Coffee with Caleffi™ Webinar Series: Hydronics for Low-Energy & Net-Zero Buildings

MILWAUKEE – Wednesday, Jan. 19, 2022: Combining the availability of water-to-water and low ambient air-to-water heat pumps with global trends for electrification and interest in net-zero buildings presents an unprecedented opportunity for the use of modern hydronic technology that could significantly increase market share while meeting consumer expectations. A favorite to the webinar series, **John Siegenthaler, P.E.**, will describe how to craft hydronic systems for modern low energy and net zero buildings at the next extended edition of *Coffee with Caleffi™* on **Thursday, Feb. 17 from 12 noon – 1:30 p.m. CST.**

A seasoned industry leader and passionate teacher, Siegenthaler is eager to share his over 40 years' experience in the understanding and proper application of water-based engineering principles with our audience. He is the principal of Appropriate Designs and a regular contributor to industry publications.

For a complimentary companion guide related to this important topic, please visit hydronics.caleffi.com.

The monthly educational webinars are free and are intended for engineers, contractors, designers and wholesalers. A *Certificate of Attendance* is emailed to attendees following the event for continuing education audits.

Please visit our website at www.caleffi.us for schedule details and registration.
