### **Coffee with Caleffi™ Webinar Series: Removing the Rubbish from Hydronic Systems**

**MILWAUKEE – Tuesday, Oct. 5, 2021:** Boiler sludge. Copper shavings. Pipe tape. Solder balls. This dodgy debris can wreak havoc on sensitive hydronic system components resulting in adverse performance. Joining us from Stafford, England, guest speaker **Ed Morris** and our very own **Bob "Hot Rod" Rohr** will talk down and dirty about why it is so important to keep your boiler systems pristine at the next *Coffee with Caleffi™* webinar on **Thursday, Oct. 21 from 12 noon – 1:00 p.m. CDT.**

**Ed Morris** is the Technical Manager at [Altecnic Ltd.](#) He's a heavy lifter when it comes to resolving technical conundrums. Ed stars in many of Altecnic's training videos and the popular podcast series: *Life at the Tap End*. Bottom line? Ed's high energy makes learning fun!

**Bob Rohr**, a.k.a. "Hot Rod" and the 2020-2022 Carlson-Holohan Industry Award of Excellence honoree, travels from sea to shining sea for Caleffi North America, sharing his 40+ years' of experience as a contractor. Combining the energy of these two blokes will result in quite a webinar experience for our audience!

The monthly educational webinars are free and are intended for engineers, contractors, designers and wholesalers. A *Certificate of Attendance* is emailed to attendees following the event for continuing education audits.

Please visit our website at [www.caleffi.us](http://www.caleffi.us) for schedule details and registration.

**CALEFFI** – *Creating innovative, superior performance products that help customers live comfortably and economically, while softening their impact on the environment.*
