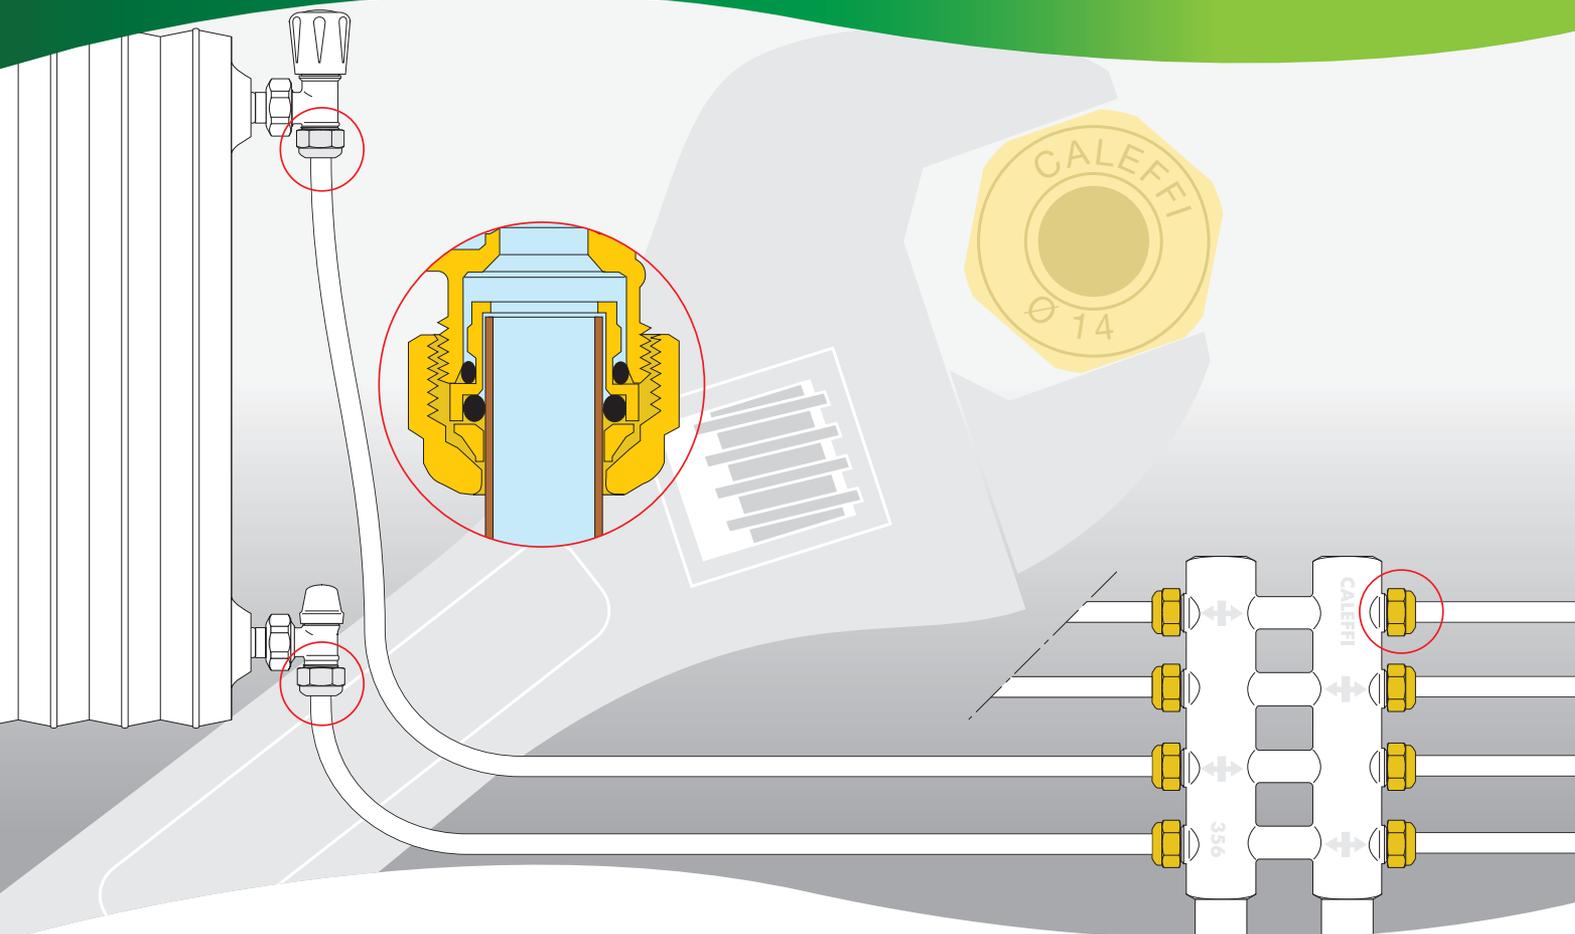

The unit should be selected according to the head available at the unit connections, depending on the DN, and not only according to the threaded connections. Given the system head losses, the available head of the unit pump should be evaluated.

681044	23 p. 1,5	Øint. 13,5-14, Øext. 16-18	10	100

For a correct use, adjust the multilayer pipe diameter before installation using the Caleffi calibrator 679 Series.

Note(*): For the use with REHAU pipes, use REHAU's calibrator.

681 DARCAL

Self-adjustable diameter fitting for single and multilayer plastic pipes.
Working temperature range 5–80°C (PE-X); 5–75°C (Multi-layer marked 95°C).

Maximum working pressure: 10 bar
Medium temperature range: 5–75 °C
Material: brass
Finish: chrome plated

Code	Connection	Pipe diameter		
681101	23 p. 1,5	Øint. 9,5–10, Øext. 12–14	1	50
681124	23 p. 1,5	Øint. 11,5–12, Øext. 14–16	1	50

437

Mechanical fitting.
For soft annealed copper, hard copper and stainless steel pipes. Use with polished chrome plated High-Style valves. With O-Ring seal.

Maximum working pressure: 10 bar
Medium temperature range: -25–120 °C
Material: brass
Finish: chrome plated

Code	Connection	Pipe diameter		
437112	23 p. 1,5	Ø 12	1	50
437114	23 p. 1,5	Ø 14	1	50
437115	23 p. 1,5	Ø 15	1	50
437116	23 p. 1,5	Ø 16	1	50

