Coffee with Caleffi™

Accurate Temperature Control in Plumbing Systems

MILWAUKEE, WISC. – Monday, Dec. 2, 2019 The importance of proper domestic hot water (DHW) temperature control in providing comfort, safety and convenience cannot be overstated. Delivering it remains one of the most important responsibilities of plumbing system designers. **Kevin Freidt**, Caleffi director of product management and technical support, will discuss temperature control at the hot water source, at the point-of-use, in the balanced secondary circuits and in the system as a whole at the next *Coffee with Caleffi™* webinar on **Thursday, Dec. 19 at 12 noon CST.**

Freidt is the intellect behind sizing up the best product offerings in a moving target market and manages an exceptional technical support team. He has a B.S. in Mechanical Engineering Technology, 35+ years' of experience in the commercial HVAC industry and is a LEED AP. Our audience will thoroughly appreciate his academic passion and concise content delivery.

The one-hour educational webinars are free and are intended for contractors, designers and wholesalers. A *Certificate of Attendance* is emailed to attendees following the event for continuing education audits. Please visit our website at www.caleffi.us for schedule details and registration.

CALEFFI – *Creating innovative, superior performance products that help customers live comfortably and economically, while softening their impact on the environment.*
