Coffee with Caleffi™ Webinar Series: Troubleshooting DHW Recirculation

MILWAUKEE – Monday, May 1, 2023: It is of utmost importance to understand how to effectively apply mixing and balancing technology in order to optimize hot water delivery times, energy efficiency, water conservation and safety in domestic hot water (DHW) systems. **Cody Mack** and **Kevin Freidt** will reveal common symptoms found in problematic DHW recirculation systems and how to effectively resolve these issues at the next *Coffee with Caleffi* webinar on **Thursday, May 18** from **12 noon – 1:00 p.m. CDT.**

You'll learn:

- What to do if a mixing valve is not controlling the temperature consistently
- How to size a digital mixing valve when replacing a thermostatic mixing valve
- How to rectify DHW recirculation temperature fluctuations
- How energy codes can impact your DHW recirculation systems
- Addressing long wait times in multi-family projects
- What to do in applications with multiple pressure zones

Mack has nearly 20 years' experience as installation contractor, service technician, application engineer, product manager and national training manager for Caleffi.

Freidt is the director of product management and technical support at Caleffi. He is eager to share his 30 years of experience in the commercial plumbing and heating industry.

The monthly educational webinars are free and are intended for engineers, contractors, designers and wholesalers. A *Certificate of Attendance* is emailed to attendees following the event for continuing education audits.

Visit our website at www.caleffi.us for schedule details and registration.

CALEFFI – *Creating innovative, superior performance hydronic and plumbing products that help customers live comfortably and economically, while softening their impact on the environment.*
