Caleffi Introduces the 28th Edition of *idronics*[™]: Contemporary Hydronic Cooling for Commercial Buildings

MILWAUKEE – Monday, Feb. 15, 2021: Many HVAC pros know that modern hydronic technology offers several advantages when it comes to heating buildings. This also holds true for cooling buildings. Caleffi North America, Inc., a leader in state-of-the-art engineered solutions for hydronic and plumbing systems and committed to providing *Excellence in Education*, is proud to introduce the 28th edition of *idronics*[™]: Contemporary Hydronic Cooling for Commercial Buildings. This newest edition explores contemporary methods and details several modern hydronic concepts such as water source heat pumps, ice storage, heat recovery chillers, radiant cooling, chilled beams, variable speed pumping, hydraulic separation and heat metering.

Caleffi also provides an interactive experience for the journal, optimizing access for mobile, tablets and desktop devices. The content is fully searchable and is complimented with video and resource links. The interactive edition can be found at idronics.caleffi.com.

idronics is a complimentary educational journal series for hydronic, plumbing and renewable energy professionals to aid them in system design, component application and selection. Subscribers to the journal will receive a hard copy of the new edition.

For further information, please visit www.caleffi.us or contact us at (414) 238-2360.

CALEFFI – *Creating innovative, superior performance hydronic and plumbing products that help customers live comfortably and economically, while softening their impact on the environment.*
