### Simple Scald Protection with Caleffi SinkMixer™ 4-Way Thermostatic Mixing Valve

**MILWAUKEE – Monday, Jan. 27, 2020:** Caleffi North America, Inc. is proud to introduce an all-new, innovative, 4-port scald protection valve for point-of-use applications, the [5212 Series SinkMixer™](#). Its compact design minimizes connection points by allowing direct connection from the valve to the cold fixture port without the use of an additional tee that is required with 3-port valve configurations. SinkMixer includes a stand-off mounting bracket and standard 3/8" compression connections that easily fit common under-sink hoses and pipe fittings to simplify installation. The precision engineered, DZR low-lead brass body complies with IPC, IRC, UPC and NPC plumbing codes and is NSF/ANSI 372 low lead and ASSE 1070/CSA B125.3 certified.

"The quality and precision of the SinkMixer is a great example of Caleffi's attention to detail in design and manufacturing," said Kevin Freidt, director of product management and technical support.

SinkMixer will be on display at [Booth 6581](#) during the upcoming [AHR Expo](#) in Orlando, Feb. 3-5, 2020. Please contact us at [sales@caleffi.com](mailto:sales@caleffi.com) or (414) 238-2360 for more information.

**CALEFFI** – *Creating innovative, superior performance products that help customers live comfortably and economically, while softening their impact on the environment.*
