Coffee with Caleffi™ Webinar Series: Find It & Fix It

MILWAUKEE – Tuesday, May 4, 2021: How good are your hydronic system diagnostic skills? Can you spot errors while the design is conceptual and change the layout to prevent problems? Are there “minimally-invasive” approaches to right the wrongs in existing installations? A favorite to the webinar series, **John Siegenthaler, P.E.**, will present several problematic hydronic system scenarios and discuss what is wrong based on the “fundamentals” during this extended edition of the webinar on **Thursday, May 20 from 12 noon – 1:30 p.m. CDT.**

A seasoned industry leader and passionate teacher, **Seigenthaler** enjoys sharing his over 40 years’ experience in the understanding and proper application of water-based engineering principles with our audience. He is the principal of Appropriate Designs (Holland Patent, N.Y.) and a regular contributor to industry publications.

The monthly educational webinars are free and are intended for engineers, contractors, designers and wholesalers. A *Certificate of Attendance* is emailed to attendees following the event for continuing education audits.

Please visit our website at www.caleffi.us for schedule details and registration.

CALEFFI – *Creating innovative, superior performance products that help customers live comfortably and economically, while softening their impact on the environment.*
