### Caleffi Union Y-strainer Line Expansion

**MILWAUKEE – Thursday, Oct. 27, 2022:** An industry leader in innovative plumbing and hydronic technology, Caleffi North America has expanded their product offering with the [128 Series union Y-strainers](#) that are ideally suited for use in hot water recirculation or hydronic systems. Constructed of DZR low-lead brass bodies, the strainers are in stock and available for order in North America.

The 128 Series Y-strainer has dual union connections for ½”, ¾” and 1” pipe sizes and tailpiece connections in sweat, NPT, press, F1960 PEX expansion and F1807 PEX crimp. The Y-strainer comes with factory-installed integral PT ports that allow quick verification of pressure drop across the strainer. The easy to remove strainer cap includes a plug for installation of a field-provided blowdown valve.

Enjoy fast and easy service flexibility by combining the strainer with Caleffi [290030 isolation ball valves](#). The strainer pairs up nicely with the Caleffi 128 Series [FlowCal™ and FlowCal+™](#) balancing valves.

Visit our website at [www.caleffi.us](http://www.caleffi.us) or call us at (414) 238-2360 for further product information.
