### ***Coffee with Caleffi™ :*** **Cogeneration - DHW and Power Generation**

**MILWAUKEE – Monday, June 1, 2020:** Cogeneration is not just for large facilities anymore. Thermally led micro-cogeneration can provide baseload heat for hot water and supplemental power simultaneously. New to the series, **Tommy Olsen**, Lochinvar Segment Market Manager, will set our audience straight in how micro-cogeneration can help small facilities reduce electrical operating cost and reduce their carbon footprint at the next *Coffee with Caleffi™* webinar on **Thursday, June 25** from **12 noon-1 p.m. CDT**.

Olsen has over 30 years' experience in the boiler and water heating industries. Offering his unique industry angle, he is a regular contributor to major trade publications. Olsen has a litany of credentials including a B.S. in Resource Management, an MBA and is an APICS Certified Integrated Resource Manager.

The one-hour educational webinars are free and are intended for engineers, contractors, designers and wholesalers. A *Certificate of Attendance* is emailed to attendees following the event for continuing education audits. Please visit our website at [www.caleffi.us](http://www.caleffi.us) for schedule details and registration.

**CALEFFI** – *Creating innovative, superior performance products that help customers live comfortably and economically, while softening their impact on the environment.*
