**Coffee with Caleffi™ Webinar Series:
Decarbonization with Hydronic Systems**

MILWAUKEE – Tuesday, Dec. 5, 2023: With energy efficiency being one of the four decarbonization pillars in the U.S. Department of Energy's Industrial Decarbonization Roadmap, the goal of achieving a low-carbon economy and attaining carbon neutrality is possible with the use of radiant heating and cooling, hydronic hot-water heating, and chilled-water systems.

Guest speaker Hailey Mick will explain how a thoughtfully designed hydronic system can provide a compelling solution for comfort, efficiency, and Indoor Environment Quality (IEQ) benefits at the next *Coffee with Caleffi* webinar on **Thursday, Dec. 21** at 12:00 p.m. CST.

Mick is an Engineering Business Development Manager at Uponor North America. She has 17 years of experience in the commercial HVAC industry. She holds a Bachelor of Chemical Engineering from Auburn University and is a member of ASHRAE, ASHE, ASPE, and the Uponor Sustainability Core Team.

A Certificate of Attendance is emailed to attendees following the event for continuing education audits. The monthly educational webinars are free and are intended for engineers, contractors, designers and wholesalers.

Visit our website at www.caleffi.us for schedule details and [registration](#) requirements.

CALEFFI – Creating innovative, superior performance hydronic and plumbing products that help customers live comfortably and economically, while softening their impact on the environment.
