

Win a FREE trip to Italy!

Show us your
proudest work.

Enter contest today!

Caleffi will be giving away a grand prize trip to Italy. Will you be the next winner?

Beginning in September 2014 and continuing for 12 monthly periods, we are asking designers, contractors and engineers to show us their proudest jobs that feature our products in the Caleffi Excellence contest. Caleffi judges will select three finalists from each monthly period; the winner will then be determined by an instant poll of attendees to Coffee with Caleffi™, our popular monthly education webinars. The winner will receive an iPad® mini and advance as a finalist.

After one year, a **grand prize winner** will be chosen from the 12 monthly finalists. Selected by Caleffi executives, the grand prize winner and their guest will **travel to Italy to see Caleffi World Headquarters and receive a personalized tour of our factories and design facilities.**

It's easy to enter your design. Go to **us.caleffiexcellence.com** and write a simple summary of the design and upload installation photos. Clear photos are helpful for others to understand your work. Add as much description as you desire including design objectives, what you did, why and results. What should your design focus be? Energy efficiency, resource conservation, system performance, cost savings/avoidance, renewable energy, problem solving, minimizing downtime, maximizing comfort, etc. are encouraged. Simply said, did you provide a customer solution with Caleffi product? Then why not enter it into the Excellence contest?

We look forward to seeing your projects. Buona Fortuna! (Good Luck)

Caleffi World Headquarters, Milano, Italy

Located just a short distance from the Alps, Caleffi’s World Headquarters located near Milano (Milan), Italy, features some of the world’s best accomodations, cuisine and scenery. As a reward, Caleffi North America wishes to give the grand prize winner and their guest a memorable trip to see our world headquarters and receive a personalized tour of our factories and design facilities.
