Coffee with Caleffi™ Webinar Series: Optimizing Mixing Valves in DHW Systems

MILWAUKEE – Wednesday, April 7, 2021: Mixing valves are used every day in domestic hot water (DHW) systems. Whether you're designing a system with a mixing valve or servicing an existing installation, there are a number of considerations in order to ensure accurate control of the water temperature. **Cody Mack**, Caleffi training and education manager, will share how to design, install AND maintain a trouble-free DHW system at the next Coffee with Caleffi webinar on **Thursday, April 22 from 12 noon – 1 p.m. CDT.**

Mack has nearly 20 years' experience as an installation contractor, service technician, application engineer and most recently training manager for Caleffi. He pounds the virtual pavement educating Boomers, Gen-X'ers, Millennials and beyond. A family man, gear-head and motorcycle-enthusiast, our audience will appreciate his thoughtful delivery, clever humor and common sense product approach.

The monthly educational webinars are free and are intended for engineers, contractors, designers and wholesalers. A *Certificate of Attendance* is emailed to attendees following the event for continuing education audits.

Please visit our website at www.caleffi.us for schedule details and registration.

CALEFFI – *Creating innovative, superior performance products that help customers live comfortably and economically, while softening their impact on the environment.*
