*Indicates Shared Parameter and can be scheduled

Rendering

Note: Standard Caleffi materials are imported. These may be modified, but please ensure that the modification selection matches an actual manufacturer supplied option.

Loading and Placing into the Project

To work with the OBAutofill Combo 574 + 5350, 553 in Revit, multiple families and variations within type catalogs are provided. Navigate to the Insert Tab > Load Family button on the Revit ribbon to load the family. Be sure the type catalog (.txt) file is located in the same folder as the family you are loading.

Please ensure that the visibility settings within the project are modified to have the Piping category visible.

Project Behavior

One way to place a OBAutofill Combo 574 + 5350, 553 is to go to the Systems Tab on the Revit ribbon and navigate to the Component button with Place a Component fly-out selected.

Figure 4 - Systems Tab > Component > Place a Component

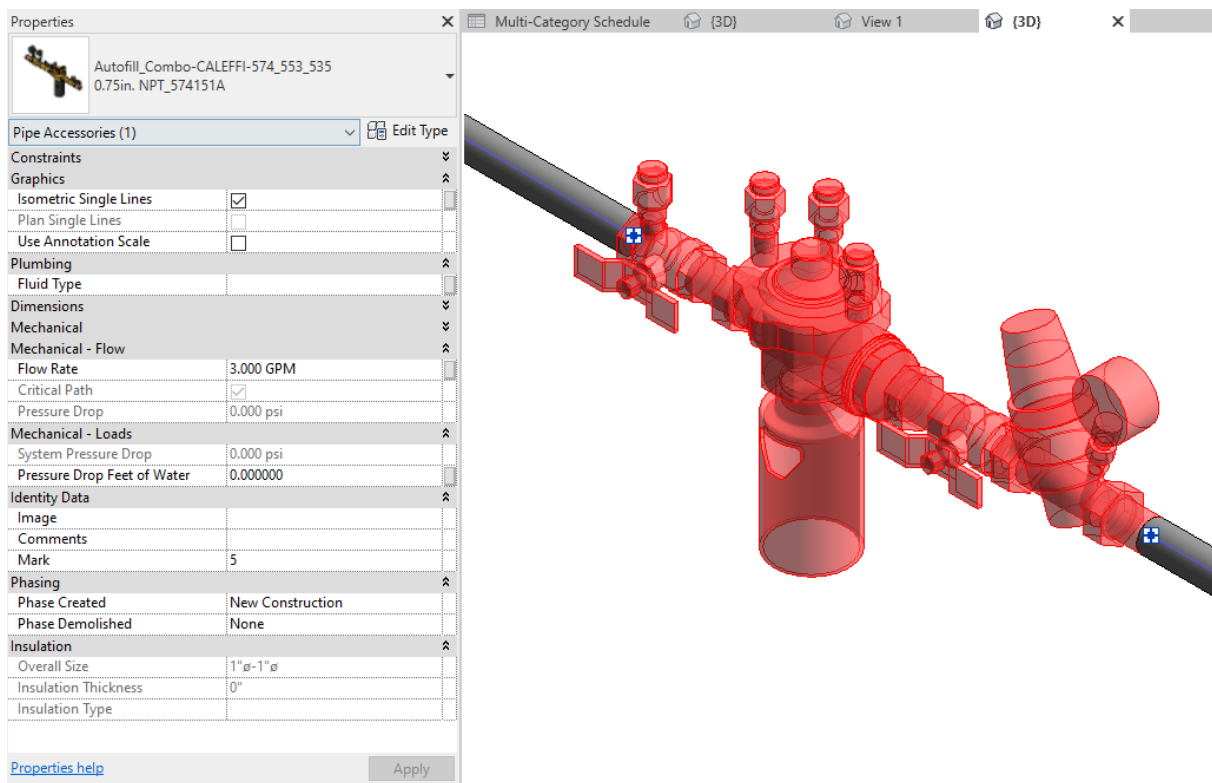

Figure 5 – The OBAutofill Combo 574 + 5350, 553 families can be found under pipe accessories in the project browser and placed directly onto pipe of the same size. It will then read flows and consider pressure drop in the system.

Schedule Creation

Within the type and instance properties dialogues, the Revit user will find useful information for scheduling purposes such as Type, Part Description, Part Number/Model, Family Version, Manufacturer, Series, & Product Page URL. The resulting Pipe Accessories schedule in your project will show counts/quantities of the OBAutofill Combo 574 + 5350, 553 as well as separate quantities/counts of any separately purchased accessory products that do not come in box with the OBAutofill Combo 574 + 5350, 553.
