

## MEDIA RELEASE

### *The Perfect Loop: Proven Systems from Both Sides of the Flange*

*Caleffi and Grundfos team up for 2022 contractor training series*

**MILWAUKEE – Monday, Jan. 31, 2022:** Today, two powerhouses in the global hydronics market, Caleffi and Grundfos, partner to launch [The Perfect Loop](#): a contractor training series developed and led by industry experts.

The Perfect Loop combines both companies' expertise in sustainable plumbing and hydronics technology with a focus on excellence in education and a commitment to efficient water and energy usage. The complimentary training meets a strong demand from installers by providing customized, hands-on hydronics and plumbing systems content. In-person training will be limited in size, allowing attendees to participate in interactive workshops on real-world applications. Virtual training options will also be available for those unable to attend an in-person session. All participants will be invited to submit the name of a deserving family or nonprofit organization to receive free system components from Grundfos and Caleffi.

"We value our partnership with Caleffi, and we are thrilled to deliver The Perfect Loop together to boost knowledge and productivity for skilled contractors," said Kirk Vigil, Grundfos vice president of domestic building services.

"This partnership is a huge step towards providing a holistic solution for homeowners by focusing on complete and efficient hydronic and plumbing systems," added Barry Nauss, Grundfos vice president of HVAC OEM. "As we say, 'There is a better way,' and we are happy to share it."

**The Perfect Loop:** This training series debuts in April 2022 at select Caleffi and Grundfos locations across the United States, including Chicago, Fresno, Calif., and Denver in April, May, and June, respectively. Additional dates and locations will be announced throughout the year.

"It's no secret both companies share a commitment to excellence in education," states Kevin Freidt, Caleffi director of product management and technical support. "The Caleffi and Grundfos partnership brings together the perfect mix of proven industry know-how to help installers work more efficiently on the job site."

**[Keep me in The Loop!](#) Sign up for more information about limited in-person attendance and virtual offerings.**

#### **ABOUT CALEFFI**

For over 60 years, Caleffi has been designing components and systems for personal comfort. Our expertise is in controlling temperature, pressure, and flow of water-based fluids. Our success is based on providing total quality while creating innovative, superior performance products that help customers live comfortably and economically while softening their impact on the environment.

## ABOUT GRUNDFOS
