**Coffee with Caleffi™ Webinar Series**  
***Paired for Performance: Heat Emitters and Heat Pumps***

**MILWAUKEE – Thursday, March 7, 2024:** Heat Pumps, both air-to-water and water-to-water geexchange, are quickly gaining acceptance and increasing market share as heat sources in hydronic-based systems. However, matching these heat pumps to appropriate heat emitters and distribution systems is crucial in achieving high performance. A favorite to the series, **John Siegenthaler, P.E.** will survey a wide variety of heat emitters that can be used in both new and retrofit applications, describing potential pitfalls and how to avoid them in this 90 minute extended *Coffee with Caleffi* webinar edition on **Thursday, March 28** at 12:00 p.m. CDT.

**Siegenthaler** is a seasoned industry leader and passionate teacher, eager to share his over 40 years' experience in the understanding and proper application of water-based engineering principles with our audience. He is the principal of Appropriate Designs and a regular contributor to industry publications.

A Certificate of Attendance is emailed to attendees following the event for continuing education audits. The monthly educational webinars are free and are intended for engineers, contractors, designers and wholesalers.

Visit our website at [www.caleffi.us](http://www.caleffi.us) for schedule details and [registration](#) requirements.

**CALEFFI** – Creating innovative, superior performance hydronic and plumbing products that help customers live comfortably and economically, while softening their impact on the environment.
