Coffee with Caleffi™ : **Domestic Hot Water Recirculation in High-Rise Buildings**

MILWAUKEE, WISC. – Wednesday, Sept. 4, 2019 Recirculating domestic hot water (DHW) in high-rise buildings poses challenges that do not exist in lower profile buildings. Our guest speaker, **Claudio Ardizzoia**, Caleffi Global Headquarters lead product manager, will discuss the challenges related to high-rise DHW recirculation, review solutions for proven design concepts and provide guidelines for proper product selection at the next *Coffee with Caleffi™* webinar on **Thursday, Sept. 26 at 12 noon CDT.**

Ardizzoia is a mechanical engineering graduate, specializing in HVAC systems. His 30+ years' of experience includes design engineering, field management, technical documentation and his passion: R&D of new products and applications. Ardizzoia is instrumental in the certification and approval process of products and is an active member of *The European Committee for Standardization* (CEN) and the *TC 164WG2*, a technical committee dedicated to the prevention of Legionella.

The one-hour educational webinars are free and are intended for contractors, designers and wholesalers. A *Certificate of Attendance* is emailed to attendees following the event for continuing education audits. Please visit our website at www.caleffi.us for schedule details and registration.

CALEFFI – *Creating innovative, superior performance products that help customers live comfortably and economically, while softening their impact on the environment.*
