Caleffi Introduces the 33rd Edition of *idronics*[™]: Heat Pump Water Heater Fundamentals

MILWAUKEE – Wednesday, Sept. 20, 2023: The underlying energy-efficiency potential of heat pump technology creates a high potential to save energy in the domestic water heating segment. Caleffi North America, Inc., a leader in state-of-the-art engineered solutions for hydronic and plumbing systems and committed to providing Excellence in Education, is proud to introduce the 33rd edition of *idronics*[™]: **Heat Pump Water Heater Fundamentals**.

This plumbing-focused edition will assist the reader in evaluating heat pump water heater (HPWH) technology while investigating the emerging technology's advantages and limitations in both retrofit and new construction applications.

Subscribers to the journal will receive a hard copy of the new edition in September. Caleffi also provides an interactive experience for the journal, optimizing access for mobile, tablets and desktop devices. The interactive edition can be found at idronics.caleffi.com.

Not familiar with *idronics*? The complimentary journal is provided semi-annually and is written for industry professionals to aid them in system design, component application and selection. Visit our [website](http://www.caleffi.com) to subscribe for your personal copy.

CALEFFI – *Creating innovative, superior performance hydronic and plumbing products that help customers live comfortably and economically, while softening their impact on the environment.*