447

Mechanical fitting, monobloc.
For soft annealed copper, hard copper and stainless steel pipes. With O-Ring seal.

Maximum working pressure: 10 bar
Medium temperature range: -25–120 °C
Finish: chrome plated

Code	Connection	Pipe diameter		
447010	23 p. 1,5	Ø 10	2	100
447012	23 p. 1,5	Ø 12	2	100
447014	23 p. 1,5	Ø 14	2	100
447015	23 p. 1,5	Ø 15	2	100
447016	23 p. 1,5	Ø 16	2	100

438

Mechanical fitting.
For soft annealed copper and hard copper pipes. With PTFE seal.

Medium temperature range: 5–80 °C
Finish: chrome plated

Code	Connection	Pipe diameter		
438010	23 p. 1,5	Ø 10	2	100
438012	23 p. 1,5	Ø 12	2	100

438016	23 p. 1,5	Ø 16	2	100
438018	23 p. 1,5	Ø 18 with pipe stiffener	2	100

437

Mechanical fitting.
For soft annealed copper, hard copper and stainless steel pipes. With O-Ring seal.

Maximum working pressure: 10 bar
Medium temperature range: -25–120 °C
Finish: chrome plated

Code	Connection	Pipe diameter		
437010	23 p. 1,5	Ø 10	1	100
437012	23 p. 1,5	Ø 12	1	100

437015	23 p. 1,5	Ø 15	1	100
437016	23 p. 1,5	Ø 16	1	100

439

Mechanical fitting, with gasket.
Do not use with 232 Series valves.
For soft annealed copper and hard copper pipes.

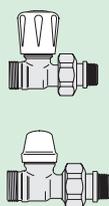

Finish: chrome plated

Code	Connection	Pipe diameter		
439010	23 p. 1,5	Ø 10	1	100
439012	23 p. 1,5	Ø 12	1	100
