Technical specification

Materials

- Body: dezincification resistant alloy **CR**
EN 12165 CW602N
- Obturator: PSU
- Springs: stainless steel
- Seals: EPDM
- Control knob: ABS
- Medium: potable water
- Max. working pressure: 10 bar (static); 5 bar (dynamic)
- Adjustment temperature range: 35–55°C
- Factory set: 43°C
- Accuracy: ±2°C
- Max. inlet temperature: 100°C
- Max. inlet pressure ratio (H/C or C/H): 2:1
- Minimum temperature difference between the inlet hot water and the outlet mixed water to ensure anti-scald performance: 10°C
- Min. flow rate for stable operation: 4 l/min
